Seeing And Believing How The Telescope Opened Our Eyes And Minds To The Heavens:

Seeing and Believing Richard Panek,1999 Tells the story visionary by visionary and discovery by discovery of the telescope one of the few inventions that have revolutionized our view of the universe and how we fit into it Thomas Hardy's Novel Universe Pamela Gossin,2017-03-02 In this the first book length study of astronomy in Hardy s writing historian of science and literary scholar Pamela Gossin brings the analytical tools of both disciplines to bear as she offers unexpected and sophisticated readings of seven novels that enrich Darwinian and feminist perspectives on his work extend formalist evaluations of his achievement as a writer and provide fresh interpretations of enigmatic passages and scenes In an elegantly crafted introduction Gossin draws together the shared critical values and methods of literary studies and the history of science to articulate a hybrid model of scholarly interpretation and analysis that promotes cross disciplinary compassion and understanding within the current contention of the science culture wars She then situates Hardy s own deeply interdisciplinary knowledge of astronomy and cosmology within both literary and scientific traditions from the ancient world through the Victorian era Gossin offers insightful new assessments of A Pair of Blue Eyes Far from the Madding Crowd The Return of the Native Two on a Tower The Woodlanders Tess of the D Urbervilles and Jude the Obscure arguing that Hardy s personal synthesis of ancient and modern astronomy with mythopoetic and scientific cosmologies enabled him to write as a literary cosmologist for the post Darwinian world The profound new myths that comprise Hardy s novel universe can be read as a sustained set of literary thought experiments by which he critiques the possibilities limitations and dangers of living out the storylines that such imaginative cosmologies project for his time and ours The Marvelous Clouds John Durham Peters,2015-06-19 An ambitious re writing a re synthesis even of concepts of media and culture It is nothing less than an attempt at a history of Being Los Angeles Review of Books When we speak of clouds these days it is as likely that we mean data clouds or network clouds as cumulus or stratus In their sharing of the term both kinds of clouds reveal an essential truth that the natural world and the technological world are not so distinct In The Marvelous Clouds John Durham Peters argues that though we often think of media as environments the reverse is just as true environments are media Peters defines media expansively as elements that compose the human world Drawing from ideas implicit in media philosophy Peters argues that media are more than carriers of messages they are the very infrastructures combining nature and culture that allow human life to thrive Through an encyclopedic array of examples from the oceans to the skies The Marvelous Clouds reveals the long prehistory of so called new media Digital media Peters argues are an extension of early practices tied to the establishment of civilization such as mastering fire building calendars reading the stars creating language and establishing religions New media do not take us into uncharted waters but rather confront us with the deepest and oldest questions of society and ecology how to manage the relations people have with themselves others and the natural world A wide ranging meditation on the many means we have employed to cope with the struggles of existence from navigation to

farming meteorology to Google The Marvelous Clouds shows how media lie at the very heart of our interactions with the world around us

The Movement of Stars Amy Brill, 2013-04-18 Gorgeous Sings with insights about love work and how we create our own families Oprah com Amy Brill shines in her sparkling debut novel Vanity Fair Brill s rich detail and research are hugely impressive it s easy to envision the scenes she sees USA Today Beautifully written and richly characterized Kirkus starred review A terrifically poised and captivating debut Paula McLain author of The Paris Wife A love story set in 1845 Nantucket between a female astronomer and the unusual man who understands her dreams It is 1845 and Hannah Gardner Price has lived all twenty four years of her life according to the principles of the Nantucket Quaker community in which she was raised where simplicity and restraint are valued above all and a woman s path is expected to lead to marriage and motherhood But up on the rooftop each night Hannah pursues a very different and elusive goal discovering a comet and thereby winning a gold medal awarded by the King of Denmark something unheard of for a woman And then she meets Isaac Martin a young dark skinned whaler from the Azores who like herself has ambitions beyond his expected station in life Drawn to his intellectual curiosity and honest manner Hannah agrees to take Isaac on as a student But when their shared interest in the stars develops into something deeper Hannah s standing in the community begins to unravel challenging her most fundamental beliefs about work and love and ultimately changing the course of her life forever Inspired by the work of Maria Mitchell the first professional female astronomer in America The Movement of Stars is a richly drawn portrait of desire and ambition in the face of adversity

The Making of the Fittest: DNA and the Ultimate Forensic Record of Evolution Sean B. Carroll, 2007-09-17 DNA evidence not only solves crimes in Sean Carroll s hands it will now end the Evolution Wars DNA the genetic blueprint of all creatures is a stunningly rich and detailed record of evolution Every change or new trait from the gaudy colors of tropical birds to our color vision with which we admire them is due to changes in DNA that leave a record and can be traced Just as importantly the DNA evidence has revealed several profound surprises about how evolution actually works

Included are an appendix of entries listed by scientific field, a glossary of terms indexed by name and subject.

Pillars of Creation Richard Panek, 2024-10-22 The James Webb Space Telescope is transforming the universe right before our eyes and here for the first time is the inside account of how the mission originated, how it performs its miracles of science, and what its revolutionary images are revealing. Pillars of Creation tells the story of one of the greatest scientific achievements in the history of civilization: a 10 billion instrument with a staggeringly ambitious goal: unlocking the secrets of the cosmos. Award-winning science writer Richard Panek stands us shoulder to shoulder with senior scientists as they conceive the mission, meet decades-long challenges to bring it to fruition, and now use its unprecedented technology to yield new discoveries about the origins of our solar system, to search for life on planets around other suns, and to trace the growth of hundreds of billions of galaxies all the way back to the birth of the first stars. The Webb telescope has captured the world's imagination, and Pillars of Creation shows how and why, including through sixteen pages of awe-inspiring full-color photos. At once a testament to human ingenuity and a celebration of mankind's biggest leap yet into the cosmos, Panek's eye-opening book reveals our universe as we've never seen it before through the lens of the James Webb Space Telescope, a marvel that is itself a pillar of creation.

The Autistic Brain Temple Grandin, Richard Panek, 2013 Weaving her own experience with remarkable new discoveries, Grandin introduces the neuroimaging advances and genetic research that link brain science to behavior, even sharing her own brain scans from numerous studies. Readers meet the scientists and self-advocates who are introducing innovative theories of what causes autism, how it is diagnosed, and how best to treat autism.

Dimensions of Faith Steve Donaldson, 2015-12-31 In *Dimensions of Faith*, cognitive scientist Steve Donaldson takes readers on a journey from the world of assumptions, set minds, widely varying beliefs, and popular misconceptions to an understanding of the true essence and role of faith as the natural and inevitable product of brains. Using numerous illustrations and examples, Donaldson shows how faith is necessitated by a variety of unavoidable limitations, exposes the myth of a divide between faith and critical thinking, provides practical advice for crafting coherent beliefs, and explains why there can never be such a place as Factland. Along the way, he takes a special look at religious faith, evaluating its attributes, exploring its relation to other manifestations of faith, investigating whether God has done his job well enough to warrant the faith placed in him, and pondering how truth-seekers can sometimes end up in very different places.
