Japan's Holy War Walter Skya, 2009-04-03 Japan's Holy War reveals how a radical religious ideology drove the Japanese to imperial expansion and global war Bringing to light a wealth of new information Walter A Skya demonstrates that whatever other motives the Japanese had for waging war in Asia and the Pacific for many the war was the fulfillment of a religious mandate In the early twentieth century a fervent nationalism developed within State Shint This ultranationalism gained widespread military and public support and led to rampant terrorism between 1921 and 1936 three serving and two former prime ministers were assassinated Shint ultranationalist societies fomented a discourse calling for the abolition of parliamentary government and unlimited Japanese expansion Skya documents a transformation in the ideology of State Shint in the late nineteenth century and the early twentieth He shows that within the religion support for the German inspired theory of constitutional monarchy that had underpinned the Meiji Constitution gave way to a theory of absolute monarchy advocated by the constitutional scholar Hozumi Yatsuka in the late 1890s That in turn was superseded by a totalitarian ideology centered on the emperor an ideology advanced by the political theorists Uesugi Shinkichi and Kakehi Katsuhiko in the 1910s and 1920s Examining the connections between various forms of Shint nationalism and the state Skya demonstrates that where the Meiji oligarchs had constructed a quasi religious quasi secular state Hozumi Yatsuka desired a traditional theocratic state Uesugi Shinkichi and Kakehi Katsuhiko went further encouraging radical militant forms of extreme religious nationalism Skya suggests that the creeping democracy and secularization of Japan's political order in the early twentieth century were the principal causes of the terrorism of the 1930s which ultimately led to a holy war against Western civilization

Civil Society, Religion, and the Nation ,2022-05-20 Japan
 Russia and Turkey are major examples of countries with different ethnic religious and cultural background that embarked on the path of modernization without having been colonized by a Western country In all three cases national consciousness has played a significant role in this context The project of Modernity is obviously of European origin but is it essentially European Does modernization imply loss of a country s cultural or national identity If so what is the fate of the modernization process in these cases The presence of the idea and reality of civil society can be considered a real marker of Modernity in this respect because it presupposes the development of liberalism individualism and human rights But are these compatible with nationalism and with the idea of a national religion These questions are the more pressing as Japan is considered part of the Western world in many respects and Russia and Turkey are defining their relation to the European Union in different ways An investigation of these three countries set off against more general reflections sheds light on the possibilities or limitations of modernization n a non European context

The "Greatest Problem" Trent E. Maxey,2020-05-18 At its inception in 1868 the modern Japanese state pursued policies and created institutions that lacked a coherent conception of religion Yet the architects of the modern state pursued an explicit religious settlement as they set about designing a constitutional order through the 1880s As a result many of the cardinal institutions of the state particularly the imperial institution eventually were defined in opposition to religion Drawing on an assortment of primary sources including internal government debates diplomatic negotiations and the popular press Trent E Maxey documents how the novel category of religion came to be seen as the greatest problem by the architects of the modern Japanese state In Meiji Japan religion designated a cognitive and social pluralism that resisted direct state control It also provided the modern state with a means to contain regulate and neutralize that plurality

Japanese Religions on the Internet Erica Baffelli,Ian Reader,Birgit Staemmler,2013-05-13 Japanese Religions on the Internet draws attention to how religion is being presented represented and discussed on the Japanese Internet Its intention is to contribute to wider discussions about religion and the Internet by providing an important example based on one of the

Internet's most prominent languages of how new media technologies are being used and are impacting on religion in the East Asian context while also developing further our understandings of religion in a technologically advanced country. Scholars studying the relationship of religion and the Internet can no longer work on prevailing notions that have thus far characterised the field such as the assumption that the Internet is a Western-centric phenomenon and that studies of English language sites relating to religion can provide a viable model for wider analyses of the topic. Despite this growing amount of research on religion and the Internet comparatively little has focused on non-Western cultures. The general field of study relating to religion and the Internet has paid scant attention to Asian contexts. The field needs a full-length and comprehensive study that focuses on the Japanese religious world and the Internet not merely to redress the imbalances of the field thus far but also because such studies will be central to the emerging field of the study of religion and the Internet in future. They will provide important means of developing new theories, constructing new paradigms and understanding the underlying dynamics of this new media form.

China Developing: Cultural Identity Of Emerging Societies George Fusun Ling, 2008-03-13. This book deals with the intellectual foundation of the sociopolitical, economic and legal systems of developing countries using a methodological approach. It calls for not only the need to search for a country's cultural identity but also a need to analyze the prevalent concepts important to a contemporary modern society such as the respect for an individual, human rights, freedom, equality, democracy and the universal respect for law. Based on the author's lifelong reflection on why some of these deeply treasured Western values and institutions have not been useful in developing democracy in Asia, it examines which values are applicable and which are not to Asian emerging societies. Using China's historical and contemporary attempts in modernization and development, the author suggests that all mighty rivers are confluences of multiple tributaries. Likewise, an emerging society has to recognize that the dynamism of its history would also be derived from a confluence of multiple cultural traditions. As a valuable resource for decision makers of developing countries, this book will help to shed some light on the potential pitfalls and fallacies they may encounter in their search for a cultural identity and values to subscribe to among the many that are circulating in our globalized world.
