True Sale Securitization in Germany and China Shengzhe Wang,2005-05-02 Inhaltsangabe Abstract The Master thesis for LL M at Goethe university s ILF titled True Sale Securitization in Germany and China is a comparative study about true sale securitization The initial reason for a comparative study was the similarity of banking centred financial systems in these two countries Another reason is connected with the True Sale Initiative TSI a plan composed by major German banks aiming at improving their financial situation German banks start to be plagued by the non performing loans NPLs since 2001 due to mediocre performance of German corporations and depreciation of banks investment to the east part during 1990s Facing the competitions from other countries and under pressures from the International Convergence of Capital Measurement and Capital Standards a Revised Framework Basel II issued by the Basel Committee on Banking and Supervisory Practice Basel Committee at the Bank for International Settlements the German banks employed the TSI as one part of the bigger financial reform to regain competition in Europe and worldwide December 2004 the first true sale securitization was successfully constructed in Germany after German federal government changed some of its formerly unfriendly legal taxation and

accounting rules The German experiences with TSI can shed some light into how China to develop its asset backed securities ABS market in order to save its heavy NPLs burdened banks and find alternative funds for its corporations Although securitization might be a possible solution the Chinese current legal system and market infrastructure prevents it from fully utilizing this modern financing technique What China can learn from Germany's experiences is that a special securitization law is preferred to amending each relevant laws and rules in order to get rid of legal barriers and contradictions for true sale securitizations In addition strong governmental supports will facilitate and accelerate the process of true sale securitization market development The similarities between the German and Chinese financial system is the main incentive for this study Both Germany and China have a financial system that is dominated by banks and at the same time features a weak capital market Banks are the main external financing sources for domestic corporations Furthermore in both countries banks are suffering losses and carrying burden of non performing loans NPLs due to the bad Islamic Capital Markets and Products Simon Archer, Rifaat Ahmed Abdel Karim, 2017-12-26 Ensure Basel III compliance with expert analysis specific to Islamic Finance Islamic Capital Markets and Products provides a thorough examination of Islamic capital markets ICM with particular attention to the products that they offer and the legal and regulatory infrastructure within which they operate Since Islamic banks act as asset managers attention is paid to the regulatory challenges which they face in the light of Basel III as regards both eligible capital and liquidity risk management The authors of the chapters are professionals and practitioners and write from experience The editors also contributed to some of the chapters The markets and products covered include Islamic equities Islamic investment certificates Suk k which are Shari ah compliant alternatives to conventional bonds and Islamic Collective Investment Schemes The coverage of legal and regulatory issues includes an examination of the implications for ICM of securities laws and regulations and of Basel III as well as collateralisation issues Shari ah compliance aspects in terms both of the selection criteria for Islamic equities and of the purification of impermissible components of income are also examined in some detail as are the implications of Basel III for eligible capital in general and for Shari ah compliant capital instruments in particular A similar analysis is also made of the implications of the Basel III requirements for liquidity risk management and high quality liquid assets HQLA including Shari ah compliant HQLA The book concludes with three case studies two describing the ICM in Malaysia and Bahrain and a third which describes Suk k issued as Shari ah compliant capital instruments followed by brief concluding remarks by the editors
