*Making Children's Furniture and Play Structures* Bruce Palmer, 1974 Shows how to make a variety of stools chairs tables desks beds storage units play structures tents domes geoshapes habitats vehicles and other apparatuses using inexpensive easily obtained materials

*The Design of Childhood* Alexandra Lange, 2018-06-12 From building blocks to city blocks an eye opening exploration of how children's playthings and physical surroundings affect their development Parents obsess over their children's playdates kindergarten curriculum and every bump and bruise but the toys classrooms playgrounds and neighborhoods little ones engage with are just as important These objects and spaces encode decades even centuries of changing ideas about what makes for good child rearing and what does not Do you choose wooden toys or plastic or increasingly digital What do youngsters lose when seesaws are deemed too dangerous and slides are designed primarily for safety How can the built environment help children cultivate self reliance In these debates parents educators and kids themselves are often caught in the middle Now prominent design critic Alexandra Lange reveals the surprising histories behind the human made elements of our children's pint size landscape Her fascinating investigation shows how the seemingly innocuous universe of stuff affects kids behavior values and health often in subtle ways And she reveals how years of decisions by toymakers architects and urban planners have helped and hindered American youngsters journeys toward independence Seen through Lange's eyes everything from the sandbox to the street becomes vibrant with buried meaning
