Relevance Lost The Rise And Fall Of Management Accounting:

Relevance Lost, 1991 **Relevance Lost** Harvard Business School Publishing, Harvard Business School Staff, 1991-03-01 Since its initial publication in 1987 *Relevance Lost* has gone through nine printings won two major awards from the accounting profession had a profound impact on how management accounting systems operate in the 1990s It has become a manifesto for managers in accounting control By exploring the evolution of management accounting in American business from the early textile mills to present day computer automated manufacturers Johnson Kaplan reveal why modern corporations must make major changes in the way they measure manage costs In a world of rapid technological change vigorous global domestic competition enormous information processing capabilities it is critical that managers receive information that is timely accurate relevant **Relevance Lost** H. Thomas Johnson, Robert S. Kaplan, 1987 Traces the history of the role of management accounting in business and argues that present management accounting systems have become obsolescent *Relevance Regained* H. Thomas Johnson, 2002-01-15 Building on his pathbreaking award winning bestseller *Relevance Lost* H Thomas Johnson presents a devastating critique of the top down hierarchical accounting systems that have dominated American corporations since the 1950s In *Relevance Regained* Johnson shows exactly how managing by remote control through results oriented accounting information has obstructed the real business objective to reduce process variation and lead times for the purpose of obtaining and keeping satisfied customers The failure of most American businesses to be competitive and profitable he contends is their reliance on management accounting information to control people s actions and productivity Cost focused imperatives from on high must be replaced Johnson asserts with information systems that link actions with imperatives of global competition Self managing work teams according to Johnson must own problem solving information to reduce variation delays and excess in processes Johnson prescribes the necessary changes in management principles that must replace the outdated style associated with the industrial revolution Responsiveness to customers not accounting costs and flexibility reducing lead times and removing constraints are necessary for sustained competitive excellence and long term profitability Johnson discusses the radical overhauls of companies such as General Electric s work outs best practices program and Harley Davidson s work simplification programs and shows how these strong commitments to new strategies maximize a company s most important assets people and time To be globally competitive he claims a company s work must be directed toward selling to customers not just selling products *Cost & Effect* Robert S. Kaplan, Robin Cooper, 1998 *Cost and Effect* is written for the general manager and explains activity based costing systems It focuses on creating integrated knowledge based systems that provide managers with meaningful information not just data **Relevance Lost** Robert S. Kaplan, Thomas H. JOHNSON, 1987 Management accounting is vital to long term planning However in today s climate of rapid technological change vigorous global domestic competition the enormous expansion of information processing capabilities current management accounting systems are inadequate outdated In *Relevance Lost* H

Thomas Johnson Robert S Kaplan both professors of management accounting combine their unique perspectives to describe the evolution of management accounting combine their unique perspectives to describe the evolution of management accounting in American business from the early textile mills to present day computer automated manufacturers As they say understanding the reasons behind the obsolescence of existing systems should provide improved rationale for organizational change Johnson Kaplan argue that the use of outdated accounting methods may have helped undermine American manufacturers efforts to adapt to the rapidly changing competitive environment of the 1980s When management accounting systems report highly inaccurate product costs provide misleading targets for productivity efficiency efforts America s large decentralized corporations become vulnerable to smaller more focused competitors Ineffective management accounting systems can prevent companies from achieving gains through vertical integration diversification Today new management accounting developments taking place in leading American manufacturing firms show promise of reversing this trend Relevance Lost cites numerous cases of forward looking companies that are accomplishing just that Johnson Kaplan masterfully persuasively illustrate the need for modern corporations to reexamine their existing practices to redesign new management accounting systems Tomorrow s leaders will be those companies who have the foresight to lead management accounting back to the path of relevance from which it strayed over sixty years ago
