Parapsychology Etzel Cardeña,John Palmer,David Marcusson-Clavertz,2015-08-14 Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events thinking of a long lost friend just before he or she unexpectedly calls or the ability to feel the presence of deceased loved ones What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists including Nobel laureates Most of these researchers have concluded that some of these phenomena do occur although we are far from explaining them

to everyone's satisfaction This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology explaining what we know and don't know about so called psi phenomena such as telepathy precognition or psychokinesis Contributors evaluate the evidence for these phenomena accounting for factors such as selective memory wish fulfillment and incorrect methods or analyses in some cases offering psychological physical and biological theories Instructors considering this book for use in a course may request an examination copy here **Spiritual Healing** Fraser Watts, 2011-01-06 There has recently been much interest in the relationship between science and religion and how they combine to give us a binocular perspective on things One important phenomenon which has been neglected in recent work is the concept of spiritual healing This edited collection explores a variety of approaches to spiritual healing from different religious points of view identifying both what it is and how it works The authors also explore the biological and psychological processes open to scientific enquiry through which healing may be mediated As such this book indicates the central proposition that religious and scientific perspectives answer different questions about healing and there is not necessarily any conflict between them *Good Clean Food* Samuel Epstein, Beth Leibson, 2013-06-01 Did you know that American milk and meat are banned in Europe because of the health risks they pose Or that one in three items on supermarket shelves contains genetically modified ingredients How about that forty pesticides in use today have been linked to certain types of cancer Between GMOs hormones and pesticides it sometimes feels like our food has become so artificial that shopping smart is impossible How can we know for sure that the food we buy isn't putting us at risk If you've got questions this practical positive guide has answers In it leading public health advocate Samuel Epstein MD and coauthor Beth Leibson provide all of the information you need to make the best food choices for you and your family in language you don't need a PhD in biology to understand You'll learn how to choose wisely when shopping for Beef Chicken Milk and dairy Eggs Soy Corn Snack foods Potatoes Lettuce Strawberries Grapes Baby food And much more Before your next trip to the supermarket make sure you read this helpful handbook and you'll be on your way to a lifetime of good clean food *The Star Gate Archives* Edwin C.
