Detecting and Investigating Environmental Crime Petter Gottschalk, 2021-05-31 This book discusses environmental crime and individual wrongdoing. It uses the theory of convenience throughout to examine financial motives, attractive opportunities, and personal willingness to explain deviant behavior. This book focusses primarily on the case study of the Island of Tj me in Norway, an attractive resort where building permits were repeatedly granted to rich people in a protected zone along the shoreline. This book investigates how these crimes were detected and investigated by police over a few years with the help of whistleblowers. It discusses the interplay between the potentially corrupt public officials, professionals like architects and attorneys, and rich individuals as an interesting and challenging arena for law enforcement. It covers attorneys' defense strategies, evaluates private internal policing, and provides insights for those investigating individuals involved in environmental crime. It also examines the Vest Tank toxic waste dumping case and the resulting explosion where unusually both the chairperson and the chief executive were successfully sentenced to prison because of environmental crime, unlike many other environmental crime cases where individuals avoid prison. The case studies are drawn from Norway to supplement more well-known case studies from the USA.

2029 Economic Crisis and Civil War in South Africa The Messenger, 2014-07-17 The book analyses the current problems in South Africa. Many people are seeing that unemployment and the plight of the masses will reach the point of no return. The gradual decline of the economy is due to various factors but is exacerbated by corruption and lack of responsibility and accountability. South Africa has reached a 50-year low in productivity due to affirmative action, BEE, and the perception of life owes me. The current war between management and labour for higher wages will continue. The threat of retrenchments will become a reality. All the gold mines will follow. The falling gold price predicts this. All of this leads to only one thing: our mutual enemy, unemployment.
