

Semantic Theory and Language: A Perspective

H. G. CALLAWAY

In recent years linguists have devoted a good deal of attention to semantic problems. At the center of this work is the concept of the semantic component of a transformational grammar. The objective is an account of semantic competence in a language, integrated in some fashion with rules of syntax and phonology, and sharply distinguished from the influences of speakers' beliefs and knowledge of matters of fact. In spite of important traditions skeptical of such a conception of semantics, generative grammarians have generally not departed from it.

According to Chomsky, the attempt to incorporate factors such as belief or attitude into grammar, "... amounts to a rejection of the initial idealization to language, as an object of study."¹ While he is not willing to rule out such a development entirely, Chomsky's view is that there is insufficient empirical motivation. If such a development did prove correct, it would strongly affect the Chomskian conception of the object of study in linguistics. Speakers of the same language differ in beliefs and attitudes. Thus, if these differences are fully relevant to semantic theory, the very notion of semantic competence in a language fails of application. As Chomsky puts it, "... I would conclude that language is a chaos that it not worth studying. . . ."²

In spite of such commitment, Chomsky's conception of semantics must contend with both philosophical skepticism and contrary traditions in linguistics. In "Two Dogmas" Quine argued that "... it is non-sense, and the root of much non-sense, to speak of linguistic component and a factual component in the truth of any individual statement."³ If so, it follows that language as the object of semantic investigation cannot be separated from collateral information. F. R. Palmer pursues a similar contention in his recent survey of issues in semantic theory: "... it is impossible even in theory to draw a clear line between the meaning of a word or sentence and all the possible relevant information about it."⁴ In spite of such skepticism, and

Semantic Theory Don Lee Fred Nilsen, Alleen Pace Nilsen, 1975 *Linguistic Perspectives on Literature (RLE Linguistics C: Applied Linguistics)* Marvin K.L. Ching, Michael C. Haley, Ronald F. Lunsford, 2014-01-10 Although linguistics is often a technical and increasingly abstruse discipline many linguists retain a concern for the way in which linguistics can shed light on literature and literary problems In their introductory chapter the editors of this collection of essays by linguists on either side of the Atlantic enunciate a bold stance that defines the theoretical relationship between linguistics and literature delimits what should be considered a linguistic analysis of literature and explains how such an analysis is related to current theories of readership and literary criticism The editors theory of the relationship between linguistic and literary studies stipulates an eclectic rather than a holistic approach and the essays they have gathered together reflect this belief The contributions include such varied approaches as transformational grammar text grammar and speech act theory and the topics analysed include many that are at the heart of literature such as topicalization imagery figurative language ambiguity and the play on words through puns The anthology as a whole illustrates how linguistic theory illuminates the very nature of literary language It also gives evidence of the new insights into literature that have arisen from a close analysis of the language in which the literature is encoded **Introducing English Semantics** Charles W. Enfield, Sérgio Meira, 2018-07-19 Demonstratives play a crucial role in the acquisition and use of language Bringing together a team of leading scholars this detailed study a first of its kind explores meaning and use across fifteen typologically and geographically unrelated languages to find out what cross linguistic comparisons and generalizations can be made and how this might challenge current theory in linguistics psychology anthropology and philosophy Using a shared experimental task rounded out with studies of natural language use specialists in each of the languages undertook extensive fieldwork for this comparative study of semantics and usage An introduction summarizes the shared patterns and divergences in meaning and use that emerge **The Interface between Scientific and Technical Translation Studies**

and Cognitive Linguistics Ralph Krüger, 2015-04-17 Scientific and Technical Translation STT is a highly complex and knowledge intensive field of translation and cognitive linguistics is a usage based linguistic framework which provides powerful theoretical tools for modelling knowledge organisation and representation in discourse This book explores the interface between scientific and technical translation studies and cognitive linguistics by discussing the epistemological contextual textual and cross linguistic dimensions of scientific and technical translation from a cognitive linguistic perspective Particular emphasis is placed on explicitation and implicitation as indicators of the interaction between text and context in STT The corpusbased investigation of the two phenomena illustrates the complex knowledge requirements pertaining to scientific and technical translation and demonstrates the explanatory power of cognitive linguistics with regard to important textual and contextual aspects of STT

semantics pragmatics linguistic typology and language variation **Semiotic Principles in Semantic Theory** Neal R. Norrick, 1981-01-01 This study represents a contribution to the theory of meaning in natural language It proposes a semantic theory containing a set of regular relational principles These principles enable semantic theory to describe connections from the lexical reading of a word to its figurative contextual reading from one variant reading of a polysemous lexical item to another from the idiomatic to its literal reading or to the literal reading s of one or more of its component lexical items Semiotic theory provides a foundation by supplying principles defining motivated expression content relations for signs generally The author argues that regular semantic relational principles must derive from such semiotic principles to ensure the psychological reality and generality of the semantic principles *Resources in Education* ,1975 **Formal Semantics** Paul H.
