Making Of Ireland Landscapes In Geology:

The Making of Ireland Michael Williams,D. A. T. Harper,2003 Ireland contains some of the most impressive and unspoilt scenery in western Europe From the conical white quartzite mountains of Donegal in the north to the ragged clutching fingers of the Skellig Rocks in the south the constant changes of light and shade alter these vistas moment by moment This country was forged on the anvil of time in a way which reflects the constantly changing patterns and configurations in the history of the planet *The Origins of the Irish* J. P. Mallory,2013-04-01 An essential new history of ancient Ireland and the Irish written as an engrossing detective story About eighty million people today can trace their descent back to the occupants of Ireland But where did the occupants of the island themselves come from and what do we even mean by Irish in the first place This is the first major attempt to deal with the core issues of how the Irish came into being J P Mallory emphasizes that the Irish did not have a single origin but are a product of multiple influences that can only be tracked by employing the disciplines of archaeology genetics geology linguistics and mythology Beginning with the collision that fused the two halves of Ireland together the book traces Ireland s long journey through space and time to become an island The origins of its first farmers and their monumental impact on the island is followed by an exploration of how metallurgists in copper bronze and iron brought Ireland into increasingly wider orbits of European culture Assessments of traditional explanations of Irish origins are combined with the very latest genetic research into the biological origins of the Irish Ireland Michael Viney,2014-10-28 Ireland conjures up images of nature s majesty sweeping coastlines rolling green hills and secluded peat bogs and marshlands A place of legendary beauty it is also a land with a rich natural history Michael Viney invites us to discover the geologic forces that created the island peer into the famous bone caves that hold unique clues about animals from long ago and experience the dramatic scenes of the cliff lined coast and tempestuous seas Viney begins deep in the past when rivers of molten rock and enormous glaciers stripped the land bare Soon after the glaciers retreated the island was transformed into a fresh new landscape home to an intriguing variety of plants and animals and an environment that has cultivated a rich human history and inspired countless myths Infused with the lyricism of Irish prose Ireland A Smithsonian Natural History is indispensable for anyone seeking to understand the natural beauty of the Emerald Isle *The Making of Ireland's Landscape Since the Ice Age* Valerie A. Making One's Way in the World Martin Bell, 2020-02-28

The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including

fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life Routledge Handbook of Landscape Character Assessment Graham Fairclough, Ingrid Sarlöv Herlin, Carys Swanwick, 2018-05-11 In this multi authored book senior practitioners and researchers offer an international overview of landscape character approaches for those working in research policy and practice relating to landscape Over the last three decades European practice in landscape has moved from a narrow if relatively straightforward focus on natural beauty or scenery to a much broader concept of landscape character constructed through human perception and transcending any of its individual elements Methods tools and techniques have been developed to give practical meaning to this idea of landscape character The two main methods Landscape Character Assessment LCA and Historic Landscape Characterisation HLC were applied first in the United Kingdom but other methods are in use elsewhere in Europe and beyond to achieve similar ends This book explores why different approaches exist the extent to which disciplinary or cultural specificities in different countries affect approaches to land management and landscape planning and highlights areas for reciprocal learning and knowledge transfer Contributors to the book focus on examples of European countries such as Sweden Turkey and Portugal that have adopted and extended UK style landscape characterisation but also on countries with their own distinctive approaches that have developed from different conceptual roots as in Germany France and the Netherlands The collection is completed by chapters looking at landscape approaches based on non European concepts of landscape in North America Australia and New Zealand This book has an introductory price of 125 205 which will last until 3 months after publication after this time it will revert to 140 225 *Global Geotourism Perspectives* Ross. K Dowling, David Newsome, 2010-05-09 An outstanding collection of international case studies that provide insight into and suggest best practice for issues such as conservation risk management education marketing interpretation and technology of actual and developing geotourism sites **Scotland's Mountain Landscapes** Colin K. Ballantyne, 2019-12-01 The diversity of Scotland's mountains is remarkable ranging from the isolated summits of the far northwest through the tor studded high plateau of the Cairngorms to the hills of the Southern Uplands Colin Ballantyne explains the geological and geomorphological evolution of Scotland's mountains to form an unparalleled variety of mountain forms *The British National Bibliography* Arthur James Wells, 2009 **Field Geology Education** Steven J. Whitmeyer, David W. Mogk, Eric J. Pyle, 2009-01-01 Field instruction has traditionally been at the core of the geoscience curriculum The field experience has been integral to the professional development of future geoscientists and is particularly important as it applies to student understanding of spatial temporal and complex relations in the Earth system As important as field experiences have been to geosciences education and the training of geoscientists the current situation calls for discipline wide reflection of the role of field experiences in the geoscience curriculum in light of practical and logistical challenges evolution in employment opportunities for geoscientists and changing emphases in the geoscience curriculum This volume seeks to broaden participation in field

Making Bourbon Karl Raitz, 2020-03-17 Raitz examines the rich story of distilling in its Kentucky heartland and traces its maturation from a local craft to an enduring industry William Wyckoff author of *How to Read the American West* While other industries chase after the new and improved bourbon makers celebrate traditions that harken back to an authentic frontier craft Distillers enshrine local history in their branding and time tested recipes and rightfully so Kentucky's unique geography shaped the whiskeys its settlers produced and for more than two centuries distilling bourbon fundamentally altered every aspect of Kentucky's landscape and culture *Making Bourbon A Geographical History of Distilling in Nineteenth Century Kentucky* illuminates how the specific geography culture and ecology of the Bluegrass converged and gave birth to Kentucky's favorite barrel aged whiskey Expanding on his fall 2019 release *Bourbon's Backroads* Karl Raitz delivers a more nuanced discussion of bourbon's evolution by contrasting the fates of two distilleries in Scott and Nelson Counties In the nineteenth century distilling changed from an artisanal craft practiced by farmers and millers to a large scale mechanized industry The resulting infrastructure farms mills turnpikes railroads steamboats lumberyards and cooperage shops left its permanent mark on the land and traditions of the commonwealth Today multinational brands emphasize and even construct this local heritage This unique interdisciplinary study uncovers the complex history poured into every glass of bourbon A gem The depth of Raitz's research and the breadth of his analysis have produced a masterful telling of the shift from craft to industrial distilling And in telling us the story of bourbon Raitz also makes a terrific contribution to our understanding of America's nineteenth century economy David E Hamilton author of *From New Day to New Deal*
