Relationships in Adolescence John C. Coleman,2022-12-29 Based on the study of a large number of young people ranging in age from eleven to seventeen *Relationships in Adolescence* originally published in 1974 proposes a new model of adolescent development described as the focal model which makes a valuable contribution to the greater understanding of adolescence for all who have contact with this age group The book contains an examination of three different approaches to adolescence an outline of the research project and a discussion of the empirical evidence concerning identity and self image heterosexual and parental relationships and large group situations Comparisons are made between age levels and between boys and girls with respect to the whole range of relationships and the evidence illustrates significant and at times dramatic differences between groups Of particular importance are some of the changes which occur with age such as the degree of conflict with parents and attitudes to sexuality Based on Dr Coleman s findings is his fresh focal model of adolescent development This model stresses the elements of growth and change in adolescence with special emphasis on the normal anxieties and conflicts that occur at different stages of the developmental period Today it can be read and enjoyed in its historical context

Relationships in Adolescence: Developmental Perspectives Shulman,W. Andrew Collins,1998-01-24 Although there is a sizeable literature on romantic relationships in the college years and adulthood limited research exists on romantic relationships in adolescence The extant work consists primarily of demographic studies of dating patterns and deals little with aspects such as the characteristics or development of adolescent romantic relationships Particularly lacking is a theoretical framework to guide research on romantic relationships during this developmental stage This volume offers both innovative research and compelling discussions on adolescent romantic relationships This is the 78th issue of the quarterly journal New Directions for Child Development **Adolescent Romantic Relationships as Precursors of Healthy Adult Marriages** Benjamin R. Karney,2007 Policymakers are interested in promoting healthy marriages in adulthood by providing services to strengthen the adolescent precursors of healthy marriage especially within low income populations But if programs and curricula targeting adolescent romantic relationships are to be effective they must be grounded in an accurate understanding of how adolescent relationships function and the role that they play in the development of healthy adult marriages This report evaluates the current landscape of theory research and interventions addressing the role of adolescent romantic relationships in the development of healthy adult marriages Drawing on a thorough review of the existing theoretical and empirical literature in this area as well as interviews with practitioners directly involved with developing or administering relationship education to adolescents the authors bring together relevant research and theory from a wide range of disciplines that have examined these issues and suggest future directions for research and intervention In particular they note that although research describing romantic relationships in low income populations is sparse there are already existing nationally representative data sets that include data from substantial numbers of well sampled low income adolescents Analyses of these data would have relatively low cost and a potentially high yield for informing policies that target low income youth *Friendship in Childhood and Adolescence* Phil Erwin,1998 Friendships are crucial to children s well being and happiness and lay important foundations upon which later relationships in adolescence and adulthood are built This overview of the nature and significance of children s peer relationships examines issues such as social cognitive

development the context of children s relationships relationship problems such as loneliness shyness and social isolation and methods of promoting positive relationships

Romantic Relationships and Sexuality in Adolescence and Young Adulthood Daphne van de Bongardt,Rongqin Yu,Maja Dekovic,Wim Meeus,2018-04-19 Romantic relationship formation and the engagement in sexual behaviors are normative and salient developmental tasks for adolescents and young adults These developmental tasks are increasingly viewed from an ecological perspective thus as strongly embedded in different social contexts including the proximal social domains of parents peers and partners This volume brings together seven recent empirical studies on adolescents and young adults romantic relationships and sexuality in the context of relationships with parents peers and partners In this editorial introduction we describe two important recent changes in the theoretical perspectives on emerging romantic relationships and sexual activity from risky behaviors to normative tasks and from individual to contextualized processes We then discuss recent advances in empirical research on romantic relationships and sexuality of adolescents and young adults After that we review the seven studies in this volume and discuss the contributions of these studies to the existing literature Finally we discuss directions for future research regarding how to further incorporate the interrelational perspective in empirical research on these topics and how to bridge the gap between the research fields on romantic relationships and sexuality This book was originally published as a special issue of the European Journal of Developmental Psychology

Adolescent Romantic Relations and Sexual Behavior Paul Florsheim,2003-07-18 Developmental and clinical researchers have only just discovered the phenomenon of adolescent romance as a topic of serious scientific inquiry This discovery may be related to the overwhelming evidence that adult romantic relationships are failing at alarming rates Dramatic increases in the rates of divorce out of wedlock childbirth and relationship violence lead to questions about the developmental precursors of romantic love and commitment What s wrong with love and can it be fixed This book brings together a diverse group of experts from various disciplines to address a serious gap in the understanding of adolescent development Part I focuses on romantic relations and sexual behavior from the perspective of normative adolescent development Part II centers on high risk adolescents and Part III explores the practical implications of current theory and research for clinicians educators and health administrators Together the chapters in this integrative and clinically useful book lay a foundation for understanding how adolescents successfully navigate the tumultuous waters of young love
