In the 1930s the Southern pioneered the first main line electrification and created the largest electrified suburban railway network in the world. It was also one of the few to offer regular departures and the first to run true international services introducing the Night Ferry through trains from London to Paris using special ferries. Forming part of a series along with The GWR Handbook, The LMS Handbook and The LNER Handbook, this new edition provides an authoritative and highly detailed reference of information about the Southern Railway.

A Regional History of the Railways of Great Britain: Vol 1 The West Country David St John Thomas, **Road Transport Before the Railways** Dorian Gerhold, 1993-02-26 This 1993 book examines the road haulage trade in England when it depended on horses and wagons chiefly through the letters and papers of one of the largest firms which operated between the West Country and London in the early nineteenth century. Other documents extend the coverage of the firm's history from the seventeenth century to the mid nineteenth century making it possible to examine how road transport changed during the course of two centuries. The Russell letters are all extraordinary and unique survival showing in detail how the firm managed to convey up to six tons at a time in all weathers how dominated it was by the capabilities and needs of the horse how reliable its services were who it served and how important it was to a variety of users. In sum the book provides a full account of the road haulage industry from the seventeenth century until the coming of the railways. The Branch Lines of Devon Exeter, South, Central & East Devon Colin Maggs, 2011-10-15 The first of two lavishly illustrated titles from acknowledged railway expert Colin G Maggs presenting the story of Devon's branch lines A Bibliography of British Railway History, 1965 *The GWR Bristol to Taunton Line* Colin Maggs, 2013-01-15 The story of a fascinating railway line.

When this book was originally published in 1963 this was becoming a topic of lively interest and controversy among archaeologists, historians, architects and engineers. This book discusses the aims and methods of the science giving examples of the contribution which different kinds of specialists can make. This shows a fascinating slice of the history of the discipline of archaeology as well as offering insights into industrial archaeology when the term was first being used. As the first text on the subject this book also led to the start of the industrial archaeology movement in the USA.
