repression as an alternative to military forces Given the enormous damage caused by military systems social defence is an alternative worth investigating and pursuing Since the 1980s J rgen Johansen and Brian Martin have been involved in promoting social defence In this book they provide an up to date treatment of the issues They address the downsides of military systems historical examples of nonviolent resistance to invasions and coups key ideas about social defence important developments since the end of the Cold War and the role of social movements Social defence challenges deeply embedded assumptions about violence and defence It is also a challenge to powerful groups with vested interests in systems of organised violence especially militaries and governments Popular action against aggression and repression is a radical alternative and a logical one

Ethics, Security, and The War-Machine Ned Dobos,2020-05-07 If pacifists are correct in thinking that war is always unjust then it follows that we ought to eliminate the possibility and temptation of ever engaging in it we should not build war making capacity and if we already have then demilitarization or military abolition would seem to be the appropriate course to take On the other hand if war is sometimes justified as many believe then it must be permissible to prepare for it by creating and maintaining a military establishment Yet this view that the justifiability of war making is also sufficient to justify war building is mistaken This book addresses questions of jus ante bellum or justice before war Under what circumstances is it justifiable for a polity to prepare for war by militarizing When if ever and why if at all is it morally permissible to create and maintain the potential to wage war In doing so it highlights the ways in which a civilian population compromises its own security in maintaining a permanent military establishment explores the moral and social costs of militarization and evaluates whether or not these costs are worth bearing

Cosmopolis Danilo Zolo, 2013-05-31 This volume makes a challenging critique of the idea of Cosmopolis that is the idea of world or global government In recent years this idea has been put forward as a way of averting the threat of war and international disorder and as a way of avoiding the destruction of the planet Proponents of this idea call for a radical reform of the United Nations which aims to legitimize this institution as an international police force and as a provider of global justice Zolo criticizes this new cosmopolitan philosophy and rejects the idea of trying to eliminate international conflict through the use of centralized and superior military force He seeks instead to develop a conception of international relations which takes account of their pluralistic dynamic and conflictual nature This conception moves away from the logic of hierarchical centralization which so dominates the UN Charter and towards the logic of weak interventionism and weak pacifism which relies on self organization co ordination and negotiation Timely provocative and iconoclastic *Cosmopolis* is an important contribution to current debates in politics international relations and social and political theory

An Introduction to Strategic Studies Barry Buzan, 1987-09-04 An Introduction to Strategic Studies addresses some of the major questions that govern both international relations and human survival This book provides a comprehensive introduction to the core concepts of contemporary strategic thinking It argues that strategic studies is about the impact of military technology on relations between states and that its specialised contribution must always be seen within the broader context of international economic and political relations
