Metabolic Activities Of The Lung:

Metabolic Activities of the Lung, 1980 *Metabolic Activities of the Lung* Ruth Porter, Julie Whelan, 2009-09-14 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world **Intensive Care Medicine** Jean-Louis Vincent, 2013-06-29 The Update compiles the most recent widespread developments of experimental and clinical research and practice in one comprehensive reference book The chapters are written by well recognized experts in the field of intensive care and emergency medicine It is addressed to everyone involved in internal medicine anesthesia surgery pediatrics intensive care and emergency medicine *Anesthesiology: Today and Tomorrow* T.H. Stanley, W.C. Petty, 2012-12-06 *Toxicology of Inhaled Materials* H.P. Witschi, J.D. Brain, 2012-12-06 This book deals with the methods and scientific basis of inhalation toxicology It describes devices and facilities needed to expose animals to inhaled particles and gases as well as approaches to estimating or measuring the fraction of the inhaled material that is retained in the respiratory tract The book then reviews the evergrowing repertoire of techniques that can be used to measure the responses elicited by the exposure Quantitative and qualitative anatomical physiological and biochemical strategies are discussed in detail We believe that the toxicology of inhaled materials is an important and timely topic for several reasons During the past decade morbidity and mortality attributable to cardiovascular disease have significantly decreased Progress in combatting cancer the second most important cause of death has been slower and lung cancer actually became the leading cause of death in men and the second leading cause of cancer death in women In addition the incidence of non neo plastic respiratory diseases such as emphysema fibrosis and chronic bronchitis has increased the past decade In the United States the National Institutes of Health NIH has recently reported that chronic obstructive pulmonary disease affects nearly 10 million persons and accounts for 59 000 deaths yearly indeed it ranks as the fifth leading cause of death Because the incidence is increasing the NIH estimates that it may become the nation s fourth or even third leading cause of death by the year 2000 **Controlled Pulmonary Drug Delivery** Hugh D.C. Smyth, Anthony J. Hickey, 2011-06-24 The pace of new research and level of innovation repeatedly introduced into the field of drug delivery to the lung is surprising given its state of maturity since the introduction of the pressurized metered dose inhaler over a half a century ago It is clear that our understanding of pulmonary drug delivery has now evolved to the point that inhalation aerosols can be controlled both spatially and temporally to optimize their biological effects These abilities include controlling lung deposition by adopting formulation strategies or device technologies and controlling drug uptake and release through sophisticated particle technologies The large number of contributions to the scientific literature and variety of excellent texts published in recent years is evidence for the continued interest in pulmonary drug delivery research This reference text endeavors to bring

together the fundamental theory and practice of controlled drug delivery to the airways that is unavailable elsewhere Collating and synthesizing the material in this rapidly evolving field presented a challenge and ultimately a sense of achievement that is hopefully reflected in the content of the volume **Treatise on Pulmonary Toxicology** Richard A. Parent,1992-02-21 Comparative Biology of the Normal Lung is the first volume in a series entitled A Comprehensive Treatise on Pulmonary Toxicology The book is divided into four sections that deal with morphology and morphometry respiratory physiology biochemistry and pulmonary defense A special index lists and cross indexes all comparative data included in the text which provides readers with easy access to a broad spectrum of pulmonary data for a number of different species Over 50 internationally respected authors have contributed to this cutting edge scientific study designed for all scientists concerned with the pulmonary system including research scientists in medicine veterinary medicine zoology and toxicology
