Public Sector Reform Jan-Erik Lane, 1997-12-12 Deregulation privatization and marketization have become the bywords for the reforms and debates surrounding the public sector This major book is unique in its comparative analysis of the reform experience in Western and Eastern Europe Australia New Zealand and Canada Leading experts identify a number of key factors to systematically explain the similarities and differences map common problems and together reflect on the future shape of the public sector exploring significant themes in a lively and accessible way *Changing Public Sector Values* Montgomery Van Wart, 2013-10-28 First Published in 1998 The single most important purpose of this book is to create a field of public administration values a field that currently does not exist in a recognizable form Surely values are discussed significantly and usefully by the fields of ethics management decision making and organization behavior and theory to mention only a few But these discussions are inevitably narrower in scope than is necessary for a true field of values Such a field is needed to help bridge the seeming chasm about discussions of values among the established fields A second purpose of this text is to provide a comprehensive treatment of values A third purpose of the text is to provide a balanced treatment giving all the major schools of thought roughly the same coverage so that their values can be compared as dispassionately as possible A fourth purpose of the book is to make the subject accessible to and interesting for practitioners and students
