Holland explores why abortion dominates conservative politics like no other cultural issue Looking at anti abortion movements in four western states since the 1960s turning to the fetal pins passed around church services the graphic images exchanged between friends and the fetus dolls given to children in school she argues that activists made fetal life feel personal to many Americans Pro life activists persuaded people to see themselves in the pins images and dolls they held in their hands and made the fight against abortion the primary bread and butter issue for social conservatives Holland ultimately demonstrates that the success of the pro life movement lies in the borrowed logic and emotional power of leftist activism

*The Rise and Fall of National Women's Hospital* Linda Bryder, 2014-04-01 In this major history Linda Bryder traces the annals of National

Women's Hospital over half a century in order to tell a wider story of reproductive health. She uses the varying perspectives of doctors, nurses, midwives, consumer groups, and patients to show how together their dialog shaped the nature of motherhood and women's health in 20th century New Zealand. Natural childbirth and rooming in, artificial insemination, and in vitro fertilization, sterilization, and abortion: women's health and reproduction went through a revolution in the 20th century as scientific advances confronted ethical and political dilemmas. In New Zealand, the major site for this revolution was National Women's Hospital, established in Auckland in 1946 with a purpose-built building that opened in 1964. National Women's was the home of medical breakthroughs, scandals. This chronicle covers them all. **Cultural Technologies**

**Within a Technological Culture** Christian Papilloud, Kornelia Hahn, 2008. While there is already a huge research literature marked by the sociology of technology, the analyses gathered in this volume try to go beyond classical sociological approaches. Rather, the idea is that crossing traditional boundaries will lead to new results when it comes to understanding the effects of technologies. This idea is based on the assumption that the implementation of technology in daily life is no longer directly associated with binaries such as technology/nature, object/subject, alienated and creative activities, social determination and self-determination, material culture and social practices, or interactive communication and mediated communication. In fact, technology gains social relevance as it is uniquely embedded into cultural practices. So far, this argument holds especially true for analyses within the sociology of culture, ethnomethodology, and related fields. While these fields have primarily dealt with old technologies like communication skills, body performances, or trained craftsmanship, their fundamental argument should be extended to the more advanced technologies and to the use of latest high tech. *A Seat at the Table* Hettie V. Williams, Melissa Ziobro, 2023-09-11. Contributions by Omar H. Ali, Simone R. Barrett, Tejai Beulah, Sandra Bolzenius, Carol Fowler, Lacey P. Hunter, Tiera C. Moore, Tedi A. Pascarella, John Portlock, Lauren T. Rorie, Tanya L. Roth, Marissa Jackson, Sow Virginia L. Summey, Hettie V. Williams, and Melissa Ziobro. While Black women's intellectual history continues to grow as an important subfield in historical studies, there remains a gap in scholarship devoted to the topic. To date, major volumes on American intellectual history tend to exclude the words, ideas, and contributions of these influential individuals. *A Seat at the Table: Black Women Public Intellectuals in US History and Culture* seeks to fill this void, presenting essays on African American women within the larger context of American intellectual history. Divided into four parts, the volume considers women in politics, art, government, journalism, media, education, and the military. Essays feature prominent figures such as Shirley Chisholm, Oprah Winfrey, journalist Charlotta Bass, and anti-abortion activist Mildred Fay Jefferson, as well as lesser-known individuals. The anthology begins with a discussion of the founders in Black women's public intellectualism, providing a framework for understanding the elements, structure, and concerns central to their lives and work in the nineteenth century. The second section focuses on leaders in the Black Christian intellectual tradition, the civil rights era, and modern politics. Part three examines Black women in society and culture in the twentieth century, with essays on such topics

as artists in the New Negro era Joycelyn Elders a public servant and former surgeon general and America's foremost Black woman influencer Oprah Lastly part four concerns Black women and their ideas about public service particularly military service with essays on service members during World War II and the post WWII military Taken as a whole *A Seat at the Table* is an important anthology that helps to establish the validity and existence of heretofore neglected intellectual traditions in the public square

*Decision Making in Health and Medicine with CD-ROM* M. G. Myriam Hunink, 2001-11 Tells doctors and students how to evaluate complex clinical information to improve health care

*Biomedical Ethics and the Law* James M. Humber, Robert F. Almeder, 2012-12-06 In the past few years an increasing number of colleges and universities have added courses in biomedical ethics to their curricula To some extent these additions serve to satisfy student demands for relevance But it is also true that such changes reflect a deepening desire on the part of the academic community to deal effectively with a host of problems which must be solved if we are to have a health care delivery system which is efficient humane and just To a large degree these problems are the unique result of both rapidly changing moral values and dramatic advances in biomedical technology The past decade has witnessed sudden and conspicuous controversy over the morality and legality of new practices relating to abortion therapy for the mentally ill experimentation using human subjects forms of genetic intervention suicide and euthanasia Malpractice suits abound and astronomical fees for malpractice insurance threaten the very possibility of medical and health care practice Without the backing of a clear moral consensus the law is frequently forced into resolving these conflicts only to see the moral issues involved still hotly debated and the validity of existing law further questioned In the case of abortion for example the laws have changed radically and the widely publicized recent conviction of Dr Edelin in Boston has done little to foster a moral consensus or even render the exact status of the law beyond reasonable question

SRA News Ethnography is one of the chief research methods in sociology anthropology and other cognate disciplines in the social sciences This Handbook provides an unparalleled critical guide to its principles and practice The volume is organized into three sections The first systematically locates ethnography firmly in its relevant historical and intellectual contexts The roots of ethnography are pinpointed and the pattern of its development is demonstrated The second section examines the contribution of ethnography to major fields of substantive research The impact and strengths and weaknesses of ethnographic method are dealt with authoritatively and accessibly The

third section moves on to examine key debates and issues in ethnography from the conduct of research through to contemporary arguments The result is a landmark work in the field which draws on the expertise of an internationally renowned group of interdisciplinary scholars The Handbook of Ethnography provides readers with a one stop critical guide to the past present and future of ethnography It will quickly establish itself as the ethnographer s bible
