The Maharishi Technology of the Unified Field Robert K. Wallace, 1986 **Is Consciousness the Unified Field?** John S. Hagelin, 1987 Transcendental Meditation® in Criminal Rehabilitation and Crime Prevention Kenneth G Walton, David Orme-Johnson, Rachel S Goodman, 2014-01-02 In contrast to the generally dismal results of various approaches to rehabilitation these consciousness based strategies have proven effective in preventing crime and rehabilitating offenders This book will introduce you to a powerful unique approach to offender rehabilitation and crime prevention In contrast to the generally dismal results of most rehabilitation approaches studies covering periods of 1 15 years indicate that this new approach employing the Maharishi Transcendental Meditation and TM Sidhi programs reduces recidivism from 35 50% Transcendental Meditation in Criminal Rehabilitation and Crime Prevention provides the reader with a theoretical overview new original research findings and examples of practical implementation With this book you will explore what motivates people to commit crimes with emphasis on stress and restricted self development Then you will examine the results and policy implications of applying these consciousness based techniques to offender rehabilitation and crime reduction Most chapters include tables or figures that make the information easy to understand Transcendental Meditation in Criminal Rehabilitation and Crime Prevention does not merely review the theory behind this innovative approach to rehabilitation and prevention but also emphasizes the practical value of the programs it describes and reports how techniques and strategies based on Transcendental Meditation have been put to use in a variety of settings This book will familiarize the reader with a rehabilitation approach so universal in its applicability that any adult or juvenile offender can begin it at the point of sentencing during incarceration or at the point of parole the in depth background on adult growth and higher states of consciousness necessary to understand this consciousness based developmental approach the results of empirical studies conducted in prisons around the country with up to 15 years of follow up a preview of how cost effective the rehabilitation program might be implications for public policy and the judicial system including an innovative alternative sentencing program how this approach deals not only with individuals but also with the community as a whole when practiced by a small percentage of the population the TM and TM Sidhi programs may reduce crime in the larger community how these society level prevention programs may prove to be effective in reducing not only school violence in the community but if applied on sufficient scale war deaths and terrorism in the greater society *Transcendental Meditation in Criminal Rehabilitation and Crime Prevention* Charles Nathaniel Alexander, 2003 This is a collection of papers on the use of Maharishi Transcendental Meditation and TM Sidhi programs to reduce offender recidivism The papers provide a theoretical overview new original research findings and examples of practical implementation Studies covering periods of 1 15 years indicate that employing the Maharishi Transcendental Meditation and TM Sidhi programs may reduce recidivism by 35 50% Cyberculture, Cyborgs and Science Fiction William S. Haney II, 2006-01-01 Addressing a key issue related to human nature this book

argues that the first person experience of pure consciousness may soon be under threat from posthuman biotechnology In exploiting the mind s capacity for instrumental behavior posthumanists seek to extend human experience by physically projecting the mind outward through the continuity of thought and the material world as through telepresence and other forms of prosthetic enhancements Posthumanism envisions a biology machine symbiosis that will promote this extension arguably at the expense of the natural tendency of the mind to move toward pure consciousness As each chapter of this book contends by forcibly overextending and thus jeopardizing the neurophysiology of consciousness the posthuman condition could in the long term undermine human nature defined as the effortless capacity for transcending the mind s conceptual content Presented here for the first time the essential argument of this book is more than a warning it gives a direction far better to practice patience and develop pure consciousness and evolve into a higher human being than to fall prey to the Faustian temptations of biotechnological power As argued throughout the book each person must choose for him or herself between the technological extension of physical experience through mind body and world on the one hand and the natural powers of human consciousness on the other as a means to realize their ultimate vision *Phenomenology and Aesthetics* M. Kronegger,2012-12-06 and the one in the middle which judges as he enjoys and enjoys as he judges This latter kind really reproduces the work of art anew The division of our Symposium into three sections is justified by the fact that phenomenology from Husserl Heidegger Moritz Geiger Ingarden in Germany and Poland Merleau Ponty Paul Ricoeur E Levinas in France Unamuno in Spain and Tymieniecka in the United States have revealed striking coincidences in trying to answer the following questions What is the philosophical vocation of literature Does literature have any significance for our lives Why does the lyric moment present in all creative endeavors in myth dance plastic art ritual poetry lift the human life to a higher and authentically human level of the existential experience of man Our investigations answer our fundamental inquiry What makes a literary work a work of art What makes a literary work a literary work if not aesthetic enjoyment As much as the formation of an aesthetic language culminates in artistic creation the formation of a philosophical language lives within the orbit of creative imagination **Control Your Dreams** Jayne Gackenbach,Jane Bosveld,2014-07-29 The authors reveal how dreaming can help you uncover your hidden desires and confront your hidden fears With exercises and techniques taken from the most up to date scientific dream research readers learn how to use dreaming for creative work healing and meditation *The Oxford Handbook of Happiness* Susan A. David,Ilona Boniwell,Amenda Conley Ayers,2014 A text for researchers and practitioners interested in human happiness Its editors and chapter contributors are world leaders in the investigation of happiness across the fields of psychology education philosophy social policy and economics **Utopia and Consciousness** William S. Haney II,2011-04-15 In his book *Archaeologies of the Future The Desire Called Utopia and Other Science Fictions* 2007 Fredric Jameson analyzes the multiple components of utopia and the possibility of achieving utopia in the near future As this book argues however human civilization will never achieve utopia unless humans reach a

state of pure consciousness in which they will use their full mental potential and avoid making blunders in life that would undermine the possibility of a utopia This book develops a non teleological comparative poetics between Western and Sanskrit literary traditions by analyzing their opposing theories of language consciousness and meaning This comparison seeks to demonstrate the complementary nature of their two perspectives the objective conceptual emphasis of contemporary Western theory and the subjective experiential emphasis of Sanskrit poetics The potential contribution to the West of Indian culture in general and Sanskrit poetics in particular centers on the phenomenon of direct experience Without the direct experience of pure consciousness humans will not achieve a state of utopia because they will remain entangled in materialism without access to idealism or spiritualism available only through the direct experience of the unity of pure consciousness or the void of conceptions
