Loewendahl, 2001-07-19 In Bargaining with

Multinationals Loewendahl scrutinises the relationship between multinational companies regional development and governments using an international political economy framework of bargaining between government and multinationals He critically analyses the role of foreign investment in economic development and examines how governments can link inward investment to regional economic development Based on extensive use of data interviews and case studies of Siemens and Nissan s UK investment the book shows why MNCs have invested in the UK in the past how they bargained with the government and what the impact was on the national and regional economies In particular through linking the strategy of multinationals to the location advantages of the UK it is argued that labour flexibility and incentives were crucial to investment decisions Loewendahl recommends a framework to integrate endogenous and exogenous approaches to developments and proposes a greater role for the region and the EU to control incentives and monitor multinationals
