Making Of Citizens:

Making Citizens Beth C. Rubin, 2012-05-23 Can social studies classrooms be effective makers of citizens if much of what occurs in these classrooms does little to prepare young people to participate in the civic and political life of our democracy Making Citizens illustrates how social studies can recapture its civic purpose through an approach that incorporates meaningful civic learning into middle and high school classrooms The book explains why social studies teachers particularly those working in diverse and urban areas should infuse civic education into their teaching and outlines how this can be done effectively Directed at both pre service and in service social studies teachers and designed for easy integration into social studies methods courses this book follows students and teachers in social studies classrooms as they experience a new approach to the traditional history oriented social studies curriculum using themes essential questions discussion writing current events and action research to explore enduring civic questions Following the experiences of three teachers working at three diverse high schools Beth C Rubin considers how social studies classrooms might become places where young people study ponder discuss and write about relevant civic questions while they learn history She draws upon the latest sociocultural theories on youth civic identity development to describe a field tested approach to civic education that takes into consideration the classroom and curricular constraints faced by new teachers

Making Citizens in Africa Lahra Smith, 2013-05-20 Smith argues that citizenship creation and expansion is a pivotal part of political contestation in Africa today Citizenship is a powerful analytical tool to approach political life in contemporary Africa because the institutional and structural reforms of the past two decades have been inextricably linked with the battle over the right to have rights Professor Lahra Smith s work advances the notion of meaningful citizenship referring to the ways in which rights are exercised or the effective practice of citizenship Using data from Ethiopia and developing a historically informed study of language policy ethnicity and gender identities Smith analyzes the contestation over citizenship that engages the state social movements and individuals in substantive ways By combining original data on language policy in contemporary Ethiopia with detailed historical study and a focus on ethnicity citizenship and gender this work brings a fresh approach to Ethiopian political development and contemporary citizenship concerns across Africa

Making Constituencies Lisa Jane Disch, 2021-11-12 Public division is not new in fact it is the lifeblood of politics and political representatives have constructed divisions throughout history to mobilize constituencies Since the turn of the twenty

first century the idea of a divided United States has become commonplace In the wake of the 2020 election some commentators warned that the American public was the most divided it has been since the Civil War Political scientists political theorists and public intellectuals have suggested that uninformed misinformed and disinformed voters are at the root of this division Some are simply unwilling to accept facts or science which makes them easy targets for elite manipulation It also creates a grass roots political culture that discourages cross partisan collaboration in Washington Yet manipulation of voters is not as grave a threat to democracy in America as many scholars and pundits make it out to be The greater threat comes from a picture that partisans use to rally their supporters that of an America sorted into opposing camps so deeply rooted that they cannot be shaken loose and remade Making Constituencies proposes a new theory of representation as mobilization to argue that divisions like these are not inherent in society but created and political representatives of all kinds forge and deploy them to cultivate constituencies

Responsible Citizens B. J. Brown, Sally Baker, 2013-10-15 The individual has never been more important in society in almost every sphere of public and private life the individual is sovereign Yet the importance and apparent power assigned to the individual is not all that it seems As Responsible Citizens investigates via its UK based case studies this emphasis on the individual has gone hand in hand with a rise in subtle authoritarianism which has insinuated itself into the government of the population Whilst present throughout the public services this authoritarianism is most conspicuous in the health and social welfare sectors such that a kind of governance through responsibility is today enforced upon the population

The Age of Direct Citizen Participation Nancy C. Roberts, 2015-01-28 Citizen involvement is considered the cornerstone of democratic theory and practice Citizens today have the knowledge and ability to participate more fully in the political technical and administrative decisions that affect them On the other hand direct citizen participation is often viewed with skepticism even wariness Many argue that citizens do not have the time preparation or interest to be directly involved in

public affairs and suggest instead that representative democracy or indirect citizen participation is the most effective form of government Some of the very best writings on this key topic which is at the root of the entire reinventing government movement can be found in the journals that ASPA publishes or sponsors In this collection Nancy Roberts has brought together the emerging classics on the ongoing debate over citizen involvement Her detailed introductory essay and section openers frame the key issues provide historical context and fill in any gaps not directly covered by the articles More than just an anthology The Age of Direct Citizen Participation provides a unique and useful framework for understanding this important subject It is an ideal resource for any Public Administration course involving citizen engagement and performance management

Making the Modern Turkish Citizen Özge Baykan Calafato,2022-01-27 Featuring over 100 colour images this book explores the photographic self representations of the urban middle classes in Turkey in the 1920s and the 1930s Examining the relationship between photography and gender body space as well as materiality and language its six chapters explore how the production and circulation of vernacular photographs contributed to the making of the modern Turkish citizen in the formative years of the Turkish Republic when nation building secularization and modernization reforms took centre stage Based on an extensive photographic archive the book shows that individuals actively reproduced circulated and negotiated the ideal citizen image imposed by the Kemalist regime reflecting not only state imposed directives but also their class aspirations and other wider social and cultural developments of the period from Western fashion trends and movies to the increasing availability of modern consumer items Calafato also reveals that the freedom from state control afforded by personal cameras allowed the desired image to be sometimes tweaked by incorporating elements from Ottoman and Turkic traditions by pushing the boundaries of gender norms or by introducing playfulness Making the Modern Turkish Citizen offers a valuable portrait of the ongoing political and social changes on the lives of the Turkish middle class and of how they saw and wanted to present themselves privately and publicly
