Magical Practice Applying Magical Training To You:

The Covert Side of Initiation Virgil, For decades members of the esoteric community have considered anyone with magical skills and abilities to be a magician As a result there are few magical training systems designed to turn students into magicians and many magical training systems designed to turn students into people with magical skills and abilities The magical training system developed by the Czech adept Franz Bardon and contained in his three books Initiation into Hermetics The Practice of Magical Evocation and The Key to the True Quabbalah is designed to turn students into magicians Unfortunately many students of the system seek only to become people with magical skills and abilities rather than genuine magicians For this reason they often spend years stuck on the system s basic exercises In this book Virgil discusses some key components of magical training that are hinted at but not expounded upon in the text of Bardon s books Completion of these components is what distinguishes people who are magicians from people who merely possess magical skills and abilities In the process of discussing these components Virgil also elaborates on magical principles explained in his previous books offers helpful advice for common problems magicians will encounter during their training and elucidates one of the most misunderstood exercises of Bardon s training system
