AI in Multidimensional Signals Analysis and Processing Lakhmi C. Jain, Roumiana Kountcheva, Yingkai Liu, 2025-09-26
This book presents high quality research in the field of 3D imaging technology The sixth edition of International Conference on 3D Imaging Technology 3DDIT MSP DL 2024 continues the good traditions already established by the first five editions of the conference to provide a wide scientific forum for researchers academia and practitioners to exchange newest ideas and recent achievements in all aspects of image processing and analysis together with their contemporary applications The conference proceedings are published in two volumes The main topics of the papers comprise famous trends as 3D image representation 3D image technology 3D images and graphics and computing and 3D information technology In these proceedings special attention is paid at the 3D tensor image representation the 3D content generation technologies big data analysis and deep learning artificial intelligence the 3D image analysis and video understanding the 3D virtual and augmented reality and many related areas The first volume contains papers in 3D image processing transforms and technologies The second volume is about computing and information technologies computer images and graphics and related applications The two volumes of the book cover a wide area of the aspects of the contemporary multidimensional imaging and the related future trends from data acquisition to real world applications based on various techniques and theoretical approaches Advanced Intelligent Computing Technology and Applications De-Shuang Huang, Prashan Premaratne, Baohua Jin, Boyang Qu, Kang-Hyun Jo, Abir Hussain, 2023-07-30 This three volume set of LNCS 14086 LNCS 14087 and LNCS 14088 constitutes in conjunction with the double volume set LNAI 14089 14090 the refereed proceedings of the 19th International Conference on Intelligent Computing ICIC 2023 held in Zhengzhou China in August 2023 The 337 full papers of the three proceedings volumes were carefully reviewed and selected from 828 submissions This year the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications Therefore the theme for this conference was Advanced Intelligent Computing Technology and Applications Papers that focused on this theme were solicited addressing theories methodologies and applications in science and technology **On the Move to Meaningful Internet Systems: OTM 2008** Zahir Tari, 2008-11-07 This two volume set LNCS 5331 5332 constitutes the refereed proceedings of the five confederated international conferences on Cooperative Information Systems CoopIS 2008 Distributed Objects and Applications DOA 2008 Grid computing high performance and Distributed Applications GADA 2008 Information Security IS 2008 and Ontologies Databases and Applications of Semantics ODBASE 2008 held as OTM 2008 in Monterrey Mexico in November 2008 The 86 revised full and 9 revised short papers presented together with 5 invited papers and 4 keynote talks were carefully reviewed and selected from a total of 292 submissions Corresponding to the five OTM 2008 main conferences

CoopIS DOA GADA IS and ODBASE the papers are organized in topical sections on Web service business process technology E service management distributed process management schema matching business process tracing workflow and business applications designing distributed systems context in distributed systems high availability adaptive distributed systems scheduling allocation databases in grids grid applications data management and storage new tendencies and approaches intrusion detection information hiding data and risk management access control evaluation and implementation semantic matching and similarity measuring semantic searching ontology development ontology maintenance and evaluation ontology applications and semantic query processing

A-Z of Digital Research Methods Catherine Dawson, 2019-07-10 This accessible alphabetical guide provides concise insights into a variety of digital research methods incorporating introductory knowledge with practical application and further research implications A Z of Digital Research Methods provides a pathway through the often confusing digital research landscape while also addressing theoretical ethical and legal issues that may accompany each methodology Dawson outlines 60 chapters on a wide range of qualitative and quantitative digital research methods including textual numerical geographical and audio visual methods This book includes reflection questions useful resources and key texts to encourage readers to fully engage with the methods and build a competent understanding of the benefits disadvantages and appropriate usages of each method A Z of Digital Research Methods is the perfect introduction for any student or researcher interested in digital research methods for social and computer sciences

Digital Forensics and Cyber Crime Sanjay Goel, Paulo Roberto Nunes de Souza, 2024-04-02 The two volume set LNICST 570 and 571

constitutes the refereed post conference proceedings of the 14th EAI International Conference on Digital Forensics and Cyber Crime ICDF2C 2023 held in New York City NY USA during November 30 2023 The 41 revised full papers presented in these proceedings were carefully reviewed and selected from 105 submissions The papers are organized in the following topical sections Volume I Crime profile analysis and Fact checking Information hiding and Machine learning Volume II Password Authentication and Cryptography Vulnerabilities and Cybersecurity and forensics

Digital Audio Forensics Fundamentals James Zjalic, 2020-10-29 Digital Audio Forensics Fundamentals offers an accessible introduction to both the theory and practical skills behind this emerging field of forensic science Beginning with an overview of the history of the discipline the reader is guided through forensic principles and key audio concepts before being introduced to practical areas such as audio enhancement audio authentication and the presentation of reports Covering all aspects of audio forensics from the capture to the courtroom this book is pivotal reading for beginners entering the field as well as experienced professionals looking to develop their knowledge of the practice

Secure Voice Processing Systems against Malicious Voice Attacks Kun Sun, Shu Wang, 2023-10-30 This book provides readers with the basic understanding regarding the threats to the voice processing systems the state of the art defense methods as well as the current research results on securing voice processing systems It also introduces three mechanisms to secure the voice processing systems against malicious voice attacks under

different scenarios by utilizing time domain signal waves frequency domain spectrum features and acoustic physical attributes First the authors uncover the modulated replay attack which uses an inverse filter to compensate for the spectrum distortion caused by the replay attacks to bypass the existing spectrum based defenses The authors also provide an effective defense method that utilizes both the time domain artifacts and frequency domain distortion to detect the modulated replay attacks Second the book introduces a secure automatic speech recognition system for driverless car to defeat adversarial voice command attacks launched from car loudspeakers smartphones and passengers Third it provides an acoustic compensation system design to reduce the effects from the spectrum reduction attacks by the audio spectrum compensation and acoustic propagation principle Finally the authors conclude with their research effort on defeating the malicious voice attacks and provide insights into more secure voice processing systems This book is intended for security researchers computer scientists and electrical engineers who are interested in the research areas of biometrics speech signal processing IoT security and audio security Advanced level students who are studying these topics will benefit from this book as well

Advances in Intelligent Information Hiding and Multimedia Signal Processing Jeng-Shyang Pan,Pei-Wei Tsai,Junzo Watada,Lakhmi C. Jain,2017-07-15 This volume includes papers presented at IIH MSP 2017 the 13th International Conference on Intelligent Information Hiding and Multimedia Signal Processing held from 12 to 15 August 2017 in Matsue Shimane Japan The conference addresses topics ranging from information hiding and security and multimedia signal processing and networking to bio inspired multimedia technologies and systems This volume of Smart Innovation Systems and Technologies focuses on subjects related to massive image video compression and transmission for emerging networks advances in speech and language processing information hiding and signal processing for audio and speech signals intelligent distribution systems and applications recent advances in security and privacy for multimodal network environments multimedia signal processing and machine learning Updated with the latest research outcomes and findings the papers presented appeal to researchers and students who are interested in the corresponding fields Handbook of Digital Forensics of Multimedia Data and Devices, Enhanced E-Book Anthony T. S. Ho,Shujun Li,2016-05-20 Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever more apparent Digital forensics involves investigating computer systems and digital artefacts in general while multimedia forensics is a sub topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices such as digital cameras This book focuses on the interface between digital forensics and multimedia forensics bringing two closely related fields of forensic expertise together to identify and understand the current state of the art in digital forensic investigation Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as

forensic authentication forensic triage forensic photogrammetry biometric forensics multimedia device identification and image forgery detection among many others Key features Brings digital and multimedia forensics together with contributions from academia law enforcement and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices Offers not only explanations of techniques but also real world and simulated case studies to illustrate how digital and multimedia forensics techniques work Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides test datasets and more case studies *Intelligent Technologies* Himansu Das,Chittaranjan Pradhan,Surbhi Bhatia Khan,Kuan Ching Li,2025-08-04 This book discusses automated computing systems which are mostly powered by intelligent technologies like artificial intelligence machine learning image recognition speech processing cloud computing etc to perform complex automated tasks which are not possible by traditional computing systems The chapters are extended version of research works presented at third PhD Research Symposium in various advanced technologies used in the field of computer science This book provides an opportunity for the researchers to get ideas regarding the ongoing works that help them in formulating problems of their interest The academicians can also be benefited to know about the current research trends that smooth the way to guide their students to carry out research work in the proper direction The industry people will be also facilitated to know about the current advances in research work and materialize the research work into industrial applications

MultiMedia Modeling Xiangjian He,Suhuai Luo,Dacheng Tao,Changsheng Xu,Jie Yang,Muhammad Abul Hasan,2014-12-22 The two volume set LNCS 8935 and 8936 constitutes the thoroughly refereed proceedings of the 21st International Conference on Multimedia Modeling MMM 2015 held in Sydney Australia in January 2015 The 49 revised regular papers 24 poster presentations were carefully reviewed and selected from 189 submissions For the three special session a total of 18 papers were accepted for MMM 2015 The three special sessions are Personal Big Data Modeling for Information Access and Retrieval Social Geo Media Analytics and Retrieval and Image or video processing semantic analysis and understanding In addition 9 demonstrations and 9 video showcase papers were accepted for MMM 2015 The accepted contributions included in these two volumes represent the state of the art in multimedia modeling research and cover a diverse range of topics including Image and Video Processing Multimedia encoding and streaming applications of multimedia modelling and 3D and augmented reality Multimedia Technologies: Concepts, Methodologies, Tools, and Applications Syed, Mahbubur Rahman,2008-06-30 This book offers an in depth explanation of multimedia technologies within their many specific application areas as well as presenting developing trends for the future Provided by publisher **Data Labeling in Machine Learning with Python** Vijaya Kumar Suda,2024-01-31 Take your data preparation machine learning and GenAI skills to the next level by learning a range of Python algorithms and tools for data labeling Key Features Generate labels for

regression in scenarios with limited training data Apply generative AI and large language models LLMs to explore and label text data Leverage Python libraries for image video and audio data analysis and data labeling Purchase of the print or Kindle book includes a free PDF eBook Book Description Data labeling is the invisible hand that guides the power of artificial intelligence and machine learning In today's data driven world mastering data labeling is not just an advantage it's a necessity Data Labeling in Machine Learning with Python empowers you to unearth value from raw data create intelligent systems and influence the course of technological evolution With this book you'll discover the art of employing summary statistics weak supervision programmatic rules and heuristics to assign labels to unlabeled training data programmatically As you progress you'll be able to enhance your datasets by mastering the intricacies of semi supervised learning and data augmentation Venturing further into the data landscape you'll immerse yourself in the annotation of image video and audio data harnessing the power of Python libraries such as seaborn matplotlib cv2 librosa openai and langchain With hands on guidance and practical examples you'll gain proficiency in annotating diverse data types effectively By the end of this book you'll have the practical expertise to programmatically label diverse data types and enhance datasets unlocking the full potential of your data What you will learn Excel in exploratory data analysis EDA for tabular text audio video and image data Understand how to use Python libraries to apply rules to label raw data Discover data augmentation techniques for adding classification labels Leverage K means clustering to classify unsupervised data Explore how hybrid supervised learning is applied to add labels for classification Master text data classification with generative AI Detect objects and classify images with OpenCV and YOLO Uncover a range of techniques and resources for data annotation Who this book is for This book is for machine learning engineers data scientists and data engineers who want to learn data labeling methods and algorithms for model training Data enthusiasts and Python developers will be able to use this book to learn data exploration and annotation using Python libraries Basic Python knowledge is beneficial but not necessary to get started Real-time and Autonomous Systems 2022 Herwig Unger, Marcel Schaible, 2023-05-16 This book contains the results of the researchers presented at this conference which is supported by German Society of informatics GI and other organisations Real Time Systems Expert Committees The 43rd Real Time Systems conference on Automation in Everyday Life is addressing an increasingly important topic in a world that is becoming more and more networked The solutions presented here range from hardware to system design to individual applications The target audience is students and researchers in computer science and automation technology partly electrical engineering engineers programmers and users of automation and communication systems *AI-enabled Technologies for Autonomous and Connected Vehicles* Yi Lu Murphey, Ilya Kolmanovsky, Paul Watta, 2022-09-07 This book reports on cutting edge research and advances in the field of intelligent vehicle systems It presents a broad range of AI enabled technologies with a focus on automated autonomous and connected vehicle systems It covers advanced machine learning technologies including deep and reinforcement learning algorithms transfer learning and

learning from big data as well as control theory applied to mobility and vehicle systems Furthermore it reports on cutting edge technologies for environmental perception and vehicle to everything V2X discussing socioeconomic and environmental implications and aspects related to human factors and energy efficiency alike of automated mobility Gathering chapters written by renowned researchers and professionals this book offers a good balance of theoretical and practical knowledge It provides researchers practitioners and policy makers with a comprehensive and timely guide on the field of autonomous driving technologies

Tele-Audiology and the Optimization of Hearing Healthcare Delivery Saunders, Elaine, 2019-01-18 Tele audiology a blanket term for digital health solutions in audiology and auditory rehabilitation including education and training has recently been gaining pace partly driven by commercial developments in remote otoscopy remote audiometry and hearing aids that can be adjusted by a remote professional Due to these advances clinicians have the potential to expand their practices and better serve patients in rural areas However audiologists are reluctant to use tele audiology

Tele Audiology and the Optimization of Hearing Healthcare Delivery is a collection of innovative research on the methods and applications of technologies that advance audiology and auditory rehabilitation and allows healthcare providers to offer hearing healthcare at a distance and in a manner that provides appropriate outcomes and reduces delivery costs This publication examines research findings from real world experience of tele audiology and covers topics including eHealth security management and internet interventions It is ideally designed for audiologists speech pathologists care providers medical professionals academicians and researchers

Digital Forensics and Forensic Investigations: Breakthroughs in Research and Practice Management Association, Information Resources, 2020-04-03 As computer and internet technologies continue to advance at a fast pace the rate of cybercrimes is increasing Crimes employing mobile devices data embedding mining systems computers network communications or any malware impose a huge threat to data security while cyberbullying cyberstalking child pornography and trafficking crimes are made easier through the anonymity of the internet New developments in digital forensics tools and an understanding of current criminal activities can greatly assist in minimizing attacks on individuals organizations and society as a whole

Digital Forensics and Forensic Investigations Breakthroughs in Research and Practice addresses current challenges and issues emerging in cyber forensics and new investigative tools and methods that can be adopted and implemented to address these issues and counter security breaches within various organizations It also examines a variety of topics such as advanced techniques for forensic developments in computer and communication link environments and legal perspectives including procedures for cyber investigations standards and policies Highlighting a range of topics such as cybercrime threat detection and forensic science this publication is an ideal reference source for security analysts law enforcement lawmakers government officials IT professionals researchers practitioners academicians and students currently investigating the up and coming aspects surrounding network security computer science and security engineering

Manual of Romance Forensic Linguistics

Victoria Guillén-Nieto,Dieter Stein,2025-06-02 It is evident that published serious science based work in Forensic Linguistics is predominantly written in English and focuses on casework from the English speaking world While the first aspect is understandable given that English serves as an international lingua franca in scientific discourse the second aspect presents a significant limitation for the field Should researchers assume that there is simply less crime in non English speaking areas of the world A more pertinent question might be What cultural disciplinary legal or legal cultural factors contribute to the lack of research in and on languages other than English In addition to addressing the underrepresentation of Romance languages in scientific publications related to forensic work the chapters in this handbook will also explore the reasons behind this unfortunate situation Designed to engage readers whether they are linguists legal professionals or simply interested individuals and to spark interest in Romance Forensic Linguistics this handbook follows three key objectives First we are committed to providing a comprehensive overview of the casework and research conducted in and on several Romance languages including Peninsular Spanish Catalan Brazilian Portuguese French Canadian French Italian and Romanian Second the chapters in this volume seek to understand why Forensic Linguistics has thrived more in some Romance speaking countries than in others Finally we aim to uncover the reasons for the slower development of Forensic Linguistics in regions where Romance languages are predominantly spoken **PC Mag** ,1997-10-21 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology ABA Journal ,1981-12 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association
