Star Trek Robert Greenberger, 2012-11-08 This is the first book to combine an authoritative history of the Star Trek franchise including all six television series and eleven feature films with anecdotes about the show from those who helped shape it from the outside in the fans Star Trek expert Robert Greenberger covers everything from show creator Gene

Roddenberry's initial plans for a series combining science fiction and Western elements, the premiere of the original series in 1966, its cancellation, the franchise's return in an animated series, and its subsequent history on television and film up to expectations for the 2013 J.J. Abrams film. Along the way, Greenberger analyzes Star Trek's unique cultural impact and tremendous cult following, including the famous and first-ever save-the-show mail campaign. But this isn't a sugarcoated history; this book chronicles the missteps as well as the achievements of Roddenberry and others behind the franchise. Approximately two dozen sidebars provide personal experiences of dedicated Trekkies who influenced or became a part of the franchise. Star Trek fandom is unparalleled in the effects it has had on the franchise itself. The book is illustrated with a large collection of photographs of memorabilia, many of which have never been seen before in print. **Star Trek**

Space Nine: The Missing Una McCormack, 2014-12-30 The entire sector is waiting to see what the newly reopened Bajoran wormhole will mean for the shifting political landscape in the Alpha Quadrant. On Deep Space 9, Captain Ro Laren is suddenly drawn into the affairs of the People of the Open Sky, who have come to the station in search of sanctuary. Despite Deep Space 9's new CMO, Doctor Beverly Crusher, offer the People aid. But when Dr. Crusher's highly secure files are accessed without permission, the same files that hold the secrets of the Shedaï, a race whose powerful but half-understood scientific secrets solved the Andorian catastrophe, the People seem the likeliest suspects. As tensions rise on the station, the science vessel *Athene Donald* arrives as part of its journey of exploration. The brainchild of Doctor Katherine Pulaski, this ship is crewed by different species from the *Khitomer Accords* and the *Typhon Pact*. Pulaski's hope is that science will do what diplomacy has not: help the great powers put aside their hostilities and work together. But when the *Athene Donald* is summarily stopped in her voyage by the powerful vessel of a hitherto unknown species, Pulaski begins to wonder: will this first contact bring her crew together or tear them all apart.
