Testimonies: States of Mind and States of the Body in the Early Modern Period Gideon Manning, 2020-04-06 This book reconnects health and thought as the two were treated together in the seventeenth century and by reuniting them it adds a significant dimension to our historical understanding Indeed there is hardly a single early modern figure who took a serious interest in one but not the other with their attitudes toward body mind interaction often revealed in acts of self diagnosis and experimentation The essays collected here specifically reveal the way experiment and especially self experiment combined with careful attention to the states of mind which accompany states of body provide a new means of assessing attitudes to body mind interactions just as they show the abiding interest and relevance of source material typically ignored by historians of science and historians of philosophy In the surviving records of such experimenting on one s own body we can observe leading figures like Francis Bacon Robert Boyle and Robert Hooke deliberately setting out to repeat pleasurable or intellectually productive moods and states of mind by applying the same medicine on successive occasions In this way we can witness theories of the working of the human mind being developed by key members of an urban culture London interregnum Oxford who based those theories in part on their own regular long term use of self administered mind altering substances It is hardly an overstatement to claim that there was a significant drug culture in the early modern period linked to self experimentation new medicines and the new science This is one of the many things this volume has to teach us **700**
