Ivanich, 2002 Stress seems to be an affliction common to almost everyone living in the

21st century except perhaps a few inhabitants of some far off islands untouched by modern society But what is it And more importantly what is there we can do about it Some research says we need it but this seems hard to believe Other research no less believable says we don't need it but we can manage it About the only thing about stress that seems certain is that there is a lot of it around and that the less of it that lands on a person the better This book gathers new and important citations from both the journal and the book literature and provides access through author subject and title indexes **Self-Directed Behavior** D.
