Reimagining Social Welfare Beyond The Keynesian Welfare State:

Reimagining Social Welfare James P. Mulvale, 2001 Globalization and the rightward shift in politics in recent years have de legitimated and largely dismantled the Keynesian welfare state that developed in the thirty year period after World War II *Globalization Unplugged* Peter Urmetzer, 2005-01-01 The debate over economic globalization has reached a fever pitch in the past decade and a half with Western governments and multinational corporations trumpeting its virtues and a multitude of activists and developing world citizens vociferously denouncing it Both sides would agree that globalization is a recent development that is changing the way people and nations do business but in *Globalization Unplugged* Peter Urmetzer questions whether national economies are losing their sovereignty and whether the topic of globalization merits as much discussion as it receives Urmetzer s focus is specifically on Canada and he demonstrates that current levels of trade are not unprecedented and further that as the economy becomes more service oriented it will also become less trade dependent He points out that only a relatively small percentage of Canada s wealth is owned by foreign investors and likewise only a small portion of the country s wealth is located outside of its borders Disputing claims that the nation state is weakening or disappearing altogether Urmetzer shows how the welfare state side of government spending conveniently ignored in the anti globalization literature yet arguably the most significant development in the political economy of the nation state in the twentieth century remains remarkable stable Written with precision and skill *Globalization Unplugged* will spark controversy on both sides of the globalization debate and help deflate the rhetoric of both advocates and detractors

Redefining Productivity for Social Development and Well-being Gloria Rhea Geller, Fiona Douglas, 2007 The dominant market oriented definition of productivity excludes a wide range of human activities With that definition value is often given to activities that may be detrimental to the health and well being of the human population and the natural world Drawing upon a variety of disciplines the authors in this book seek to redefine productivity in terms of social development and well being raising questions about what is produced by whom and to what end and offering recommendations for effective social policy change **BOOK JACKET** *New Directions in Saskatchewan Public Policy* David McGrane, 2011 In this new scholarly compilation by David P McGrane established and emerging trends in Saskatchewan public policy are the foundation for setting new directions for the province in the 21st century In what direction should Saskatchewan be headed in the 21st century To answer this question academics from various disciplines at the University of Regina and University of Saskatchewan have come together to produce *New Directions in Saskatchewan Public Policy* the first edited book exclusively devoted to public policy in the province with chapters discussing taxation immigration agriculture urban affairs poverty reduction the social economy labour aging Aboriginal public administration and climate change The authors provide an analysis and description of the current policies of the Wall government and also look back to explore what the Romanow and Calvert governments did in these areas The overarching theme of the book is that despite the province s robust economic

growth significant public policy challenges remain for the Saskatchewan provincial government The lesson is that economic growth does not magically solve entrenched societal problems and that economic prosperity will dissipate if worrisome social trends are left unchecked While many scholarly books shy away from prescription the authors of this book include sections in their chapters that set out new directions for policy development As such the book not only contains solid analysis of the present policy situation but also offers concrete ideas for future policy makers *African Education and Globalization* Ali A.

Abdi, Korbla P. Puplampu, George Jerry Sefa Dei, 2006-01-01 Containing both theoretical discussions of globalization and specific case analyses of individual African countries this collection of essays examines the intersections of African education and globalization with multiple analytical and geographical emphases and intentions **At Risk** Karen Swift, Marilyn Callahan, 2009-01-01 In *At Risk* Karen J Swift and Marilyn Callahan examine risk and risk assessment in the context of professional practice in child protection social work and other human services They argue that the tools technologies and practices used to measure risk to the individual have gone unquestioned and unstudied and that current methods of risk assessment may be distorting the principles of social justice Central to this study is an examination of the everyday experiences of workers and parents engaged in risk assessment processes in Canadian child welfare investigations Going beyond theory Swift and Callahan highlight how risk evaluations play out in actual interactions with vulnerable people Pointing out that standardized risk assessment tools do not take factors such as class race gender and culture into account *At Risk* raises important questions about the viability of risk management plans that are not tailored to individual situations

Caputo, 2012-08-06 This exciting and timely collection brings together international and national scholars and advocates to provide historical overviews of efforts to pass basic income guarantee legislation in their respective countries and or across regions of the globe **Wealth by Stealth** Harry

Glasbeek, 2002-10-01 How is it that corporations are able to behave irresponsibly criminally and undemocratically *Wealth by Stealth* is a scathing introduction to the operations of the modern corporation written by a corporate lawyer Many writers point to the growth of undemocratic corporate power Glasbeek takes these observations further and outlines clearly how corporations become so powerful He also shows how they are able to act without regard to the behaviour and laws governing citizens and other groups Glasbeek is known by generations of students for his brilliant funny lectures at Osgoode Hall Law School With *Wealth by Stealth* his informative critique of corporate behaviour becomes available and accessible to all

Retooling the Mind Factory Alan Sears, 2003-01-01 Alan Sears examines education reform in relation to a broad process of cultural and economic change His book makes the case that education reform is one aspect of a broad ranging neo liberal agenda that aims to push the market deeper into every aspect of our lives by eliminating or shrinking non market alternatives The author begins by showing that advocates of education reform have had to make the case that the current system is not working This sets the ground for an examination of the so called Common Sense Revolution a claim that drastic change was

required to redesign government policies to fit a changing world Lean production methods are a crucial component of this changing world and broader social and cultural change is now required to consolidate the emerging order built on the spread of these methods Education reform is designed to recast the relations of citizenship contributing to the cultural and social change promoted through the social policy of the lean state **Canadian Books in Print.
