On Heidegger's Being and Time Simon Critchley, Reiner Schürmann, 2020-04-15 On Heidegger's Being and Time is an outstanding exploration of Heidegger's most important work by two major philosophers Simon Critchley argues that we must see Being and Time as a radicalization of Husserl's phenomenology particularly his theories of intentionality categorical intuition and the phenomenological concept of the a priori This leads to a reappraisal and defense of Heidegger's conception of phenomenology In contrast Reiner Schürmann urges us to read Heidegger backward arguing that his later work is the key to unravelling Being and Time Through a close reading of Being and Time Schürmann demonstrates that this work is ultimately aporetic because the notion of Being elaborated in his later work is already at play within it This is the first time that Schürmann's renowned lectures on Heidegger have been published The book concludes with Critchley's reinterpretation of the importance of authenticity in Being and Time Arguing for what he calls an originary inauthenticity Critchley proposes a relational understanding of the key concepts of the second part of Being and Time death

Human Existence Before God Dieudonné Mbiribindi Bahati, 2020-09-15 Doctoral Thesis Dissertation from the year 2019 in the subject Philosophy Miscellaneous grade 1 University of Innsbruck Christliche Philosophie language English abstract In our study we do not just demonstrate that the analysis of Dasein in the philosophical project of the first Heidegger was necessary and prior to the understanding of the question of the meaning of being but also we explained in the other section of our research that the philosophical project of the second Heidegger regarding the question of the meaning of being intended to demonstrate that there is a relationship between Dasein and God a relationship which connects the question of the meaning of being not just to the truth of being

through das Ereignis but also to the event of the poetic God in the light of the being Die Lichtung des Seins This new understanding of the development of the philosophy of Martin Heidegger offers a possibility to systematize the relationship between philosophy and theology in the thinking of Martin Heidegger On one hand we explained that no one can deny the theological origin of Martin Heidegger and his theological affiliations On the other hand we also showed how throughout his life Heidegger reacted against a theology that is too philosophically influenced and wanted to make clear that his thinking should be either theistic or atheistic and never both at the same time It has to be a discourse about God which is not the return to the old onto theology but it requires that one constructs a more poetic discourse about God and attempts to interpret the divine and the sacred not as God as such but as names that one uses to refer to God This poetic discourse however has some relevancies in a Christian tradition especially if one looks at the concept of revelation of the undescribed Last God which is close to the understanding of revelation in the Christian tradition The second part of our study tried to ask the question of being but in a new perspective according to the method of transcendental philosophy We have emphasized how indeed there is a link between the existential phenomenology of Martin Heidegger and the research in neo scholastic Joseph Mar chal J B Lotz K Rahner and Emerich Coreth Otto Muck all Jesuits Fathers thought about the question of being as the foundation of beings as the foundation of what is there It is a sort of a further development of the ontology of Heidegger in the perspective of Christian philosophy and theology

Eternal God/saving Time George Pattison, 2015 Starting from the assumption that time is the horizon of the meaning of Being Heidegger Eternal God Saving Time attempts to discover what the central religious idea of eternity or of God as the Eternal might mean today Negotiating ideas of divine timelessness and sempiternity everlastingness as well as the attempts of some philosophers to develop the idea of a temporal God Professor George Pattison surveys a range of positions from analytic philosophy and from the continental tradition from Spinoza through Hegel to the present Intellectual and cultural forces have tended to separate time and eternity and both philosophical and theological examples of this tendency are examined Nevertheless starting from the experience of life in time some modern thinkers have developed a new approach to the Eternal as what grounds or gives time This leads through ideas of novelty utopia hope promise and call to the projection of a creative and transformative memory remembering the future that affirms human solidarity and mutual responsibility Even if this cannot be made good in terms of knowledge it offers a basis for hope prayer and commitment and these options are explored through a range of Christian Jewish Greek and secular thinkers This development re envisages the idea of redemption away from the Augustinian view that time is what we need to be rescued from and towards the idea that time itself might save us from all that is destructive and tyrannical in time s rule over human life

German Philosophy Andrew Bowie, 2010-05-27 German philosophy remains the core of modern philosophy Without Kant Frege Wittgenstein and Husserl there would be no Anglo American analytical style of philosophy Moreover without Kant Hegel Marx Nietzsche and Heidegger the Continental Philosophy of Derrida Foucault Deleuze Badiou and Zizek which has had major effects on humanities subjects in recent years is incomprehensible Knowledge of German philosophy is then an indispensable prerequisite of theoretically informed study in the humanities as a whole German Philosophy A Very Short Introduction discusses the idea that German philosophy forms one of the most revealing responses to the problems of modernity The rise of the modern natural sciences and the related decline of religion raises a series of questions which recur throughout German philosophy concerning the relationships between knowledge and faith reason and emotion and scientific ethical and artistic ways of seeing the world There are also many significant philosophers who are generally neglected in most existing English language treatments of German philosophy which tend to concentrate on the canonical figures This Very Short Introduction will include reference to these thinkers and suggests how they can be used to question more familiar German philosophical thought ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Idealism after Existentialism N. N. Trakakis, 2023-03-01 A century ago the dominant philosophical outlook was not some form of materialism or naturalism but idealism However this way of thinking about reality fell out of favour in the Anglo American analytic tradition as well as the Continental schools of the twentieth century The aim of this book is to restage and reassess the encounter between idealism and contemporary philosophy The idealist side will be represented by the great figures of the 19th century post Kantian tradition in Germany from Fichte and Schelling to Hegel followed by the towering Hegelians in Britain led by T H Green F H Bradley and Bernard Bosanquet Their twentieth century adversaries will be represented by the secular existentialists especially the famous French

trio of Sartre Beauvoir and Camus who sought to follow Nietzsche in philosophizing in light of the death of God And the arena of encounter will be the philosophy of religion more specifically questions relating to the nature and existence of God death and the meaning of life and the problem of evil The book argues that the existentialist critique of idealism enables an innovative as well as a more critical and adventurous approach that is sorely needed in philosophy of religion today Idealism after Existentialism will be of interest to scholars and advanced students working in the history of nineteenth and twentieth century philosophy and philosophy of religion *Human Flourishing in a Technological World* Jens Zimmermann, 2023-09-21 Human Flourishing in a Technological World addresses fundamental questions about human identity and flourishing in the light of recent technological advances It includes the text of a lecture by virtual reality engineer and computer scientist Jaron Lanier and a discussion between Lanier and other contributors *A Phenomenological Ontology of Freedom* Dr. Ethar Al-Saraf, The free will debate has been an issue of serious and significant tension in the history of Western philosophy For Martin Heidegger and Jean Paul Sartre debate has been rendered intractable by a fundamental misunderstanding of the terms involved This is exacerbated they argue by a failure to identify and adopt an appropriate methodological approach to the problem In this respect and for both philosophers this error in the free will debate is symptomatic of a broader misunderstanding of philosophical enquiry as such and the method it necessitates For Heidegger the entire history of Analytic Western ontology has been fatally misconceived as a result of an effort to define the being of entities in static terms The insistence on framing questions in respect of whether what a being is thus obstructs any meaningful enquiry by conceding existence at the outset of the investigation He demands nothing less than the destruction of that framework as a necessary step towards a radical account of freedom as a necessary feature of human experience Sartre's project is founded on Heidegger's argument though he is critical of what he considers the ethical ambiguities inherent to Heidegger's account of Dasein Instead Sartre pushes the premises of Heidegger's project into a definitive claim about the nature of consciousness Therein he argues that as the only being for whom meaning is possible consciousness is distanced from beings by nothingness which ensures its ontological freedom We propose that a thorough investigation of their projects will reveal an account of ontological freedom that does not suffer from the shortcomings of Sartrean existentialism whilst avoiding the methodological missteps of the traditional discourse Moreover we will suggest that overcoming Heidegger's ambiguities can be achieved by advancing his concerns into an interrogation of the ground of Dasein and its ontological priority Thus we can satisfy Sartre's criticism while reinforcing the commitment to a radically different approach to philosophical enquiry Our investigation will argue that although Sartre has misconstrued Heidegger's work making comprehension of his freedom all the more complicated an argument persists which sheds new light on a seemingly stubborn philosophical problem In so doing a challenge will be presented to some of the fundamental premises of modern philosophical discourse promising to reorient the approach to enquiry as such *Being and Intelligibility* Albert Peter Pacelli, 2017-10-03 What do we mean when we say

that something is What is the meaning of human experience These two most elementary philosophical questions have perplexed thinkers for thousands of years Being and Intelligibility explores them from the simple premise that all entities are essentially logical in their being The book develops its three central theses that the beingness of beings called Being and the intelligibility of Being are one and the same that nothingness i e absolute not Being is self contradictory and unintelligible and therefore Being is logically necessary and that the fullness of human rational experience cannot be explained in materially reducible terms and requires recognition of the existence of transcendent reality which includes God as self grounding good will moral obligation and freedom and the souls of men Being and Intelligibility thoroughly investigates the implications of the essential logicity of Being including that human Being shows itself to itself from within itself as a substantive persistent morally obligated unity among the ordered manifold of its life experiences whose essential Being is orientation toward God

Virginia Woolf and Being-in-the-world Emma Simone, 2017-04-19 Breaking fresh ground in Woolfian scholarship this study presents a timely and compelling interpretation of Virginia Woolf s textual treatment of the relationship between self and world from the perspective of the philosophy of Martin Heidegger Drawing on Woolf s novels essays reviews letters diary entries short stories and memoirs the book explores the political and the ontological as the individual s connection to the world comes to be defined by an involvement and engagement that is always already situated within a particular physical societal and historical context Emma Simone argues that at the heart of what it means to be an individual making his or her way in the world the perspectives of Woolf and Heidegger are founded upon certain shared concerns including the sustained critique of Cartesian dualism particularly the resultant binary oppositions of subject and object and self and Other the understanding that the individual is a temporal being an emphasis upon intersubjective relations insofar as Being in the world is defined by Being with Others and a consistent emphasis upon average everydayness as both determinative and representative of the individual s relationship to and with the world
