

Reflective Journal Template - Topic Reflection

Topic	
	HIV/AIDS Prevention
What are the key points of contention on this topic?	Human immunodeficiency virus (HIV) and acquired immune deficiency syndrome (AIDS) are diseases that pose a huge threat to the health of humans. In countries that are less developed, such as Africa, HIV and AIDS are more common and we want to find the most effective way to educate people and prevent the spread. Condom use can be a very effective way of preventing the spread of HIV/AIDS, though it does not 100% stop the diseases from spreading because they can also be spread through saliva and blood (West Coast University, n.d.). Should people be obligated to submit a HIV test to prevent the spread, or would this be an unethical reason to violate a person's privacy?
What side of the argument (stance) do you take on this topic?	I side with Dr. Williams' stance of implementing mandatory HIV testing to screen for positive clients (West Coast University, n.d.). Even though some people might see mandatory testing as a violation of their rights, I think that it is the solution that will get people the treatment they need and alert others who might be at risk (West Coast University, n.d.). This decision is difficult because there are people who sometimes feel embarrassed or scared to tell others that they have HIV, so they live life in denial of it and this can increase the spread.
What strong points does the other side of this topic have?	On the other hand, Dr. Meadows was more in favor of letting people have more of a choice to use the resources available because they didn't want to violate their rights. She also stated that condom use significantly decreased the likelihood of contracting HIV, so getting different organizations to raise awareness of using it is very effective in preventing the spread (West Coast University, n.d.). Making HIV testing mandatory would ignore basic human rights and confidentiality, so it should be voluntary and all information should be kept confidential regardless of positive test results (West Coast University, n.d.).
What were the three most important things you took away from the topic?	1. Condom use is an effective way of preventing the spread of HIV, however it is not 100% effective (West Coast University, n.d.).
