Major Blunders of The Second World War Andrew Sangster,2025-06-04 Blunders and their Consequences Examining Errors of the Second World War War is rife with mistakes but the consequences can be catastrophic when those errors escalate to blunders caused by carelessness or ignorance In the Second World War context these blunders often led to devastating loss of life strategic failures and enduring controversies This book delves into such incidents from obscure mishaps to high profile missteps Among the tales are the shocking story of an American destroyer accidentally firing a live torpedo at a battleship carrying President Roosevelt and a German aircraft crash landing in neutral territory with critical invasion plans onboard Overconfidence played a key role in many tragedies such as a Luftwaffe raid that struck American gas shells causing widespread casualties and the Dieppe raid which became a planning disaster Some incidents remain fiercely debated The British sinking of the French fleet continues to raise questions about necessity versus error while King Edward VIII s alleged treachery may stem more from naivety than intent The conviction of Admiral Karl D nitz at Nuremberg also sparks controversy as his U boat tactics mirrored Allied strategies Through vivid storytelling and detailed analysis this book exposes the human error behind critical wartime decisions from tactical misjudgments to intelligence failures It examines the hidden and often overlooked blunders that shaped the course of WWII offering a fresh perspective on the complexities of war and the fragile nature of leadership under pressure *Hearings* United States. Jacques Lacan considers the three key phases of Lacan's interest in literary topics Santanu Biswas first examines the seminars given between 1955 and 1961 in which Lacan spoke on Edgar Allan Poe's short story The Purloined Letter Hamlet Sophocles Antigone and Paul Claudel's The Co fontaine Trilogy and where literature is related to meaning This is followed by an exploration of Lacan's seminar on Lituraterre in 1971 wherein Lacan elaborates on the different ways in which literature appeared to turn towards lituraterre Finally Biswas considers Lacan's 1975 1976 seminar on James Joyce who created literature out of litter and was concerned with jouissance rather than with meaning The Major Literary Seminars of Jacques Lacan will be of great interest to Lacanian psychoanalysts other mental health practitioners interested in the teachings of Lacan and academics and students of Lacanian studies literature and psychoanalysis Allowance for Longevity United States. 101 Biggest Mistakes Nonprofits Make and How You Can Avoid Them Andrew Olsen, CFRE, 2019-03-15 Nonprofits are some of the scrappiest organizations you'll ever experience. In many respects they resemble start-ups. Think about it: Small groups generally of highly dedicated, focused believers coming together to achieve something greater than they could ever achieve on their own. They're often cash-strapped, moving faster than their infrastructures can keep up with, and frequently learning and adapting as quickly as they can. The majority of nonprofit staff are able to do so much good with so few resources. The general public has come to expect nonprofits to behave this way. But one thing I've noticed is that unlike the corporate sector, there is little in the way of generally accepted best practices across the nonprofit sector. This results in organizations that serially make mistakes, often resulting in detrimental impacts to their staff, their donors, their revenue, and ultimately to the achievement of their mission. In *101 Biggest Mistakes Nonprofits Make and How You Can Avoid Them*, you'll hear directly from industry veterans who have over 300 years of combined experience inside nonprofit organizations and leading consulting firms serving nonprofits. They are experts in strategic planning, government relations, leadership, finance, and administration, program development, marketing, and philanthropy. Contrary to what the title might suggest, this book is NOT an admonishment of the nonprofit sector and those who make their career within it. Far from it, I know that one of the least funded areas in the nonprofit sector is staff training and development. That is at the core of what brought me to envision this book: to assemble this group of expert contributors and to bring this work to market. Everyone makes mistakes, whether you work in the nonprofit sector, the commercial sector, or anywhere in between. In the corporate sector, there are entire industries designed to provide coaching and teaching at all levels of an organization, even customized to market niches. These industries help teach leaders how to improve and do their jobs at the highest possible levels. There are also plenty of works outlining best practices in strategy, design, staffing, leadership, management, finance, etc. Roadmaps, if you will, to help corporate executives, leaders, and individual contributors avoid costly mistakes and maximize impact for their customers and businesses. The same can't yet be said for the nonprofit sector. In this book, I've compiled the 101 biggest mistakes that cost nonprofits the most, and given you expert recommendations to help you avoid making these mistakes yourself.
