Andrew J. Huebner, 2018-02-01 Americans today harbor no strong or consistent collective memory of the First World War Ask why the country fought or what they accomplished and democracy is the most likely if vague response The circulation of confusing or lofty rationales for intervention began as soon as President Woodrow Wilson secured a war declaration in April 1917 Yet amid those shifting justifications Love and Death in the Great War argues was a more durable and resonant one Americans would fight for home and family Officials in the military and government grasping this crucial reality invested the war with personal meaning as did popular culture Make your mother proud of you And the Old Red White and Blue went George Cohan's famous tune Over There Federal officials and their allies in public culture in short told the war story as a love story Intervention came at a moment when arbiters of traditional home and family were regarded as under pressure from all sides industrial work women's employment immigration urban vice woman suffrage and the imagined threat of black sexual aggression Alleged German crimes in France and Belgium seemed to further imperil women and children War promised to restore convention stabilize gender roles and sharpen male character Love and Death in the Great War tracks such ideas of redemptive war across public and private spaces policy and implementation home and front popular culture and personal correspondence In beautifully rendered prose Andrew J Huebner merges untold stories of ordinary men and women with a history of wartime culture Studying the radiating impact of war alongside the management of public opinion he recovers the conflict's emotional dimensions its everyday rhythms heartbreaking losses soaring possibilities and broken promises *The First World War* William Kelleher Storey, 2020-12-07 In a compact but comprehensive and clear narrative this book explores the First World War from a genuinely global perspective Putting a human face on the war William Kelleher Storey takes into account individual decisions and experiences as well as environmental and technological factors such as food geography manpower and weapons **Military Executions during World War I** G. Oram, 2003-07-08 Three hundred and fifty one men were executed by British Army firing squads between September 1914 and November 1920 By far the greatest number were shot for desertion in the face of the enemy Controversial even at the time these executions of soldiers amid the horrors of the Western Front continue to haunt the history of war This book provides a critical analysis of military law in the British army and other major armies during the First World War with particular reference to the use of the death penalty This study establishes a full cultural and legal framework for military discipline and compares British military law with French and German military law It includes case studies of British troops on the Frontline Hitler's First War Thomas Weber, 2010-09-16 The story of Hitler's formative experiences as a soldier on the Western Front now told in full for the first time presenting a radical revision of Hitler's own account of this time in Mein Kampf **The Great War from the German Trenches** Artur H. Boer, 2016-09-16 Life in the trenches for German soldiers during World War I was every bit as hellish as it

was for Allied troops Arthur Boer survived almost four years of continual fighting on both the Eastern and Western fronts as a sapper combat engineer who found himself in the thick of major battles He laid barbed wire in no man s land under machine gun fire bet money on aerial combat above the trenches between Baron von Richthofen and the English faced starvation and crushing boredom His war diary describes all in gritty detail including the horror of gas warfare doomed vainglorious charges and his return home to a ruined Germany     *A History of the Second World War in 100 Maps* Jeremy Black,2020-11-18 The First World War was marked by an exceptional expansion in the use and production of military cartography But World War II took things even further employing maps charts reconnaissance and the systematic recording and processing of geographical and topographical information on an unprecedented scale As Jeremy Black one of the world s leading military and cartographic historians convincingly shows in this lavish full color book it is impossible to understand the events and outcomes of the Second World War without deep reference to mapping at all levels In World War II maps themselves became the weapons *A History of the Second World War in 100 Maps* traces how military cartography developed from simply recording and reflecting history to having a decisive impact on events of a global scale Drawing on one hundred key maps from the unparalleled collections of the British Library and other sources many of which have never been published in book form before Jeremy Black takes us from the prewar mapping programs undertaken by both Germany and the United Kingdom in the mid 1930s through the conflict s end a decade later Black shows how the development of maps led directly to the planning of the complex and fluid maneuvers that defined the European theater in World War II for example aerial reconnaissance photography allowed for the charting of beach gradients and ocean depths in the runup to the D Day landings and the subsequent troop movements at Normandy would have been impossible without the help of situation maps and photos In the course of the conflict both in Europe and the Pacific the realities of climate terrain and logistics recorded on maps overcame the Axis powers Maps also became propaganda tools as the pages of *Time* outlined the directions of the campaigns and the Allies dropped maps from their aircraft In this thrilling and unique book Jeremy Black blends his singular cartographic and military expertise into a captivating overview of World War II from the air sea and sky making clear how fundamental maps were to every aspect of this unforgettable global conflict     **Verdun and the Somme** Harro Grabolle,2004 Analysis of British and German prose fiction written between 1916 and 1937 with different ideological points of view Authors represented include from Germany Fritz von Unruh Josef M Wehner Werner Beumelburg Arnold Zweig and from Britain Alec J Dawson Alan P Herbert Arthur D Gristwood Frederic Manning and David Jones     *A Companion to World War I* John Horne,2012-01-30 *A Companion to the First World War* brings together an international team of distinguished historians who provide a series of original and thought provoking essays on one of the most devastating events in modern history Comprises 38 essays by leading scholars who analyze the current state of historical scholarship on the First World War Provides extensive coverage spanning the pre war period the military conflict social economic political and cultural

developments and the war's legacy Offers original perspectives on themes as diverse as strategy and tactics war crimes science and technology and the arts Selected as a 2011 Outstanding Academic Title by CHOICE The Pursuit of Victory Brian Bond, 1998 In Western Europe and North America the idea that war can deliberately be used as an instrument of policy has become unfashionable not least because of the carnage of two World Wars and the Americans humiliating experience in Vietnam But wars are still fought Those who start wars clearly believe they are worthwhile Why In this original and provocative study Brian Bond discusses the successes and failures of military and political leaders in their pursuit of victory over the last two centuries Professor Bond argues that in order to be counted victorious a leader has to progress beyond military triumph to preserve the political control needed to secure an advantageous and enduring peace settlement Napoleon was a brilliant general but failed as a statesman Bismarck on the other hand was a success in skilfully exploiting Moltke's victories on the battlefield to create a unified Germany In the First World War Germany and her allies were defeated but at such great cost that confidence in the idea that war could be controlled and the pursuit of victory made rational received a terrible shock Germany and Japan exploited their military opportunities between 1939 and 1942 but lack of political control and moderation brought them catastrophic defeat After 1945 nuclear weapons and the increased complexity of international relations blurred the identity of victors and losers and seemed to make the idea of a decisive victory almost unthinkable But this study warns against the assumption that war as an instrument of policy has now been completely discarded The Falklands and Gulf conflicts show that aggressors are still prepared to risk war for tangible goals and that their opponents are quite capable of responding successfully to such challenges **Landscapes of Culture and Nature** R.

Giblett, 2009-09-29 A bold and exciting exploration of the relationship and interactions between humans the human landscape and the earth looking at a diverse range of case studies from the nineteenth century city to the Asian tsunami and Hurricane Katrina **Massacre of the Innocents** Gavin Roynon, 2004-10-21 Approaching World War I as an adventure with the high spirits of many of his age and background Sir Morgan Crofton soon discovered the combination of terror and tedium afforded by static warfare in the machine gun age His diary describes the bewildering pace of technological change as new weapons like gas and hand grenades entered the fray **Ypres Diary 1914-15** Gavin Roynon, 2011-08-26 Sir Morgan Crofton fought in the Boer War and joined the 2nd Life Guards at 34 years old as a cavalry officer His diary charts his experiences on the front line at Ypres from late October 1914 to the centenary of Waterloo in June 1915 Crofton describes a battlefield a world away from what he and any of his comrades had experienced before one of staying still in trenches being pounded by artillery and the terrifying new power of machine guns He describes the bewildering pace of technological change as new weapons such as gas and hand grenades entered the fray His often ascerbic commentary offers a fascinating glimpse into the mindset of the regular officer class and his outspoken scepticism informs our understanding of a lost generation of professional soldiers *At War in Distant Waters* Phillip G Pattee, 2013-10-15 *At War in Distant Waters* investigates the reasons behind

Great Britain's combined military and naval offensive expeditions outside of Europe during the Great War Often regarded as unnecessary sideshows to the conflict waged on the European continent Pattee argues that the various campaigns were necessary adjuncts to the war in Europe and fulfilled an important strategic purpose by protecting British trade where it was most vulnerable Since international trade was essential for the island nation's way of life Great Britain required freedom of the seas to maintain its global trade While the German High Seas Fleet was a serious threat to the British coast forcing the Royal Navy to concentrate in home waters the importance of the island empire's global trade made it a valuable target to Germany's various commerce raiders just as Admiral Tirpitz's risk theory had anticipated **Books in Print Supplement**, 2002
