*At the Crossroads of the Earth and the Sky* Gary Urton, 2013-12-18 Above Misminay the sky also is so divided by the alternation of the two axes of the Milky Way passing through the zenith This mirror image quadri partition of terrestrial and celestial spheres is such that a point within one of the quarters of the earth is related to a point within the corresponding celestial quarter The transition between the earth and the sky occurs at the horizon where sacred mountains are related to topographic and celestial features Based on fieldwork in Misminay Peru Gary Urton details a cosmology in which the Milky Way is central This is the first study that provides a description and analysis of the astronomical and cosmological system in a contemporary community in the Americas Separate chapters take up the sun the moon meteorological phenomena the stars and the planets Star to star constellations the animal dark cloud constellations that cut through the Milky Way and certain twilight and midnight zenith stars are analyzed in terms of their spatial and temporal integration within an indigenous cosmological framework Urton breaks new ground by demonstrating the indigenous merging of such forms of precise knowledge as astronomy meteorology agriculture and the correlation of astronomical and biological cycles within a single calendar system More than sixty diagrams clarify this Quechua system of astronomy and relate it to more familiar principles of Western astronomy and cosmology

Favela Resistance Timo Bartholl, Christos Filippidis, Antonis Vradis, Minhocas Urbanas, 2024-12-31 Food is at the heart of security peace and health But millions live without access to basic nutrition and billions live without control or understanding of where their food will come from and how it is produced Nowhere is this problem clearer than in the favelas of Rio de Janeiro Through meticulous research community engagement and direct action within the Mar region a cluster of seventeen favela communities in the northern zone of Rio Antonis Vradis Timo Bartholl and Christos Filippidis have created a shocking inspiring and revolutionary collection of essays that go beyond the question of food in the Brazilian urban periphery and highlights critical issues concerning state control pacification solidarity and grassroots organizing Favela Resistance is a lens through which we can understand how the state creates marginalized lives in cities throughout the world under the auspices of security and emergency support The link between food and public security is intertwined with decades long pacification operations in the favelas of Rio This fight for food sovereignty shows how local production structures and solidarity networks have radically rethought and reconfigured the relationship between cities and farms providing a map of how impoverished populations can organize resistance create health and community and fight literally from the ground up for a better world
