Metaphysics Geoffrey Klempner, 2019-01-07 Is there more to existence than the familiar objects of sense perception or the underlying structures that science describes Are there things that lie beyond the mundane world of empirical inquiry things whose nature can only be approached through pure reasoning While some philosophers today remain sceptical about such a possibility others continue to hold theories that are unashamedly metaphysical One theory formulated over two centuries ago that still finds adherents today is Berkeley's immaterialism the view that our familiar material world of objects in space is ultimately composed of mental entities such as perceptions in the mind of God We shall be looking at this and other similar theories and examining their claims to credibility Pathways Philosophy Shrader, 1996
