Development P. Michiel Westenberg, Augusto Blasi, Lawrence D. Cohn, 2013-05-13 Jane Loevinger's innovative research methodology, psychometric rigor, and theoretical scope have attracted the attention of numerous scholars and researchers. Empirical investigations employing Loevinger's Washington University Sentence Completion Test of ego development (WUSCT) have appeared with increasing frequency, and total more than 300 studies. Following the publication of the first comprehensive revision of the scoring manual for the WUSCT, this volume reflects on the strengths and limitations of Loevinger's developmental model. It is divided into sections that correspond with four broad questions that can be raised about Loevinger's developmental model: What is its scope and intellectual tradition? What evidence is there for construct validity? What is its relationship to other social developmental models? What is its clinical relevance to Loevinger's model of ego development? This four-part grouping provides a framework for effectively organizing the present material, and frequently the questions raised in one section are addressed in other sections as well. In the concluding chapter, Loevinger addresses some of the ideas that are proposed by the various authors. She also presents the origin of the ego development concept by recounting its history.

Moral Classrooms, Moral Children Rheta DeVries, 2012-06-08 This classic bestseller, now updated for today's diverse teaching force and student populations, explores the benefits of sociomoral practices in the classroom. The authors draw on recent research to show how these approaches work with children ages 2-8. They focus on how to establish and maintain a classroom environment that fosters children's intellectual, social, moral, emotional, and personality development. Extending the work of Jean Piaget, the authors advocate for a cooperative approach that contrasts with the coercion and unnecessary control that can be seen in many classrooms serving young children. Practical chapters demonstrate how the constructivist approach can be embedded in a school program by focusing on specific classroom situations and activities such as resolving conflict, group time, rule making, decision making, and voting, social and moral discussions, cooperative alternatives to discipline, and activity time.

Close Relationships Clyde Hendrick, Susan S. Hendrick, 2000-02-17 As Ellen Bercheid points out in her foreword to this volume, relationship science is a complex and ever-expanding field. Much credit goes to editors Clyde Hendrick and Susan S. Hendrick for their scholarly dedication to the advancement of this multidisciplinary arena. This sourcebook demonstrates yet again their expertise and leadership as they succeed in combining many great contributions to the field by some of the most respected specialists around. Read this book for a panoramic view of close relationship research, with highlights from current literature, original research, practical applications, and projections for future research.

In Over Our Heads Robert Kegan, 1994 Surveying the disparate expert literatures which normally take no account of each other, Kegan brings them together to reveal for the first time what these many demands have in common. Our frequent frustration in trying to meet these complex and often conflicting claims, she shows us, results from a mismatch between the way we ordinarily know the world and the way we are unwittingly expected to understand it. *In Over Our Heads* provides us with entirely fresh perspectives on a number of cultural controversies, the abstinence

vs safe sex debate the diversity movement communication across genders the meaning of postmodernism What emerges in these pages is a theory of evolving ways of knowing that allows us to view adult development much as we view child development as an open ended process born of the dynamic interaction of cultural demands and emerging mental capabilities

Promotion of Social Awareness Robert L. Selman, 2003-05-15 Education specialists have written volumes on the best ways to help children learn to read and write but who is helping them navigate the potentially treacherous waters of social interactions While in school to study children are also preoccupied with understanding the rules governing social relationships Issues of trust and loyalty rivalry and conflict belonging and exclusion affect all school aged children but very few lesson plans include social development skills The Promotion of Social Awareness summarizes thirty years of research on the social development of children in elementary and middle school and shows how this work has led to a series of programs that promote the social competence of children and adolescents Rich with lessons drawn from real life the book includes an in depth account of the author s partnership with an innovative program designed to help educators promote a sound ethic of social relationships among children a case study of a teacher particularly gifted at promoting such relationships and the tale of how the author s theoretical framework fared cross culturally when exported to Iceland The Promotion of Social Awareness documents Robert Selman s efforts both as a practitioner trying to help young people develop their interpersonal skills and as a researcher attempting to understand the factors that promote or hinder social development Selman believes that getting along with others involves concrete and measurable social skills and actions that can be taught The book underlines how the science of social development has given rise to initiatives and programs that can be used in educational settings to help children get along with each other and may in the long run help prevent violence drug abuse and prejudice Unique in its marriage of theory and practice The Promotion of Social Awareness will appeal to a wide readership including developmental psychologists educators and parents
