The Oxford Handbook of the History of Communism S. A. Smith, 2014-01-09 The impact of Communism on the twentieth century was massive equal to that of the two world wars Until the fall of the Soviet Union in 1991 historians knew relatively little about the secretive world of communist states and parties Since then the opening of state party and diplomatic archives of the former Eastern Bloc has released a flood of new documentation The thirty five essays in this Handbook written by an international team of scholars draw on this new material to offer a global history of communism in the twentieth century In contrast to many histories that concentrate on the Soviet Union The Oxford Handbook of the History of Communism is genuinely global in its coverage paying particular attention to the Chinese Revolution It is global too in the sense that the essays seek to integrate history from above and from below to trace the complex mediations between state and society and to explore the social and cultural as well as the political and economic realities that shaped the lives of citizens fated to live under communist rule The essays reflect on the similarities and differences between communist states in order to situate them in their socio political and cultural contexts and to capture their changing nature over time Where appropriate they also reflect on how the fortunes of international communism were shaped by the wider economic political and cultural forces of the capitalist world The Handbook provides an informative introduction for those new to the field and a comprehensive overview of the current state of scholarship for those seeking to deepen their understanding [China's Universities, 1895-1995](#) Ruth Hayhoe, 2017-12-12 This reissue 1996 provides an in depth analysis of the development of the Chinese university during the twentieth century a period of momentous social economic cultural and political change It brings together reflections on the Chinese university and its role in the two great experiments of modern China Nationalist efforts to create a modern state as part of capitalist modernisation and the Communist project of socialist construction under Soviet tutelage In addition to these two frames of discourse other models and patterns are examined for instance the persistence of cultural patterns or Maoist revolutionary thought **The Global Coffee Economy in Africa, Asia, and Latin America, 1500-1989** William Gervase Clarence-Smith, Steven Topik, 2003-06-16 Coffee beans grown in Brazil Colombia Vietnam or one of the other hundred producing lands on five continents remain a palpable and long standing manifestation of globalization For five hundred years coffee has been grown in tropical countries for consumption in temperate regions This 2003 volume brings together scholars from nine countries who study coffee markets and societies over the last five centuries in fourteen countries on four continents and across the Indian and Pacific Oceans with a special emphasis on the nineteenth and early twentieth centuries The chapters analyse the creation and function of commodity labour and financial markets the role of race ethnicity gender and class in the formation of coffee societies the interaction between technology and ecology and the impact of colonial powers nationalist regimes and the forces of the world economy

The Individualization of Chinese Society Yunxiang Yan, 2020-08-19 Chinese society has seen phenomenal change in the last 30 years Two of the most profound changes have been the rise of the individual in both public and private spheres and the consequent individualization of Chinese society itself Yet despite China's recent dramatic entrance into global politics and economics neither of these significant shifts has been fully analysed China may indeed present an alternative model of social transformation in the age of globalisation so its path to development may have particular implications for the developing world The Individualization of Chinese Society reveals how individual agency has been on the rise since the 1970s and how this has impacted on everyday life and Chinese society more broadly The book presents a wide range of detailed case studies on the impact of economic policy patterns of kinship changes in marriage relations and the socio economic position of women the development of youth culture the politics of consumerism and shifting power relations in everyday life

China and the World Trade Organization Günseli Berik,Xiao-yuan Dong,Gale Summerfield,2013-09-13 China's joining the World Trade Organization at the end of 2001 signifies a milestone in the country's global integration after two decades of economic reforms that have fundamentally transformed the economic organization of China. This collection seeks to identify the gendered implications within China of the country's transition from socialism to a market economy and its opening up to international trade and investment. The changes have created greater wealth for some while at the same time serious gender class ethnic and regional disparities have also emerged. Drawing from historical analytical and policy oriented work the essays in this collection explore women's well being relative to men's in rural and urban China by looking at land rights labor market status and labor rights household decision making health the representation of women in advertising and beauty pageants. This book was previously published as a special issue of the journal *Feminist Economics* the official journal of the International Association for Feminist Economics IAFPE. All contributions have been subjected to the journal's rigorous peer review process and comply with the journal's editorial policies as overseen by the editor Diana Strassmann and the journal's editorial team including the associate editors the editorial board numerous volunteer reviewers and the journal's in house editorial staff and freelance style editors. The special issue and book have been made possible by the generous financial support of Rice University and the Ford Foundation. Beijing Routledge Handbook of East Asian Gender Studies Jieyu Liu,Junko Yamashita,2019-11-26 The Routledge Handbook of East Asian Gender Studies presents up to date theoretical and conceptual developments in key areas of the field taking a multi disciplinary and comparative approach. Featuring contributions by leading scholars of Gender Studies to provide a cutting edge overview of the field this handbook includes examples from China Japan South Korea Taiwan and Hong Kong and covers the following themes theorising gender relations women's and feminist movements work care and migration family and intergenerational relationships cultural representation masculinity and state militarism and gender. This handbook is essential reading for scholars and students of Gender and Women's Studies as well as East Asian societies social policy and culture **Women in the Face of Change** Annie Phizacklea,Hilary Pilkington,Shirin Rai,2013-10-08 The years 1989 and 1990 will probably be best remembered for the speed and breadth of political and economic change which swept through what used to be referred to as the Communist Bloc. With the disintegration of this bloc there has been no shortage of western advice on how to democratize economy and politics in these societies. However little thought has been given to what this change means for the millions of women who have toiled for decades alongside men in the factories and fields as well as performing their womanly mission in the home. This collection from women in Eastern and Western Europe and covering both Europe and China poses many questions about the impact of change. It contributes to the debate that seeks to combat inertia and ethnocentrism within western feminism and also to the separate and the critical women's voice which is re-emerging in the Soviet Union Eastern Europe and China *Law and Justice in China's New Marketplace* Ronald C. Keith,2001-01-11 *Law and Justice in China's New Marketplace* provides the

first comprehensive multidisciplinary analysis of the jurisprudence and related law underlying the contemporary Chinese transition to the socialist market economy New pluralized jurisprudence has moved beyond Marxist class analysis to consider a new balance of values relating to economic efficiency and social justice in the marketplace and yet the interior debates and perspectives concerning these values are virtually unknown in the Western scholarly literature By analysing the changing Chinese approach in law to the adjustment of social interests in the context of profound economic change Law and Justice in China's New Marketplace provides a unique reference tool It outlines the new vocabulary of market jurisprudence and law and examines new legal thinking on rights protection with reference to widely ranging and often hot internal debate over human rights property law and procedural or judicial justice

Choosing

Daughters Lihong Shi, 2017-08-08 China's patrilineal and patriarchal tradition has encouraged a long standing preference for male heirs within families Coupled with China's birth planning policy this has led to a severe gender imbalance But a counterpattern is emerging in rural China where a noticeable proportion of young couples have willingly accepted having a single daughter They are doing so even as birth planning policies are being relaxed and having a second child and the opportunity of having a son is a new possibility Choosing Daughters explores this critical yet largely overlooked reproductive pattern emerging in China's demographic landscape Lihong Shi delves into the social economic and cultural forces behind the complex decision making process of these couples to unravel their life goals and childrearing aspirations the changing

family dynamics and gender relations and the intimate parent daughter ties that have engendered this drastic transformation of reproductive choice She reveals a leading edge social force that fosters China s recent fertility decline namely pursuit of a modern family and successful childrearing achieved through having a small family Through this discussion Shi refutes the conventional understanding of a universal preference for sons and discrimination against daughters in China and counters claims of continuing resistance against China s population control program

Transforming the Gendered Organisation of Labour and Leisure Yuqin Huang,2020-08-28 This book explores how the labour and leisure lives of people in contemporary rural China have been structured and transformed discussing the changing dynamics of power relations both between and within genders and in local village and family household and remote the state and market contexts It combines perspectives from sociology gender studies social history and demography to investigate the changes and continuities in the lives of women and men in Lianhe a rural village in central China examining the period from 1926 to 2013 through the lens of labour and leisure Employing methods from the field of ethnography the research focuses on the life stories of three generations including 57 women in Lianhe The book develops a double comparison analytical framework to compare the organisation of labour and leisure in the three respective generations proceeding on the one hand diachronically along the historical time that is the pre collective era collective era and reform era and synchronically along the women s life stages on the other In so doing the book links women s shifting role in changing family household forms with broader socio economic political demographic and cultural changes Moreover it employs a holistic perspective to reflect changing patterns in women s labour and leisure by disrupting the remunerated unremunerated home labour within outside household and labour leisure dichotomies and exploring the interrelations between them Based on this the book then identifies the determinants of rural women s labour and leisure and reveals the women s experiences of their changing identities particularly concerning their relationships with

their parents in law sisters in law husbands and children Particularly highlighting the interdependence and inequality among women it also reveals their own perception of their identities and relationships and their understanding of husband wife fairness and gender equality Lastly it demonstrates that the prevalent androcentrism in the remote world does not match the increasing husband wife fairness in the local world and argues that this mismatch has caused the complex and paradoxical experiences and subjectivities of these women Given its scope the book is of interest to scholars students and researchers in the fields of sociology anthropology gender and development as well as a general audience looking to explore contemporary rural China
