Making A Real Killing Rocky Flats And The Nuclear West:

Making a Real Killing Len Ackland, 2002-02-19 A chilling fast moving study of the nuclear weapons plant in the Denver suburbs told through the experiences of managers workers activists and neighbors who were all so deeply affected by the hazardous plant

Remedies for a New West Patricia Nelson Limerick, Andrew Cowell, Sharon K. Collinge, 2022-05-17 This wide ranging collection of essays is intended to provoke both thought and action The pieces collected here explore a variety of issues facing the American West disappearing Native American languages deteriorating air quality suburban sprawl species loss grassland degradation and many others and suggest steps toward healing More than dealing with or solving according to the editors healing addresses not just symptoms but their underlying causes offering not just a temporary cure but a permanent one The signs of illness and trauma can seem omnipresent in today s West land and soil disrupted from mining overgrazing logging and farming wildlife habitat reduced and fragmented native societies disturbed and threatened open space diminished by cities and suburbs wilderness destroyed by roads and recreation seekers But as these essays suggest the treatment program for healing the West has many healthful side effects Engaging in the kinds of projects suggested by contributors is therapeutic not only for the environment but for participants as well Restoration repair and recovery can counter symptoms of despair with concentrated doses of promise and possibility The more lesions the West has this book suggests the more opportunities there are for westerners to revive and ultimately cure the ailing patient they have helped to create The very idea of restoring the West to health contributors and editors contend unleashes our imaginations sharpens our minds and gives meaning to the ways we choose to live our lives At the same time acknowledging the profound difficulties of the work that lies ahead immunizes us against our own arrogance as we set about the task of healing the West

Making the Impossible Possible Kim Cameron, Marc Lavine, 2006-08-01 The most contaminated nuclear weapons plant in the country Rocky Flats was an environmental disaster and the site of rampant worker unrest Although estimates projected that cleaning up and closing the facility would take 70 years and 36 billion the project was completed 60 years ahead of schedule and 30 billion under budget and most of the site is now on its way to becoming a wildlife refuge Kim Cameron and Marc Lavine explain how this amazing feat was accomplished and how other organizations can apply the same methods to achieve breakthrough levels of performance The authors discovered that the Rocky Flats leaders used a distinctive abundance approach identifying and building on sources of strength resilience and vitality rather than simply solving problems and overcoming difficulties Drawing on numerous firsthand accounts and public records they identify 21 specific leadership practices and key techniques that were fundamental to this innovative approach This fascinating and thoroughly researched case study provides a complete guide for anyone wanting to better understand and apply the lessons of this remarkable history making achievement

Destruction Gary Ackerman,Jeremy Tamsett,2009-02-03 Explores the Nexus Formed When Malevolent Actors Access Malignant MeansWritten for professionals academics and policymakers working at the forefront of counterterrorism efforts Jihadists and Weapons of Mass Destruction is an authoritative and comprehensive work addressing the threat of weapons of mass destruction WMD in the hands of jihadists *Frontiers Past and Future* Carl Abbott,2006 Abbott offers a fruitful new way to read science fiction one that also greatly enriches our understanding of western history and its impact on our collective imagination Detailing the overlap of science fiction and western fiction especially relating to their mutual interest in and concerns about frontier expansionism he reveals an unsuspected common ground that informs the writings of both camps Reviewing the work of many Hugo and Nebula Award winners as well as drawing upon popular film and television series like the Buck Rogers serials Abbott s study journeys across the far reaches of science fiction s universe

Encyclopedia of Science and Technology Communication Susanna Hornig Priest,2010-07-14 In the academic world the term science communication refers both to a set of professions such as science journalism and public information work and to an interdisciplinary scholarly research specialization Much of this research is aimed at improving our understanding of the best ways to communicate complex information especially to people who are not scientists Science communication specialists are concerned with giving people useful information about health environment and technology as well as science itself In order to do this we also need to improve our understanding of how people think form opinions and process information Additionally professional practitioners in science communication are engaged in strategic and ethical decisions every day such as How should reporters cover the issue of climate change Should the views of scientists who do not believe that climate change has been caused by human activity be included alongside the views of those who do in order to give a balanced story or does this mislead the public into thinking that both of these positions are equally accepted within the scientific community The Encyclopedia of Science and Technology Communication provides information on the entire range of interrelated issues in this interdisciplinary field in one place along with clear suggestions on where to begin the search for more Geared towards undergraduate and graduate students in journalism communication mass communication and media studies as well as towards working journalists public information officers and public relations specialists this encyclopedia introduces this vast fascinating field while challenging the reader to question assumptions inherent in communication across disciplinary boundaries Key Themes Associations and Organizations Audiences Opinions and Effects Challenges Issues and Controversies Changing Awareness Opinion And Behavior Critical Influences and Events Global and International Aspects Government Agencies US History Philosophy and Sociology of Science Important Figures Journal Publications Key Cases and Current Trends Law Policy Ethics and Beliefs Major Infrastructural Initiatives Practices Strategies and Tools Professional Roles and Careers Public Engagement Approaches Theory and Research Venues and Channels **Under the Cap of**

Invisibility Lucie Genay,2025-05-13 Pantex was built during World War II near the town of Amarillo Texas The site was

converted early in the Cold War to assemble nuclear weapons and produce high explosives For nearly fifty years Pantex has been the sole assembly and disassembly plant for nuclear weapons in the United States Today most of the activities of the plant consist of the manufacture of high explosive components and the dismantlement or life extension of weapons including retrofitting aging warheads in the United States s arsenal Unlike the much more famous nuclear weapons production sites at Los Alamos Oak Ridge Hanford and Rocky Flats the Pantex plant has drawn little attention hidden under a metaphoric cap of invisibility Lucie Genay now lifts that invisibility cap to give the world its first in depth look at Pantex and the people who have spent their lives as neighbors and employees of this secretive industry The book investigates how Pantex has impacted local identity by molding elements of the past into the guaranty of its future and its concealment It further examines the multiple facets of Pantexism the reasons for embracing nuclear weapons production as a solution to economic woes the resulting dependence on this industry and the unconditional support for the facility through the voices of native and adoptive Panhandlers

The Prospect of Nuclear Jihad in South Asia Musa Khan Jalalzai, 2015-10-01 When we talk about Pakistan s nuclear weapons armed forces and civilian governments then controversies and uninvited misperceptions swirl in our minds If we take in the broad picture we inevitably conclude that not all is going in the right direction in the country and that is because the army politicians and the establishment perceive jihadism as a profitable business They run this business of killings and torture through their proxies While we study the militarized mind of Pakistani generals and recognize their resentment towards civilian governments we find more controversies about the role of armed forces and their relationship with worldwide terrorist organizations International journalist Musa Khan Jalalzai is ideally positioned to present us with a picture of what is actually afoot and what it means for the future When we study the militarized mind of Pakistani generals and recognize their resentment towards civilian institutions we find more controversies about the role of armed forces and their relationship with worldwide terrorist organizations The Pakistan military controls the financial market stock exchange real estate business banking sector and smuggling of narcotics Ethnic representation within the armed forces raises serious concerns Some experts say this is not a national army but view it as the club of Pashtun and Punjabi generals The army has failed to develop a true ethnic representation process or motivate Baloch and Sindhis to join the armed forces but they certainly have gained experience in killing innocent civilians Then there is the question of the Saudi investment in Pakistan s Islamic nuclear bomb Saudi Arabia s link with Pakistan s nuclear and missile program has long been the source of speculation that Pakistan might either station nuclear forces on Saudi sand or provide a nuclear umbrella to the Wahabi state in return for oil supply or that the Saudis would purchase nuclear weapons from Pakistan International journalist Musa Khan Jalalzai is ideally positioned to present us with a picture of what is actually afoot and what it means for the future

Colorado Carl Abbott, Stephen J. Leonard, Thomas J. Noel, 2013-06-15 Since 1976 newcomers and natives alike have learned about the rich history of the magnificent place they call home from Colorado A History of the Centennial State In the

fifth edition coauthors Carl Abbott Stephen J Leonard and Thomas J Noel incorporate recent events scholarship and insights about the state in an accessible volume that general readers and students will enjoy The new edition tells of conflicts shifting alliances and changing ways of life as Hispanic European and African American settlers flooded into a region that was already home to Native Americans Providing a balanced treatment of the entire state s history from Grand Junction to Lamar and from Trinidad to Craig the authors also reveal how Denver and its surrounding communities developed and gained influence While continuing to elucidate the significant impact of mining agriculture manufacturing and tourism on Colorado the fifth edition broadens and focuses its coverage by consolidating material on Native Americans into one chapter and adding a new chapter on sports history The authors also expand their discussion of the twentieth century with updated sections on the environment economy politics and recent cultural conflicts New illustrations updated statistics and an extensive bibliography including Internet resources enhance this edition *Weapons of Mass Destruction* Eric A.

The Mobilized American West, 1940-2000 John M. Findlay,2023-07 In the years between 1940 and 2000 the American Far West went from being a relative backwater of the United States to a considerably more developed modern and prosperous region one capable of influencing not just the nation but the world By the dawn of the twenty first century the population of the West had multiplied more than four times since 1940 and western states had transitioned from rural to urban becoming the most urbanized section of the country Massive investment both private and public in the western economy had produced regional prosperity and the tourism industry had undergone massive expansion altering the ways Americans identified with the West In *The Mobilized American West 1940 2000* John M Findlay presents a historical overview of the American West in its decades of modern development During the years of U S mobilization for World War II and the Cold War the West remained a significant distinct region even as its development accelerated rapidly and in many ways it became better integrated into the rest of the country By examining events and trends that occurred in the West Findlay

argues that a distinctive region wide political culture developed in the western states from a commitment to direct democracy the role played by the federal government in owning and managing such a large amount of land and the way different groups of westerners identified with and defined the region While illustrating western distinctiveness Findlay also aims to show how in its sustaining mobilization for war the region became tethered to the entire nation more than ever before but on its own terms Findlay presents an innovative approach to viewing the American West as a region distinctive of the United States one that occasionally stood ahead of at odds with and even in defiance of the nation

Noel, 2016-09-20 A Short History of Denver covers more than 150 years of Denver's rich history The book recounts the takeover of Native American lands the founding of small towns on the South Platte River at the base of the Rocky Mountains and the creation of a city which by 1890 was among the nation's major western urban centers Leonard and Noel tell the stories of powerful economic and political leaders such as John Evans Horace Tabor and David Moffat and delve into the contributions of women including Elizabeth Byers and Margaret Molly Brown The book also recognizes the importance of the city's ethnic communities including African Americans Asians Latinos and many others A Short History of Denver portrays the city's twentieth century ups and downs including the City Beautiful movement political corruption the rise of the Ku Klux Klan in the 1920s and the Great Depression of the 1930s Here readers will find the meat and potatoes of economic and political history and much more including sports history social history and the history of metropolitan wide efforts to preserve the past

Command and Control Eric Schlosser, 2014-08-26 The Oscar shortlisted documentary Command and Control directed by Robert Kenner finds its origins in Eric Schlosser's book and continues to explore the little known history of the management and safety concerns of America's nuclear arsenal A devastatingly lucid and detailed new history of nuclear weapons in the U S Fascinating Lev Grossman TIME Magazine Perilous and gripping Schlosser skillfully

weaves together an engrossing account of both the science and the politics of nuclear weapons safety San Francisco Chronicle A myth shattering expos of America s nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America s nuclear arsenal A groundbreaking account of accidents near misses extraordinary heroism and technological breakthroughs Command and Control explores the dilemma that has existed since the dawn of the nuclear age How do you deploy weapons of mass destruction without being destroyed by them That question has never been resolved and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind While the harms of global warming increasingly dominate the news the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten Written with the vibrancy of a first rate thriller Command and Control interweaves the minute by minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years It depicts the urgent effort by American scientists policy makers and military officers to ensure that nuclear weapons can t be stolen sabotaged used without permission or detonated inadvertently Schlosser also looks at the Cold War from a new perspective offering history from the ground up telling the stories of bomber pilots missile commanders maintenance crews and other ordinary servicemen who risked their lives to avert a nuclear holocaust At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus Arkansas to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons Command and Control takes readers into a terrifying but fascinating world that until now has been largely hidden from view Through the details of a single accident Schlosser illustrates how an unlikely event can become unavoidable how small risks can have terrible consequences and how the most brilliant minds in the nation can only provide us with an illusion of control Audacious gripping and unforgettable Command and Control is a tour de force of investigative journalism an eye opening look at the dangers of America s nuclear age

The Atomic Bomb and American Society Rosemary B.

Mariner,G. Kurt Piehler,2009 Drawing on the latest research on the atomic bomb and its history the contributors to this provocative collection of eighteen essays set out to answer two key questions First how did the atomic bomb a product of unprecedented technological innovation rapid industrial scale manufacturing and unparalleled military deployment shape U S foreign policy the communities of workers who produced it and society as a whole And second how has American society s perception that the the bomb is a means of military deterrence in the Cold War era evolve under the influence of mass media scientists public intellectuals and even the entertainment industry In answering these questions The Atomic Bomb and American Society sheds light on the collaboration of science and the military in creating the bomb the role of women working at Los Alamos the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb and the

development of Cold War ideology the image of the bomb that was conveyed in the popular media and the connection of the bomb to the commemoration of World War II As it illuminates the cultural social political environmental and historical effects of the creation of the atomic bomb this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone even if only a few are empowered to manage it Rosemary B Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee Knoxville which hosted the conference that formed the basis of this volume He is the author of Remembering War the American Way and World War II in the American Soldiers Lives Series as well as the coeditor with John Whiteclay Chambers II of Major Problems in American Military History

Rocket States: Atomic Weaponry and the Cultural Imagination Fabienne Collignon, 2014-07-31 Rocket States crosses the disciplines of Cold War Studies American Literature American Studies and Cultural Studies The particular attraction of this study lies in the combination of its range close textual and visual analysis of the correlations between land and weaponry set firmly within its political and cultural contexts with its unique analytical approach The book offers a synthesis between history theories of technology theories of space popular culture literary study and military science It illuminates a variety of literary texts from key writers and thinkers such as Pynchon Stephen King Norman Mailer and Tom Wolfe while also invoking figures like Nikola Tesla James Webb Batman and Ronald Reagan Organised topographically according to how missile technology manifests itself differently in particular locations Rocket States s geographical targets are Colorado Kansas Cape Canaveral and New York variously titled Excavation Preservation Evacuation and Transmission It advances through these states roughly chronologically beginning in the late 1940s and early 1950s and coming to an end in the first part of the 21st century Collignon s argument is concerned with identifying the recurring figures and fantasies of the Cold War the dome or parabola as sheltering techno form the fictions of total security adapting to constantly changing targeting strategies gadget love closed freezing worlds As such Rocket States analyses by what processes the Cold War is frequently literalised in its weapons installations and how these facilities in turn shape dreams of containment survival escape and techno supremacy

Powder Burn Daniel Glick, 2009-02-23 In October 1998 an arson caused 12 million in damage at Vail the country s largest ski area A shadowy radical environmental group called the Earth Liberation Front claimed credit for what the FBI called the costliest act of ecoterrorism in U S history But as it turns out credible suspects were everywhere since Vail was owned by a New York investment firm that had alienated a wide swath of Colorado s high country residents Who couldn t have done this wondered a local sheriff s investigator More than a clever whodunit Powder Burn scrapes away the glitz of America s premier ski destination to reveal a cautionary tale about runaway opulence and rapid change in the New West As the Denver Post put it Vail is a microcosm of the disputes over growth raging across the Rockies and Glick s take on the fire helps to fan the flames

Packed with odd characters and paranoia with beautiful mountains and despicable actions Powder Burn is about corporate greed the environment a small town and a mysterious unsolved crime As Vail celebrates its fortieth anniversary with a full season of hoopla and self promotion this book makes compelling reading for skiers true crime enthusiasts or anyone interested in the environmental social and political issues raised by the evolution of the new West **Chain Reactions** Lucy Jane Santos, 2024-11-05 Tracing uranium's past and how it intersects with our understanding of other radioactive elements Chain Reactions aims to enlighten readers and refresh our attitudes about the atomic world Chain Reactions looks at the fascinating often forgotten stories that can be found throughout the history of uranium From glassworks to penny stocks from medicines to atomic weapons from something to be feared to a powerful source of energy this global history explores the scientific narrative of this unique element but also shines a light on its cultural and social impact By understanding our nuclear past we can move beyond the ideological opposition to technologies and encourage a more nuanced dialogue about whether it is feasible and desirable to have a genuinely nuclear powered future *Yellowcake Road* Deyon D. Boughton, 2009 These are but a few of my recollections of the Cotter Mill from its 1958 Fremont County Colorado inauguration to the year 2000 when General Atomics obtained the mill four sections of industrial and rural real estate assets and obligations for the sum of 1 000 000 or the value of a couple of neighboring homes Contrary to popular opinion early Cotter was not welcomed with open arms by Canon City society As a matter of fact early employees were openly referred to as The unwelcome foreign element Individual and collective efforts changed the atmosphere especially when Cotter conveyed bargain basement priced water to a beleaguered private golf course 29 Lynn Boughton was Cotter's Assistant Chief Chemist from 1958 to 1964 and Chief Chemist until he resigned in 1979 Lynn was my husband We were in love and happily married for fifty two years We were also business partners best friends and sounding boards On the subject of Cotter Lynn talked I listened especially when our real estate was included in a Super Fund site when his illness appeared related to nuclear exposure and even more closely when his illness was proven to be indisputably caused by working with nuclear material an illness that took his life in 2001 My memory is reasonably good but certainly not flawless My comments should not be taken as fact but as probably not too far wrong After Lynn's death I donated thousands of his documents to The University of Colorado Boulder Archives The future rests on the past but new ownerships new administrations new bureaucracies always believe they start with a clean slate ignoring the past as they persist in repeating the same mistakes In dealing with nuclear materials mistakes affect not only fortunes but the health and property of neighbors and future generations Deyon Boughton
