Magnetic Resonance in Colloid and Interface Science J. Fraissard, Ol'ga Borisovna Lapina, 2002 Proceedings of the NATO Advanced Research Workshop 26-30 June 2001 St Petersburg Russia **Magnetic resonance in colloid and interface science** Cecil Dybowski, 1990 **Magnetic Resonance in Colloid and Interface Science** J. Fraissard, H.A. Resing, 2012-12-06

In 1976 on the occasion of the Centennial of the American Chemical Society H A RESING and C G WADE organized an international symposium on magnetic resonance in colloid and interface science which brought together a large number of scientists from the United States and from abroad. The aim of this symposium was to include all experimental inorganic, organic and biochemical systems in which molecules are bound to interfaces and to show the contribution of various techniques based on magnetic resonance to the knowledge of these systems. This ambitious program resulted in a very interesting gathering that initiated a more interdisciplinary approach to the problem of interfaces. Because of the success of this symposium it was suggested that a similar meeting should be organized in Europe within the next three years. Professor J. FRAISSARD accepted this task but considering the rapid developments in the theory and in the applications of the magnetic resonance spectroscopies the organizing committee decided to arrange the meeting to be held in MENTON, France in two parts: the first being a School and the second the Symposium proper. The former was intended to review and to teach theoretical aspects as well as to discuss the experimental results derived from these advanced methods; the Symposium was to be for the discussion of the latest results at the highest level.
