Integrative Pediatric Oncology Alfred Längler, Patrick J. Mansky, Georg Seifert, 2012-12-13 This book covers a broad spectrum of complementary and alternative medicine CAM practices employed

in pediatric oncology worldwide with a special focus on the methods widely used in Western countries. It is a scientifically based practice oriented handbook that will meet the needs of pediatric oncologists working in medical practices and hospitals. An introductory section includes a comparative overview of current CAM use in pediatric oncology in different countries. Commonly used CAM methods are then discussed in a series of chapters that provide a theoretical description of the method in question followed by more practically oriented information including scientific data if applicable. Special attention is paid to the issue of how to integrate each method into conventional pediatric oncology. The closing parts of the book consider aspects of CAM requiring further development such as institutional research and provide a road map on establishing integrative pediatric oncology worldwide.

Complementary and Alternative Medicine Kevin

Dew, 2021-04-20. Complementary and Alternative Medicine is a sociological investigation of complementary and alternative medicine (CAM) in contemporary society and an exploration of the forces throughout the globe across different institutions and within different therapeutic spaces that constrain or foster alternative medicine. Drawing on 30 years of research, the book identifies the trends in the use of CAM and explores the scientific, political, and social challenges that CAM faces in relation to orthodox medicine. The author examines the varieties of CAM practices and how they manifest in different institutional spaces, including public inquiries, the orthodox medical practitioner's consulting room, medical journals, and the homes of those who use CAM. It also compares unorthodox practices in different geopolitical settings, namely the global north and the global south. This book is valuable reading for higher level undergraduate and postgraduate social science students, including those in psychology, sociology, anthropology, health sciences, and related disciplines. It is relevant for courses in medical sociology, medical anthropology, and social science and health, and a broader audience interested in contemporary health issues, controversies, and alternative medicine.
