Immunological, oxidative, and structural factors and their responses to regulatory T lymphocyte therapy in amyotrophic lateral sclerosis David R. Beers, Jason R. Thonhoff, Aaron D. Thome, Alireza Faridar, Weihua Zhao, Shixiang Wen, Stanley H. Appel, 2023-08-23 Aim Amyotrophic lateral sclerosis ALS is a systemic disease in which multiple dysfunctional pathways converge culminating as this devastating disease Immunological oxidative and structural analytes in

cross sectional and longitudinal patient sera samples were investigated and evaluated for their responses following autologous regulatory T lymphocyte Treg IL 2 therapy Methods This retrospective cohort study was conducted at Houston Methodist Hospital and Massachusetts General Hospital in adults with sporadic ALS Cross sectional and longitudinal sera levels for each of the immunological CCL2 IL 18 oxidative 4 HNE MDA and structural analytes Nf L pNf H were assayed by ELISAs and correlated with disease progression and clinical outcomes Results CCL2 and IL 18 levels were elevated in patients especially rapidly progressing patients 4 HNE was elevated in a subset of patients whereas MDA was elevated in cross sectional and longitudinally studied subjects Nf L was elevated in rapidly progressing patients whereas pNf H was decreased in these same patients In the eleven patients assayed longitudinally only three patients had increased levels of Nf L or pNf H no patient had increased levels of both neurofilaments Treg IL 2 therapy suppressed levels of CCL2 IL 18 and 4 HNE Conclusions In these cohorts of patients with sporadic ALS CCL2 IL 18 and 4 HNE accurately reflected disease progression on and off therapy MDA was elevated but did not respond to therapy The cross sectional and longitudinal data were complementary Nf L and pNf H did not reliably and consistently reflect disease progression Immunological and oxidative pathological factors accurately reflected therapeutic responses in these pathways and are candidates to target clinical trial endpoints *Research Grants Index* National Institutes of Health (U.S.).
