The Making and Remaking of Australasia Tony Ballantyne, 2022-11-03 This book explores the emergence of Australasia as a way of thinking about the culture and geography of this region Although it is frequently understood to apply only to Australia and New Zealand the concept has a longer and more complicated history Australasia emerged in the mid 18th century in both French and British writing as European empires extended their reach into Asia and the Pacific and initially held strong links to the Asian continent The book shows that interpretations and understandings of Australasia shifted away from Asia in light of British imperial interests in the 19th century and the concept was adapted by varying political agendas and cultural visions in order to reach into the Pacific or towards Antarctica The Making and Remaking of Australasia offers a number of rich case studies which highlight how the idea itself was adapted and moulded by people and texts both in the southern hemisphere and the imperial metropole where a range of competing actors articulated divergent visions of this part of the British Empire An important contribution to the cultural history of the British Empire Australia New Zealand and Pacific Studies this collection shows how Australasia has had multiple often contrasting meanings

The Court as Archive Ann Genovese, Trish Luker, Kim Rubenstein, 2019-02-19 Until the late 20th century an archive generally meant a repository for documents as well as the generic name for the wide range of documents the repository

might hold An archive could be visited and then also searched to discover past actions or lives that had meaning for the present While historians and historiographers have long understood the contests that archives contain and represent the very idea of the archive has over the last 40 years become the subject and object of widening and intensified consideration This consideration has been intellectual from scholars in a wide range of disciplines and public from communities and individuals whose stories are held captive or sometimes hidden or excluded from official archives as well as institutional It has involved scrutiny and critique of official archives limitations and practices as well as symbolic affective and theoretical expansion and heightened expectation of what the archive is or should be The very language of the archive now carries freight as administrative practice normative value metaphor description and aspiration in different ways than it did in the 20th century This collection offers a unique contribution to these reinvigorated and sometimes new conversations about what an archive might be what it can do as a consequence and to whom it bears custodial responsibilities In particular this collection addresses what it means for contemporary Australian superior courts of record to not only have constitutional and procedural duties to documents as a matter of law but also to acknowledge obligations to care for those materials in a way that understands their public meaning and public value for the Australian people in the past in the present and for the future
