Pathways Out of Poverty Gary S. Fields, 2013-12-01 Until recently development economists tended to assume a role for private enterprises in reducing poverty without articulating it explicitly How private firms contribute to economic mobility and poverty reduction and what governments can do to enhance their contribution is the theme of this book In developing countries private enterprise is far and away the largest source of employment and investment and a significant source of government revenue In addition to these tangible contributions private enterprise is an important source of less tangible but critically important factors such as openness to ideas innovation and opportunity The book presents new evidence which demonstrates the essential role which private firms are playing in the course of economic development Throughout the focus is on economic mobility Regional case studies ranging from the Far East to Sub Saharan Africa hone in on the role of entrepreneurship in development Drawing on the rich materials of the World Bank's Worldwide Business Environment Survey key policy factors are identified Special attention is paid to obstacles facing small and medium sized enterprises The concluding chapters focus on practical ways in which governments of developing and transition countries can encourage the capacity of poor people to move up the economic ladder

Nicholas Stern, F. Halsey Rogers, Jean-Jacques Dethier, 2006-08-11 Despite significant gains in promoting economic growth and living conditions or human progress globally over the last twenty five years much of the developing world remains plagued by poverty and its attendant problems including high rates of child mortality illiteracy environmental degradation and war In *Growth and Empowerment* Nicholas Stern Jean Jacques Dethier and F Halsey Rogers propose a new strategy for development Drawing on many years of work in development economics in academia in the field and at international institutions such as the World Bank the authors base their strategy on two interrelated approaches building a climate that encourages investment and growth and at the same time empowering poor people to participate in that growth This plan differs from other models for development including the dogmatic approach of market fundamentalism popular in the 1980s and 1990s Stern Dethier and Rogers see economic development as a dynamic process of continuous change in which entrepreneurship innovation flexibility and mobility are crucial components and the idea of empowerment as both a goal and a driver of development is central The book points to the unique opportunity today after 50 years of successes and failures and with a growing body of analytical work to draw on to pursue new development strategies in both research and action

**International Labour Review** Organisation internationale du travail, Bureau international du travail, What Have We Learned from a Decade of Manufacturing Enterprise Surveys in Africa ? Arne Bigsten, Måns Söderbom, 2005 In the early 1990s the World Bank launched the Regional Program on Enterprise Development in several African countries a key component of which was the collection of manufacturing firm level data In this paper the authors review the research based on the data sets generated by these and subsequent firm surveys in Africa with a special view to what they think are the most important policy implications The authors survey the research on the African business environment focusing on market size risk access to credit labor and infrastructure They cover the research on how firms choose to organize themselves and how firms do business They review the research on firm performance including firm growth investment and technology acquisition and exports They conclude with an extended discussion of the policy lessons World Bank web site *Moving Out of Poverty* Deepa Narayan, Patti Petesch, 2007-07-30 This book brings together the latest thinking about poverty dynamics from diverse analytic traditions While covering a vast body of conceptual and empirical knowledge about economic and social mobility it takes the reader on compelling journeys of multigenerational accounts of three villages in Karnataka India twelve years in the life of a street child in Burkina Faso and much more Leading development practitioners and scholars from the fields of anthropology economics political science and sociology critically examine the literature from their disciplines and contribute new frameworks and evidence from their own works The *Moving Out of Poverty* series launched in 2007 is under the editorial direction of Deepa Narayan Senior Advisor of the World Bank and former director of the pathbreaking *Voices of*

the Poor series It features the results of new comparative research across more than 500 communities in 15 countries to understand how and why people move out of poverty and presents other work which builds on interdisciplinary and contextually grounded understandings of growth and poverty reduction *Poverty Reduction and Pro-Poor Growth The Role of Empowerment* OECD,2012-04-27 Empowerment of those living in poverty is both a critical driver and an important measure of poverty reduction This report aims to build donor understanding of empowerment and how best to support it

**World Development Report 2005** World Bank,2004 Firms and entrepreneurs of all types from microenterprises to multinationals play a central role in growth and poverty reduction Their investment decisions drive job creation the availability and affordability of goods and services for consumers and the tax revenues governments can draw on to fund health education and other services Their contribution depends largely on the way governments shape the investment climate in each location through the protection of property rights regulation and taxation strategies for providing infrastructure interventions in finance and labor markets and broader governance features such as corruption The World Development Report 2005 argues that improving the investment climates of their societies should be a top priority for governments Drawing on surveys of nearly 30 000 firms in 53 developing countries country case studies and other new research the Report explores questions such as What are the key features of a good investment climate and how do they influence growth and poverty What can governments do to improve their investment climates and how can they go about tackling such a broad agenda What has been learned about good practice in each of the main areas of the investment climate What role might selective interventions and international arrangements play in improving the investment climate What can the international community do to help developing countries improve the investment climates of their societies In addition to detailed chapters exploring these and related issues the Report contains selected data from the World Bank's new program of Investment Climate Surveys the Bank's Doing Business Project and World Development Indicators 2004 an appendix of economic and social data for over 200 countries This Report offers practical insights for policymakers executives scholars and all those with an interest in economic development [The Big Business of Small Enterprises](#) World Bank,2015-02-13 The World Bank Group promotes small and medium enterprise SME growth through both systemic and targeted interventions Targeting means focusing benefits on one size class of firms to the exclusion of others Targeted support for SMEs is a big business for the World Bank Group averaging around 3 billion a year in commitments expenditures and gross exposure over the 2006-12 period In the context of broader reforms such targeted support can be a powerful tool Targeting SMEs is not an end in itself but a means to create economies that can employ more people and create more opportunity for citizens to achieve prosperity A thriving and growing SME sector is associated with rapidly growing economies A central challenge is to level the economic playing field by ensuring dynamic markets strengthening market support institutions and removing constraints to participation IEG found that financial sector development can have both a pro growth and pro poor

impact by alleviating SMEs financing constraints enabling new entry of firms and entrepreneurs and better resource allocation Layered on top of this are targeted forms of assistance these interventions may build on a foundation of more systemic reforms may come in tandem with them or may in fact be a means to build systemic reforms from the bottom up Any credible justification of targeted support to SMEs must be focused on establishing well functioning markets and institutions not simply providing a temporary supply of benefits to a small group of firms during a project s lifespan Thus targeted interventions need to leverage resources to produce broader benefits for institutions and markets To make targeted support for SMEs more effective the World Bank Group needs to do several things Clarify its approach to targeted support to SMEs Enhance the support s relevance and additionality Institute a tailored research agenda Strengthen guidance and quality control for such support Reform MIGA s Small Investment Program

**We Do Know How** James T. Riordan,2014-09-24 An insider with practical experience in development work reveals how understanding market realities can more effectively reduce poverty This book by a practitioner not an academic government official or pundit has been written for practitioners and offers fresh thinking on how to do international development work It combines that thinking with practical guidance in plain English on what to do and perhaps just as importantly what not to do on the ground We Do Know How takes buzzwords commonly used in development circles demand driven results oriented accountability and others and makes them real spelling out a proven approach for expanding business sales and generating jobs for poor people Although government has a role to play in development in the end the actions of businesses drive economic growth and expand people s incomes We Do Know How shows how to build on the incentives that drive businesses and in the process create jobs for the poor Specifically it urges development practitioners to support only those business opportunities for which there is market demand abiding by the maxim produce what you can sell not sell what you produce More than that it cautions practitioners not to become solutions looking for problems but to search creatively for ways to solve the specific problems that stand most in the way of clients meeting buyers requirements We Do Know How challenges much conventional wisdom on how to do development work At the same time and in contrast to other books on development it shows how by maintaining focus and discipline development practitioners can deliver demonstrable increases in jobs for those who need them

**Financial Strategies in Competitive Markets** Hasan Dincer,Serhat Yüksel,2021-04-13 As globalization continues to rapidly evolve economic borders between countries have practically disappeared One effect is that nowadays companies can access new markets by investing in other countries This offers an important advantage especially for international and large scale companies However one result is the increased market competition Small scale local firms and SMEs have to compete with international firms and corporations that have significantly more resources This competitive environment jeopardizes the sustainability of the smaller companies which often are driven out of business by the more powerful global players This book discusses financial strategies for small and middle size companies to increase their competitiveness in the global markets Brookings Trade Forum: 2004 Susan M. developing countries      The Government of Chronic Poverty Sam Hickey, 2013-10-31 What are the underlying causes of chronic poverty Can development beyond neoliberalism offer the strategies required to challenge such persistent forms of poverty particularly through efforts to promote citizenship amongst poor people Drawing on case study evidence from Africa Latin America and South Asia the contributions critically examine different attempts to govern chronic poverty via the promotion of particular forms and notions of citizenship with a specific focus on the role of community based approaches social policy and social movements Poverty is seen here as deriving from underlying patterns of uneven development involving processes of capitalism and state formation that foster inequality generating mechanisms and particularly disadvantaged social categories Sceptics tend to deride the emphasis under current inclusive forms of Liberalism on tackling poverty through the promotion of citizenship as inevitably depoliticising and disempowering for poor people and our cases do suggest that citizenship based strategies rarely alter the underlying basis of poverty However our evidence also offers some support to those optimists who suggest that progressive moves towards poverty reduction and citizenship formation have become more rather than less likely at the current juncture The promotion of citizenship emerges here as a significant but incomplete effort to challenge poverty that persists over time This book was published as a special issue of the Journal of Development Studies      Marketplace Trade and West African Urban Development Krys Ochia, 2022-01-01 This book analyses how informal economy traders and the marketplace institution dominate the local economy in African cities According to the World Bank being an African reduces the probability that an individual is an entrepreneur in the manufacturing sector by more than 95 percent Exporting unprocessed strategic raw materials and importing large volumes of finished goods stagnate Africa's informal sector while creating formal jobs overseas This suggests employment increases in distributive trade and persistence of the marketplace institution in reducing urban unemployment and income inequality However there is limited knowledge of the men and women with permanent stalls in large urban marketplaces that function daily as a temporary city within a city even though they are the major actors in distribute trade More important their daily out of stall contacts resulting from maintaining complex social and economic relationships that determine the financial health of family business and the economy are generally unexplored and largely unknown but have significant unintended consequences on the urban mobility system Researchers planners development practitioners and policymakers have therefore not focused their attention and considered the impacts of the powerful economic institution marketplaces and traders in framing transport planning processes and urban development policies and that is the paradox surrounding marketplace trade and urban development in West Africa
