Schuetze, Germán Álvarez Mendiola, Diane Conrad, 2012-09-05 Universities have never been static Even so it is fair to say they have experienced a most radical transformation in the past twenty years During this period the role and responsibility of the state generally have been broadly limited while allowing market forces private ownership and control more influence But even where the state is still the main provider or funder it relies increasingly on market mechanisms for example contractual relations between state and institutions competition among providers for resources and external assessment of outputs which means the results or impact of what universities do in particular teaching and research The new terminology speaks of price and competition inputs and outputs resources cost and benefits demand and supply provider and customer consumers and investors quality control and accountability Education and post secondary education especially are increasingly seen as matters for markets Formal post secondary education becomes a service commercialized and traded across national borders This volume on changing relationship between state and market contains besides an introductory analytic overview of the issues accounts from different countries regions and thematic perspectives Chapter authors describe and analyze

government reforms and other developments that have directly or indirectly affected this relationship Although the geographical focus is on North America especially Mexico South East Asia and Europe the phenomenon is not limited to these regions and countries but worldwide

Pruning The Ivy Milton Leontiades, 2007-04-01 Higher education in America is the best in the world but it is also desperately in need of reform Lacking effective competition and insulated from market forces universities have created a model fundamentally at odds with free market principles In a system few outsiders comprehend universities uniquely are run for the benefit of faculty Increasingly top universities have come to resemble closed academic societies Admission is by way of a Ph D degree Mastery of abstract research for its own sake is the route to promotion and advancement Teaching is of incidental importance for tenure the goal of every academic Achieving tenure assures long term employment without mandatory retirement plus freedom from inhibitions on speech or actions Faculty share governance with an administration although faculty lack managerial skills or responsibility for their recommendations Politically conformist faculty think one way and recruit newcomers who think alike Given time institutions that do not attract strong leaders or demand accountability from faculty are destined to underperform Cracks in the seams of the current system are emerging in out of control costs and greater competition Lacking normal measures of efficiency or productivity universities costs tend to spiral higher with future escalation a given The trends are clear but not yet ominous Without reform America s universities are coasting Can reforms take hold before a crisis is reached Only if strong voices

demand it Reform from universities that are characterized by intellectual inbreeding and self regulation cannot be expected Assuring future generations of a quality education is the collective responsibility and duty of the citizenry Based on an inside out view of universities this book provides the ammunition for such a campaign It provides the information and stimulus for reform for legislators community leaders academics and average citizens
