Regional Economic Impact Of Technological Change:

The Regional Economic Impact of Technological Change A. T. Thwaites, Raymond P. Oakey, 1985 Technological change economic implications regional development Innovation location of industry research and development public sector machinery industry information technology Graphs maps references statistical tables *High-Technology Development in Regional Economic Growth* Byung-Rok Choi, 2019-06-04 This title was first published in 2003 Korea has had considerable success in developing its high technology industries and these have become significant employers in this region By analysing the situation in Korea this book explores the effects of dynamic externalities on the growth of regional employment in the high technology industries It puts forward innovative simultaneous equation models to test three sets of hypotheses related to so called Jacobs and MAR effects differentiated by firm size organizational type and product Clear evidence is found for endogenous technological progress marked by positive feedback especially for small firms in diversified high technology enclaves There are technological externalities associated with knowledge spillovers and local employment has indirect effects on employment growth via dynamic externalities The implications for local economic development policy are outlined in a concluding section

The Regional Economics of Technological Transformations Roberta Capello, Camilla Lenzi, 2021-08-30 The Regional Economics of Technological Transformations provides a comprehensive overview of 4 0 technological transformations in Europe and their socio economic impact with a particular emphasis on the regional dimension of the phenomena The authors employ extensive original data and robust quantitative methods to analyse technological change in all regions of the 27 EU countries plus the UK and shed light on this trend for Europe and beyond Structured in four parts the book first looks at conceptual definitions empirical measurements and expected impacts on both the economic performance GDP and productivity growth and the labour market and then moves on to analyse where 4 0 technological transformation actually takes place in Europe and the reasons for this Next it offers original empirical evidence on the impacts of the different transformations and of their intertwined effects on both the economy and the society Finally the book explores the policy implications of this technological transformation This book will be valuable reading for advanced students researchers and policymakers working across regional economics industrial economics and innovation policy It will be of primary interest to regional scientists interested in the field who may enjoy the conceptual and empirical solutions to the study of a very complex timely and still largely unexplored theme Sociologists engineers and political economists can benefit from the book s analysis noting the urgency of the development of new ethical rules governing the new digital and labour markets Finally the book may appeal to policymakers interested in opportunities to increase regional competitiveness and sustainability goals through the advent of 4 0 technologies

Knowledge Flows, Technological Change and Regional Growth in the European Union Małgorzata Runiewicz-Wardyn, 2013-06-14 The book provides conceptual and empirical insights into the complex relationship between knowledge flows and regional growth in the EU The author critically

scrutinizes and enhances the RIS Regional Innovation System approach discussing innovation as a technological institutional and evolutionary process Moreover she advances the ongoing discourse on the role of space and technological proximity in the process of innovation and technological externalities The book closes with an investigation of the role of technological change and knowledge spillovers in the dynamic growth and catching up of EU regions **The Social and Economic**

Impact of New Technology 1978-84: A Select Bibliography Leslie Grayson,2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts

New Technology and Regional Development Bert Van Der Knapp,Egbert Wever,2003-08-16 First Published in 2004 Since the second half of the seventies a period of economic recession a growing interest for technological change can be noticed in all old industrial countries The reason for this phenomenon is the conviction that the economic future of these countries will depend to a large degree on their ability to create new products and processes and to make these commercially viable Hence the stimulation and subsidising of all kinds of Research and Development R D activities by the governments of these countries Against this background it was certainly not unexpected that the IGU Commission on Industrial Change presided by Godfrey Linge decided to organise a congress on Technology and Industrial Change This congress was held in August 1985 at Nijmegen in the Netherlands In this book some of the papers presented there are published We are very happy that we were allowed to include the very interesting contributions of the representatives of Philips in Eindhoven and of the European Commission in Brussels Routledge Library Editions: Economic Geography Various,2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a

comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization New Models In Geography Richard Peet,Nigel Thrift,2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original Models in Geography was published It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis its own questions and debates The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach Moreover from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally it has now flowered into a consistent part of enquiries that span the entire realm of social studies *Technological Change and Regional Development in Europe* Ludwig Schätzl,Javier Revilla Diez,2012-12-06 This book presents the findings of the extensive research programme funded by the Deutsche Forschungsgemeinschaft German Research Council and entitled Technological Change and Regional Development in Europe The goal of this programme was to carry out research by means of empirical surveys into the relationship between technological change and regional development Over a period of six years a total of 50 research projects have been undertaken in three phases each lasting two years This research programme has succeeded in actively involving leading German regional scientists from many universities as well as non university research institutions In addition numerous research projects were carried out in close co operation with internationally renowned partners We should like to express our gratitude for the support provided by the Deutsche Forschungsgemeinschaft Without their financial backing of the research programme it would not have been possible to undertake such an ambitious project Thanks also go to the contributors of this volume for their willingness to participate in our joint project We wish in addition to acknowledge the contribution of Prof Dr Philip Cooke whose refereeing of the chapters has enhanced the quality of the work presented here Finally our thanks go to Angela Spence for her expert editorial assistance linguistic editing and the preparation of the Index and also Franco Vaio for taking care of the technical aspects and production of the final copy Their combined efforts have been crucial for successfully bringing together contributions from so many different authors in a single volume

Technology, Innovation, and Regional Economic Development ,1983-05 **The China Information Technology Handbook** Patricia Ordóñez de Pablos,Miltiadis D. Lytras,2010-03-23 Miltiadis D Lytras and Patricia Ord ez de Pablos Department of Computer Engineering and Informatics University of Patras Greece Dept of Business Administration and Accountability University of Oviedo Spain China is a fast growing emerging economy and current impressive economic

growth rate of almost 9 percent annually Its contribution to global GDP growth since 2000 has been almost twice as large as that of the next three biggest emerging economies India Brazil and Russia combined Some even refer to China as the mother of emerging markets and transition economies Directly or indirectly the Chinese economy has influenced interest rates prices for raw materials and wages in the western established economies Currently China is the most R D intense of emerging market countries and is seventh of all countries in the world Its economic power is exemplified by the fact that it is expected to be the fifth largest source of outward foreign direct investment during 2004 2007 Working with Chinese firms has become a reality for the vast majority of managers in Western countries With its high growth rate the presence and impact of the Chinese economy will only become larger With China's importance on the global scale set to grow faster than ever shows a unique window to observe the changes that will chart the course of the future in this region of the world One of the keys to dealing with China is understanding the complex dynamic between rapid change and tradition

Impact of State Restructuring on Indonesia's Regional Economic Convergence Adiwan Fahlan

Aritenang,2017-03-09 The creation of the ASEAN Free Trade Area AFTA in 1992 and decentralization in 1999 mark the state restructuring in Indonesia This book analyses the impact of state restructuring on regional economic development in Indonesia between 1993 and 2010 Regional economic analysis shows persistent and severe regional disparities throughout the period Particularly econometrics study found that decentralization has accelerated regional disparities whilst the AFTA effect is insignificant on regional economic growth Furthermore historical institutionalism analysis on two cities the manufacturing industry in Batam and the creative economy in Bandung shows that past and embedded local institutions provide the capacity to adapt and create new development paths The book suggests the importance of local specific policies that embrace local knowledge and institutions to develop regional specialization and competitive advantage This book fills the gap in Indonesian literature that lacks studies on the integrated impact of decentralization and trade liberalization both economically and politically

Global Challenge and Local Response Walter B. Stöhr,1990 The volume grew out of research undertaken as a part of the UN University s European Perspectives Project It addresses the consequences of the failure of large scale industrial enterprise and the inability of central government policies to cope with the results of economic restructuring in a series of comparative case studies showing how local communities throughout Europe East and West rural and industrial have responded to economic dislocation and decline and how these local initiatives have become the basis for economic regeneration Annotation copyrighted by Book News Inc Portland OR

Predicting Technology: A Practical Guide For Technology Managers and Marketing Professionals To Identify Future Market Opportunities Thomas E. Vass ,2014-02-28 Part of the theory about predicting the direction of technology in this book builds upon work done by Clayton Christensen a professor of business at Harvard University Christensen has written many books about how multinational corporations are affected by a topic called disruptive technology

The Geography of Innovation M.P. Feldman,2013-06-29 This book offers a geographic dimension to the study of innovation and product commercialization Building on the literature in economics and geography this book demonstrates that product innovation clusters spatially in regions which provide concentrations of the knowledge needed for the commercialization process The book develops a conceptual model which links the location of new product innovations to the sources of these knowledge inputs The geographic concentration of this knowledge forms a technological infrastructure which promotes information transfers and lowers the risks and the costs of engaging in innovative activity Empirical estimation confirms that the location of product innovation is related to the underlying technological infrastructure and that the location of the knowledge inputs are mutually reinforcing in defining a region s competitive advantage The book concludes by considering the policy implications of these findings for both private

finns and state governments This work is intended for academics policy practitioners and students in the fields of innovation and technological change geography and regional science and economic development This work is part of a larger research effort to understand why the location of innovative activity varies spatially specifically the externalities and increasing returns which accrue to location xi Acknowledgements This work has benefitted greatly from discussions with friends and colleagues I wish to specifically note the contribution of Mark Kamlet Wes Cohen Richard Florida Zoltan Acs and David Audretsch I would like to thank Gail Cohen Shaivitz for her dedication in editing the final manuscript
