[Playing Software](#) Miguel Sicart, 2023-02-14 The play element at the heart of our interactions with computers and how it drives the best and the worst manifestations of the information age Whether we interact with video games or spreadsheets or social media playing with software shapes every facet of our lives In *Playing Software* Miguel Sicart delves into why we play with computers how that play shapes culture and society and the threat posed by malefactors using play to weaponize everything from conspiracy theories to extractive capitalism Starting from the controversial idea that software is an essential agent in the information age Sicart considers our culture in general and our way of thinking about and creating digital technology in particular as a consequence of interacting with software s agency through play As Sicart shows playing shapes software agency In turn software shapes our agency as we adapt and relate to it through play That play drives the creation of new cultural social and political forms Sicart also reveals the role of make believe in driving our playful engagement with the digital sphere From there he discusses the cybernetic theory of digital play and what we can learn from combining it with the idea that playfulness can mean pleasurable interaction with human and nonhuman agents inside the boundaries of a computational system Finally he critiques the instrumentalization of play as a tool wielded by platform capitalism

*Thinking about Stories* Samuel Lebens, Tatjana von Solodkoff, 2023-10-31 *Thinking About Stories* is a fun and thought provoking introduction to philosophical questions about narrative fiction in its many forms from highbrow literature to pulp fiction to the latest shows on Netflix Written by philosophers Samuel Lebens and Tatjana von Solodkoff it engages with fundamental questions about fiction such as What is it What does it give us Does a story need a narrator And why do sad stories make us cry if we know they aren t real The format of the book emulates a lively verbal exchange each chapter has only one author while the other appears

spontaneously in dialogues in the text along the way raising questions and voicing criticisms and inviting responses from their co author This unique format allows readers to feel like they are a part of the conversation about the philosophical foundations of some of the fictions in their own lives Key Features Draws on a wide range of types of narrative fiction from Harry Potter to Breakfast of Champions to Parks and Recreation Explores how fiction despite its detachment from truth is often best able to teach us important things about the world in which we live Concludes by asking in the final chapter whether we all might be fictions Includes bibliographies and suggested reading lists in each chapter

**God in the Act of Reference** Erica Appelros, 2017-03-02 To claim to believe in God without accepting that God exists independently of human minds would mean reducing God to merely a human construct thus not real enough for being the object of religious worship This book sets out to challenge this common view on existence and religious belief Arguing from concrete examples of language use in children s make believe play and other ordinary situations Erica Appelros suggests that what makes us consider something to be real involves our capacities to relate to our surroundings not only on grounds of their physical characteristics but also on grounds of human construction This book makes a substantial contribution to the contemporary debate within philosophy of religion on religious realism and non realism and suggests innovative and constructive solutions to the perennial philosophical and religious issue of what is meant by talking about God and God s existence

**Children's Imagination** Paul L. Harris, 2022-06-23 Children s imagination was traditionally seen as a wayward desire driven faculty that is eventually constrained by rationality A more recent Romantic view claims that young children s fertile

imagination is increasingly dulled by schooling Contrary to both perspectives this Element argues that paradoxically children s imagination draws much inspiration from reality Hence when they engage in pretend play envision the future or conjure up counterfactual possibilities children rarely generate fantastical possibilities Their reality guided imagination enables children to plan ahead and to engage in informative thought experiments Nevertheless when adults present children with less reality based possibilities via biblical narratives or the endorsement of special beings children are receptive Indeed such imaginary possibilities can infuse their otherwise commonsensical appraisal of reality Finally like adults young children enjoy being absorbed into a make believe fictional world but faced with real world problems calling for creativity they often need guidance given their limited knowledge of prior solutions
