driving along the freeway when she is flagged down by a dazzling disheveled woman in green chiffon. The woman is Bobby Sleeper, a fellow Eastern European and an erstwhile art gallerist with a mysterious background and even more mysterious filmmaker husband. Within days the couple hire Viva as their assistant, then enlist her as an accomplice in an improbable scheme involving a long lost Vermeer masterwork, a multi-million dollar reward, and several shadowy ex-husbands. As Bobby and her husband weave her ever more tightly into their web, Viva is swept up in an escapade that is one part art heist, one part love triangle, and one part education of a felon. Entranced by their lifestyle, alarmed by their ramshackle scam, Viva realizes she is out of her depth and that only luck, cunning, and her own hustler's instinct can save her from disaster. Careening from the canyons of LA to the canals of Venice, *The Lady Waiting* is a page-turning caper, a cavalcade of twenty-first-century sins, rapacious capitalism, shameless fraud, and atrocious behavior, and a showcase for three of the biggest and most unforgettable characters in recent fiction.

MERS-CoV Fang Li, Lanying Du, 2019-12-12. Middle East respiratory syndrome coronavirus (MERS-CoV) is an emerging zoonotic coronavirus. First identified in 2012, MERS-CoV has caused over 2460 infections and a fatality rate of about 35% in humans. Similar to severe acute respiratory syndrome coronavirus (SARS-CoV), MERS-CoV likely originated from bats, however, different from SARS-CoV which potentially utilized palm civets as its intermediate hosts. MERS-CoV likely transmits to humans through dromedary camels. Animal models such as humanized mice and nonhuman primates have been developed for studying MERS-CoV infection. Currently, there are no vaccines and therapeutics approved for the prevention and treatment of MERS-CoV infection, although a number of them have been developed preclinically or tested clinically. This book covers one editorial and 16 articles, including seven review articles and nine original research papers written by researchers working in the field of MERS-CoV. It describes the following three main aspects: 1. MERS-CoV epidemiology, transmission, and pathogenesis; 2. current progress on MERS-CoV animal models, vaccines, and therapeutics; and 3. challenges and future prospects for MERS-CoV research. Overall, this book will help researchers in the MERS-CoV field to further advance their work on the virus. It also has important implications for other coronaviruses as well as viruses outside the coronavirus family with pandemic potentials.

Smith,2011-01-11 In this provocative and timely book Middle East expert Lee Smith overturns long held Western myths and
assumptions about the Arab world offering advice for America s future success in the region Seeking the motivation behind
the September 11 attacks Smith moved to Cairo where he discovered that the standard explanation a clash of East and West
was simply not the case Middle East conflicts have little to do with Israel the United States or the West in general but are
endemic to the region According to Smith s Strong Horse Doctrine the Arab world naturally aligns itself with strength power
and violence He argues that America must be the strong horse in order to reclaim its role there and that only by
understanding the nature of the region s ancient conflicts can we succeed Smith details the three decades long relationship
between Egyptian President Hosni Mubarak and the United States and gives a history of the Muslim Brotherhood which
would likely play an important role in the formation of a new government in Egypt He also discusses Lebanon where tipping
the balance against Hezbollah in favor of pro democracy pro US forces has become imperative as a special tribunal
