Reflections On Modern Psychiatry:

Reflections on Modern Psychiatry David J. Kupfer, Beyond the Bounds Mary Brignano, 2009-09 **Labyrinths of the Mind** Daniel R. White, Gert Hellerich, 1998-04-30 *Labyrinths of the Mind* critically engages and creatively transforms the patterns of postmodern culture. It envisions strategies of self discovery emerging in our era as a labyrinth whose design evolves as we explore it. Nietzsche serves as our guide throughout the book as we wander the shopping mall, travel on an odyssey with Franz Kafka, critically explore the disorders of psychiatry and psychotherapy, attend a Nine Inch Nails concert during the Gulf War, wake on a medical examination table and contemplate ourselves in the mirror of the biosphere.

Values and Psychiatric Diagnosis John Z. Sadler, 2005 In this work John Z. Sadler examines the nature and significance for practice of the value content of psychiatric diagnostic classification. *Reflections on the Principles of Psychology* Michael G. Johnson, Tracy B. Henley, 2013-04-15 This important volume looks back to 1890 and 100 years later asks some of the same questions William James was asking in his *Principles of Psychology*. In so doing it reviews our progress toward their solutions. Among the contemporary concerns of 1990 that the editors consider are the nature of the self and the will, conscious experience, associationism, the basic acts of cognition and the nature of perception. Their findings: Although the developments in each of these areas during the last 100 years have been monumental, James' views as presented in the *Principles* still remain viable and provocative. To provide a context for understanding James, some chapters are devoted primarily to recent scholarship about James himself, focusing on the time the *Principles* was written, relevant intellectual influences and considerations of his understanding of this new science of psychology. The balance of this volume is devoted to specific topics of particular interest to James. One critical theme woven into almost every chapter is the tension between the role of experience or phenomenological data within a scientific psychology and the viability of a materialistic or biologically reductive account of mental life. Written for professionals, practitioners and students of psychology in all disciplines.
