Introducing Philosophy: Knowledge and Reality Jack S. Crumley II,2016-08-08 This book introduces the central issues of metaphysics and epistemology from skepticism justification and perception to universals personal identity and free will Though topically organized the book integrates positions and examples from the history of philosophy Plato Descartes and Leibniz are discussed alongside Quine Kripke and Haslanger Peripheral ideas and related historical asides are offered in boxes interspersed within the text providing further depth without disrupting the author s lucid explanations of central themes and arguments Original illustrations by Gillian Wilson are included throughout giving interesting and clear visual representations of many of the book s examples and thought experiments **The Understanding of Causation and the Production of Action** Peter Anthony White,2018-10-24 This text is an attempt to trace out a line of development in the understanding of how things happen from origins in infancy to mature forms in adulthood There are two distinct but related ways in which people understand things as happening denoted by the terms causation and action This book is concerned with both The central claim and organizing principle of the book is that by the end of the second year of life children have differentiated two core theories of how things happen These theories deal with causation and action The two theories have a common point of origin in the infant s experience of producing actions but thereafter diverge both in content and in realm of application Once established the core theories of causation and action never change but form a permanent metaphysical underpinning on which subsequent developments in the understanding of how things happen are erected The story of development is therefore largely the story of how further concepts become attached to integrated with the core theories Although the developmental and adult literatures on causal understanding appear at first glance to have little in common in

fact this appearance is illusory and the idea of two theories helps to bring the two literatures in contact with each other The book begins with a survey of the main philosophical ideas about causation and action Following this the possible origins of understanding in infancy are reviewed and separate chapters then deal with the development of understanding of action and causation through childhood This is then linked to the adult understanding of action and causation and the literature on adult causal attribution and causal judgement is reviewed from this perspective News Notes of California Libraries California State Library, 1923 Vols for 1971 include annual reports and statistical summaries *American Book Publishing Record Cumulative, 1950-1977* R.R. and its specific problem is to determine the antecedents of being From the introduction **God, Humanity, and the Universe** Alexei V.
