 Richard Dawkins,2009-09-22 Richard Dawkins transformed our view of God in his blockbuster The God Delusion which sold
 millions of copies in English alone He revolutionized the way we see natural selection in the seminal bestseller The Selfish
 Gene Now he launches a fierce counterattack against proponents of Intelligent Design in his New York Times bestseller The
 Greatest Show on Earth Intelligent Design is being taught in our schools educators are being asked to teach the controversy
 behind evolutionary theory There is no controversy Dawkins sifts through rich layers of scientific evidence from living
 examples of natural selection to clues in the fossil record from natural clocks that mark the vast epochs wherein evolution
 ran its course to the intricacies of developing embryos from plate tectonics to molecular genetics to make the airtight case
 that we find ourselves perched on one tiny twig in the midst of a blossoming and flourishing tree of life and it is no accident
 but the direct consequence of evolution by non random selection His unjaded passion for the natural world turns what might
 have been a negative argument exposing the absurdities of the creationist position into a positive offering to the reader
