The Psychiatrist's Role in Rehabilitating the Mentally Disabled United States. Department of Health, Education, and Welfare. Vocational Rehabilitation Administration, 1967

Euthanasia and Law in Europe John Griffiths, Heleen Weyers, Maurice Adams, 2008-05-21 This book is a successor to J Griffiths A Bood and H Weyers Euthanasia and Law in the Netherlands Amsterdam University Press 1998 which was widely praised for its thoroughness clarity and accuracy The new book emphasises recent legal developments and new research and has been expanded to include a full treatment of Belgium where since 2002 euthanasia has also become legal The book also includes descriptions written by local specialists of the

legal situation and what is known about actual practice in a number of other European countries England and Wales France Italy Scandinavia Spain Switzerland The book strives for as complete and dispassionate a description of the situation as possible It covers in detail the substantive law applicable to euthanasia physician assisted suicide withholding and withdrawing treatment use of pain relief in potentially lethal doses palliative and terminal sedation and termination of life without a request in particular in the case of newborn babies the process of legal development that has led to the current state of the law the system of legal control and its operation in practice the results of empirical research concerning actual medical practice A concluding part deals with some general questions that arise out of the material presented Is the legalisation of euthanasia an example of the decline of law or should it on the contrary be seen as part and parcel of the increasing juridification of the doctor patient relationship Does the Dutch experience with legalised euthanasia support the idea of a slippery slope toward a situation in which life especially of the more vulnerable members of society is less effectively protected Is it possible to explain and to predict when a society will decide to legalise euthanasia

Involuntary Detention and Therapeutic Jurisprudence Kate Diesfeld, 2018-05-08 International developments within the last twenty years have demonstrated controversial shifts in treatment for people with mental illnesses and the care of persons with intellectual disabilities These shifts have been apparent in an emphasis on deinstitutionalization increased scrutiny of detention and discharge decisions and in some countries in enforced treatment and care in the community As we become increasingly conscious of the political and moral dimensions of civil commitment these concerns are reflected in the professional literature but this does not often enough focus on issues of clinical and legal principle nor is it in a form which encourages comparative analysis This collection draws on contributors from the UK the USA Australia the Netherlands Canada and New Zealand who share a commitment to evaluating whether the civil detention processes protect the liberty dignity and justice interests of those with mental illnesses and intellectual disabilities The book is written from a therapeutic jurisprudence perspective and poses a number of questions with international application such as Are more categories of people being detained Is involuntary detention serving new purposes Are different forms of detention gaining credence and being more widely utilized And are admission decisions and review of detention decisions transparent consistent and just

How Psychiatrists Make Decisions Douglas W. Heinrichs, 2025-04-24 In an age of scientific psychiatry and evidenced based medicine the judgement of the psychiatric clinician in treating an individual patient has been devalued as the art of medicine as opposed to science with reduced evidentiary value The clinician is asked to apply the results of formal research studies of groups of patients the patient reduced to a token of a type the latter usually defined by diagnosis Yet the limits of formal research to guide the treatment of the unique individual requires clinical judgments where there is little formal guidance while the clinician's deliberations are devalued as necessary but of questionable validity This dilemma has been encouraged by the tacit nature of the way clinicians reach decisions In this book Heinrichs makes explicit the underlying methodology of

the clinical reasoning of experienced psychiatrists Starting with a detailed phenomenological examination of specific cases he argues that this methodology involves constructing models of each individual patient composed of patterns of propensities and their interaction POP models From this rational interventions can be hypothesized and predictions generated and tested The nature and characteristics of this modelling procedure is described in detail By making the model explicit clinicians can more critically assess their work Such models can also play a valuable role in educating clinical trainees This is discussed using recent work of cognitive scientists studying how expertise is developed across disciplines where considerable ambiguity and complexity exist From this specific recommendations follow for applying POP models in training settings to help turn novices into experts Finally the book challenges the devaluing of clinical judgment about individual patients by examining contemporary developments in the philosophy of science Problems with the hypothetico deductive view of science led to a naturalistic exploration of science Model construction to represent concrete pieces of reality to solve concrete problems has emerged as the fundamental process in science as practiced across all scientific disciplines POP modelling simply constitutes this process in psychiatry Hence when properly understood and rigorous applied clinical reasoning is a fully scientific process and merits high epistemological credibility Bits and Pieces of a Psychiatrist's Life Barry Blackwell,2012-10-25 Gathered like flotsam from an ocean of experience Bits and Pieces of a Psychiatrist s Life is a memoir told in thought provoking essays poems short stories and scientific articles chosen for lay readers An innovative format provides thirty one pieces covering personal and professional themes which include bits of differing lengths and styles Barry Blackwell creates a mosaic from some of the most exciting moments in the history of psychiatry and melds them in kaleidoscopic fashion with his various professional and personal roles **The American Journal of Insanity** ,1900
