Stalin's Falcons Dmitry Zubov,2024-05-31 In this stunning expos Dmitry Zubov reveals the dark truth of the terrible losses suffered by Soviet flyers the inferiority of the Russian aircraft on World War II s Eastern Front and the almost slave like conditions in which those aircraft were made The Soviet history of the Second World War written under the conditions of a totalitarian regime reflected all its features with the result that it includes solid sets of patriotic fables that have no

connection with reality Many of the events of the war were distorted beyond recognition or even made up from beginning to end Archives containing original documents were available only to selected specially verified KGB historians who presented only the version of the war that was acceptable to the Soviet regime After the collapse of the Soviet Union the process of declassifying archives and gaining wide access to information gradually began to reveal the terrible truth of the crimes of the Soviet regime One of which of course was the incompetent leadership of the Red Army which led to massive loss of life across the military and civilians alike However the consequences of decades of Soviet propaganda had a strong impact on both Russian and world historical science Because of this not only Russian but unfortunately many European and American historians found themselves repeating the Soviet myths they had been fed The history of Soviet fighter aircraft did not escape this fate The tale of Stalin s so called Falcons who allegedly shot down dozens and even hundreds of Luftwaffe aircraft was persistently drummed into the heads of many generations of Russian people These heroes supposedly flew Soviet fighters whose technical characteristics were many times superior to their German counterparts with the result that Luftwaffe aces were reportedly afraid of meeting them in the air These primitive propaganda clich s became a model for describing the actions of Stalin s fighter aircraft In this stunning expos Stalin s Falcons reveals the stark and dark truth of the terrible losses suffered by Soviet flyers the inferiority of the Russian aircraft and the almost slave like conditions in which those aircraft were made *The Parliamentary Debates (official Report[s]) ... and theorize the realities in postcolonial African states and the ramifications on the continent's future. Situating the study within the context of the prevailing cultural and geopolitical realities in the postcolonial African states, the chapters illustrate the complex ways in which events and processes are experienced at the local level and how these local realities in turn impact and shape the patterns of political and military engagement in Africa and beyond. Organized along three major themes: Insurgency, governance and peacebuilding, expert researchers from around the world contribute chapters on Rebel and insurgent formations such as the RUF, the LRA and Boko Haram; state governance and corruption; terrorism and counterterrorism; security and peacebuilding focussing on the tensions and challenges facing post-conflict societies such as Sierra Leone, Rwanda and the newest nation state on the continent, South Sudan. This highly significant and topical study problematizes the impact of wars on African nations as well as the epistemological framing of the local realities and fallouts of armed conflict on post-colonial states.

Ecological Security Dennis Clark Pirages, Theresa Manley DeGeest, 2003-07-28

Global environmental politics has emerged from its initial incarnation in the arena of low politics and is rapidly becoming a high politics concern. Concern over water pollution, air pollution, deforestation and related basic environmental issues is giving way to a broader ecological security agenda. In this pathbreaking book, Dennis Clark Pirages and Theresa Manley DeGeest argue for dramatically broadening the context in which security priorities are established in an age of increasing globalization. Addressing the very fundamental question of the sources of premature human deaths and associated insecurity both historically and in the contemporary world, the authors observe that in the twentieth century starvation killed nearly as many people as did military conflict. But disease was responsible for killing nearly fourteen times as many people as was warfare. And in the contemporary world of the twenty-first century, environmental terrorism and biological warfare are blurring the traditional distinctions between natural disasters, accidental deaths and military casualties. Ecological Security moves the analysis of global environmental and resource issues to the next level by developing an eco-evolutionary perspective for analyzing emerging problems associated with rapid globalization. Preserving future ecological security will depend upon maintaining dynamic equilibriums among human populations and between them and pathogenic microorganisms, other species and the sustaining capabilities of nature. This eco-evolutionary framework is used to anticipate and analyze emerging demographic, ecological and technological discontinuities and dilemmas associated with rapid globalization. The authors conclude by stressing the need for new kinds of global public goods to mitigate the harshest impacts of these rapid and interrelated changes.
