

45 Colt vs 44 Mag: Factors to Consider

Intended Use

Choose 44 Mag for hunting with its high velocity and impact. Opt for 45 Colt for less recoil and reliability in recreational shooting.

Power vs. Comfort

44 Mag offers great power but with noticeable recoil. 45 Colt delivers strong shots with more manageable recoil, ideal for comfort.

Reloading Flexibility

45 Colt provides more options for hand loaders seeking to balance power and recoil. 44 Mag, while powerful, offers less versatility in reloading.

Try Before You Decide!

Testing both calibers in a firearm that supports both helps determine personal preference between power and comfort.

Development and Evolution of Brain Size Martine Hahn, 2012-12-02 Development and Evolution of Brain Size Behavioral Implications contains the proceedings of a symposium entitled Development and Evolution of Brain Size Behavioral Implications held at William Paterson College in Wayne New Jersey in April 1978 The papers explore the relationship between evolution and development and its implications for brain size and behavior This book is comprised of 18 chapters and begins with an overview of the brain behavior relationship with emphasis on the importance of brain size for behavior the effects of genetic selection for brain size on brain substructures and behavior and whether genetic and environmental manipulations of brain size have similar consequences The next two chapters explain evolutionary theory and the evolution of the human brain as well as diversity in brain size A general model for brain evolution that offers some synthetic possibilities for approaching the questions of brain evolution size allometry and reorganization is then described The correlation between cerebral indices and behavioral differences is also discussed along with biochemical correlates of selective breeding for brain size The results of an experiment that assessed the effects of early undernutrition on brain and behavior of developing mice are presented This monograph should be of interest to students and practitioners in a wide range of disciplines including evolutionary biology and clinical psychology

The Effect of Temperature and other Factors on Plastics and Elastomers Laurence W. McKeen, 2014-04-15 This reference guide brings together a wide range of critical data on the effect of temperature on plastics and elastomers enabling engineers to make optimal material choices and design decisions The effects of humidity level and strain rate on mechanical and electrical properties are also covered The data are supported by explanations of how to make use of the data in real world engineering contexts High and low temperatures can have a significant impact on plastics processing and applications particularly in industries such as automotive aerospace oil and gas packaging and medical devices where metals are increasingly being replaced by plastics Additional plastics have also been included for polyesters polyamides and others where available including polyolefins elastomers and fluoropolymers Entirely new sections on biodegradable polymers and thermosets have been added to the book The level of data included along with the large number of graphs and tables for easy comparison saves readers the need to contact suppliers and the selection guide has been fully updated giving assistance on the questions which engineers should be asking when specifying materials for any given application Trustworthy current thermal data and best practice guidance for engineers and materials scientists in the plastics industry More than 1 000 graphs and tables allow for easy comparison between plastics Entirely new sections added on biopolymers and thermosets

Dynamic Modules Andreas Sorgatz, 2012-12-06 A dynamic module is a special kind of machine code library that can be loaded at run time like MuPAD library packages Dynamic modules allow users to integrate simple C C functions as well as complete software packages into MuPAD and to use them as regular MuPAD functions They give users direct access to internal methods and data structures of

MuPAD and allow it to be extended with almost any desired feature Programming and creating dynamic modules is facilitated by the MuPAD Application Programming Interface MAPI and a special generator This book is addressed to users and developers of dynamic modules in MuPAD The accompanying CD ROM includes a hypertext version of the manual and a trial version of MuPAD 1 4 1 for Linux and Solaris 2 5

Comparative Structure and Evolution of Cerebral Cortex Edward G. Jones, Alan Peters, 1990-10-31 The cerebral cortex especially that part customarily designated neocortex is one of the hallmarks of mammalian evolution and reaches its greatest size relatively speaking and its widest structural diversity in the human brain The evolution of this structure as remarkable for the huge numbers of neurons that it contains as for the range of behaviors that it controls has been of abiding interest to many generations of neuroscientists Yet few theories of cortical evolution have been proposed and none has stood the test of time In particular no theory has been successful in bridging the evolutionary gap that appears to exist between the pallium of nonmammalian vertebrates and the neocortex of mammals Undoubtedly this stems in large part from the rapid divergence of non mammalian and mammalian forms and the lack of contemporary species whose telencephalic wall can be seen as having transitional characteristics The monotreme cortex for example is unquestionably mammalian in organization and that of no living reptile comes close to resembling it Yet anatomists such as Ramon y Cajal on examining the finer details of cortical structure were struck by the similarities in neuronal form particularly of the pyramidal cells and their predisposition to laminar alignment shared by representatives of all vertebrate classes
