F. Calverton, 2017-05-16 Excerpt from The Making of Man An Outline of Anthropology The materials in this book have not been gathered together for the professional anthropologist or the professional research worker Any student of the subject already knows them They have been collected on the other hand for social scientists in general whose knowledge of anthropology On the whole is often very limited and is too seldom used for correct correlations and for that vast army of readers who are interested in the development of the social sciences but are unable to pursue their interest through many of the ramifications of the materials About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **The Short Stories of Guy de Maupassant** Guy de Maupassant, 1925      **The Collected Short Stories of Ring Lardner** Ring Lardner, 1929      Unmarking Whiteness and the New American Racism Michael L. Blakey, 2025-07-18 This book criticizes recent performative solutions to racism diversity programs at universities for example and White people's Fragility or intolerance of mature criticism These ideas are locked in an intellectually gated and defensive conversation that effectively denies the ongoing particular abuses of White supremacy This book instead proposes expensive educational and economic changes including reparations as necessary to achieve real equity Once imputed by the eugenical effects of World War II and the Civil Rights Movement's opposition to White racism the word race was largely stricken from scientific writing But

biological determinism remained deeply ensconced in an institution of science that assumed the natural world to be determining making natural science its most authoritative means Authoritative heritability estimates and genetic correlations though spurious continued to imply that obvious racial and class inequalities including their dire health effects were natural and acceptable White people often attempted to unmark their racial identity and assumed that of the uniquely normal people as though an act of anti racism Frankenberg shows On the contrary it served to deny their skin color privileges while enjoying benefits of ongoing structural racism as the only real complete human beings in the room This book uses an ethnology of anthropology to show White people s equivocal views of other s equality in their formal analyses museum collections and exhibitions and treatment of colleagues in recent times They remained deliberately deaf to critical African diasporic scholarship Thus Unmarking gives an anthropological analysis of the social history of White supremacy and shows what it is like for some to confront it In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies

**Racial Segregation and Eugenical Science Between the Wars** Michael L. Blakey, 2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and
