## **Selected Antitrust Cases Landmark Decisions:**

Selected Antitrust Cases Irwin M. Stelzer, 1955      *Selected Antitrust Cases* Irwin M. Stelzer, Howard P. Kitt, 1986  
Explains with interesting concrete problems the manner in which economic theory is reflected in antitrust policy The leading decisions covered here have been edited to manageable proportions but retain the original language of the court Only those cases are given that truly represent landmark opinions The author explains the law as it stands now and provides information on the historical development of the attitude of the courts on the various legal economic issues In addition the author also includes dissenting opinions in order to provide a better understanding of the inherent complexities of the economic issues faced by the courts ISBN 0 256 03222 X 18 95      **Selected Antitrust Cases**, 1966      Selected Antitrust Cases Irwin M. Stelzer, 1966      Selected Antitrust Cases Irwin M. Stelzer, 1972      **The Antitrust Division of the Department of Justice** Theodore P. Kovaleff, 2016-09-16 Analyzes the newly available statistical evidence on income distribution in the former Soviet Union both by social group and by republic and considers the significance of inequalities as a factor contributing to the demise of the Communist regime      Extraterritorial Antitrust James B Townsend, 2019-04-18 This book the first unbiased investigation of the effects of extraterritorial antitrust on U S business abroad examines the influence of the Sherman Antitrust Act on the market entry strategy of U S multinational corporations and assesses the interaction of public interest and the law      **Hearings, Reports and Prints of the Senate Committee on Interior and Insular Affairs** United States. **How Cartels Endure and how They Fail** Peter Z. Grossman, 2004-01-01 Why do some cartels fail and others succeed This question has intrigued economists for a hundred years and they have created an extensive body of theory to help explain cartel behaviour This book looks at the experience of actual cartels and challenges their portrayal as found in the existing literature The eleven chapters by leading researchers of industrial organization study real examples of industrial collusion

The authors investigate the formation behaviour activity and purpose of cartels and illustrate the intricacies of collusive relationships In the process they question the existing economic theory surrounding the operation of cartels which in practice do not always adhere to the textbook models or to complex game theoretic rules Although much economic research suggests that cartels are doomed to failure the authors find that there are many examples of industries where cartels have succeeded in controlling prices and output over a prolonged period of time The book is a groundbreaking attempt to study empirically a range of cartels throughout the world providing both historical and contemporary examples of collusion to enrich the arguments This book is written for academics policymakers lawyers and economists working in the fields of industrial organization and competition policy      *Utility Regulation and Competition Policy* Colin Robinson, Institute of Economic Affairs (Great Britain), London Business School, 2002-01-01 The regulatory essays do not focus exclusively on the UK energy industry There is an excellent review of progress in opening European electricity and gas markets which hints at further reforms that have occurred since the book was published There are also fine reviews of regulatory developments and competition policy in telecommunications railroads and water supply In short there is probably something of interest here for any serious energy professional or student of regulatory economics Jeff Skeer The Journal of Energy and Development In this book the latest volume in the annual series published in association with the London Business School and the Institute of Economic Affairs some of the main issues in UK and EU utility regulation and competition policy are discussed Topics examined include the new electricity and gas trading markets regulating the railways introducing competition into water telecoms and Ofcom opening EU gas and electricity markets the 1998 Competition Act EU merger policy and a general review of privatisation and regulation in Britain Essays by expert commentators are followed in each case by comments from the relevant regulator      Southern Economic Journal Cumulative Index ,1966      *Short Term Energy Shortages, Hearings Before the Subcommittee on Energy...*, 93-1, May 3, 8, 17, 1973 United States.
